ASB Summer University 2006: Assessment of student satisfaction with a threefold approach Oliver

Mühlich, 2007-05-30 Inhaltsangabe: Abstract: The aim of the research presented here is to assess student satisfaction at the Aarhus School of Business (ASB) for the Summer University that was first introduced in July 2006. The European Performance Satisfaction Index (EPSI) was adapted to incorporate student satisfaction in order to reach this aim, and was used as the main approach in our thesis. The necessary data was gathered from online surveys we derived from the students. Two studies complemented this model. On the one hand, structured interviews were conducted with all relevant lecturers and on the other hand, a survey was conducted in two waves with Summer University participants. In the first wave, the students initial expectations were measured and in the second wave it was the degree of fulfilment for these expectations that were measured. Results from the EPSI model indicated that participants of the Summer University were satisfied overall with the program and will remain loyal. Surprisingly however, the variable image showed no direct impact on perceived value, satisfaction, and loyalty. The results from the interviews showed that lecturers were well chosen, but not adequately prepared for the program. In addition, the survey results indicated that expectations were to some degree fulfilled, but certain attributes of lecture quality experienced a negative disconfirmation of expectations. Furthermore, the direct comparison of data from the lecturers and the students suggested problems with the information flow between ASB, the lecturers, and the students. From these findings it can be concluded that overall, the Summer University was a success in the introduction of a new study program; however, there are some areas that need to be improved. Thus, our suggestions include new positioning and better marketing for next year, concrete improvement of quality attributes and information flow, and a strategy for sustainability and expansion of the Summer University. Our work successfully presents student satisfaction with a threefold approach, not used hitherto. Combining all three approaches in one dissertation and establishing linkages and interrelations between them, provides an extensive insight towards student satisfaction. Considering ASB Summer University took place for the first time in 2006, the insights we provide and the recommendations we are able to give, will influence the further organisational and managerial development of the program. Effective Anti-Social Behaviour (ASB) Case Management Principles Janine Green,2020-12-14 Being an ASB officer is incredibly exciting and rewarding but it's not always easy. An ASB officer's role is often underestimated and little support is currently available. There are no entry requirements for the profession. Induction and training programmes are often lacking or all too brief. Often, new officers are handed a caseload and expected to muddle their way through. Whilst officers strive to do their best, a lack of base-level knowledge can result in poor practice and untimely and indecisive action, leading to cases being open much longer than necessary and harm to victims being prolonged. Experience of working with many organisations has also shown that those who provide the best ASB service have things in common: they understand exactly what ASB is, conduct thorough investigations, manage risk effectively, truly work in partnership with other agencies and use the complete toolkit when deciding on action. The purpose of this book is to try to fill some of these gaps. It provides a comprehensive introduction to the five stages of ASB case management: report, investigation, action, monitor and close. It busts some of the common myths and misconceptions that prevent officers from progressing cases and resolving the problems. It is written in a user-friendly manner, using examples to illustrate key points. It would provide an excellent, off-the-shelf, introduction for anyone new to ASB, as well as a useful reference tool for more experienced officers. Whilst primarily tailored for officers tackling ASB in the social housing sector, much of the information contained would be equally useful for anyone managing private sector cases. It would also be useful for other partners who work with social housing providers and wish to know more about the work that they undertake.

The California Chronicles A S B,2023-01-18 Stories are about more than their plot. Sometimes they contain personal memories, on occasion misremembered facts, but almost always these stories are influenced by the surroundings of the author. In his collected short story work, *The California Chronicles*, author A.S.B. presents a curated selection of tales

written exclusively while living in Long Beach, CA. Subtle influences abound, especially when considering the previous life experiences of the author, who up to this point resided in much different surroundings. The sway that these locations have and how they affect the work represents the kind of relaxed, free-thought that can come from feeling truly at home in your environment. These stories range over three categories: Prose, Horror, and Science Fiction, with one central theme throughout: change.
