**Joe Lee Saupe**

*Organizing Effective Institutional Research Offices* Jennifer B. Presley, 1990 This volume of *New Directions for Institutional Research* is designed to assist both those who are establishing an institutional research function for the first time and those who are invigorating an existing unit. The authors write from their own experiences as institutional researchers involved with development activities. They provide major guidelines for how to approach tasks and avoid major pitfalls. Seasoned institutional researchers will find that many of the chapters provide a useful update on such issues as computing tools, data administration, the establishment of an assessment capacity, and interpersonal communications. This is the 66th issue of *New Directions for Institutional Research*. For more information on the series, please see the Journals and Periodicals page.

Starting and Sustaining Meaningful Institutional Research at Small Colleges and Universities Warren J. Brown, Wei-Fang Lin, Gordon J. Hewitt, Ruth Vater, 2017-08-14 The focus of this volume is on the work of Institutional Researchers in a small college or university (SCUs) setting. At an SCU, the goal of the IR office is to balance the bureaucratic tendencies of data-driven decision making with the need for collegiality and collaboration. Drawing on numerous examples, it illustrates how IR professionals can leverage their positionality within the institution to design data flows to answer questions by serving as convergent thinkers, connecting disjointed systems and requests. This volume: identifies the challenges that small IR offices face reinforces the idea of collegiality as a defining feature of small IR offices discusses several principles for using data about teaching and learning explores the effects of low response rates in survey data and the effects of nonresponse bias demonstrates the importance of collaborative efforts in enacting change proposes a model of policy development focused on student success presents an effective model of SCU IR office development This is the 173rd volume of this Jossey-Bass quarterly report series. Timely and comprehensive, *New Directions for Institutional Research* provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation, and institutional management.

**The Handbook of Institutional Research** Richard D. Howard, Gerald W. McLaughlin, William E. Knight, 2012-06-28 Institutional research is more relevant today than ever before as growing pressures for improved student learning and increased institutional accountability motivate higher education to effectively use ever-expanding data and information

resources. As the most current and comprehensive volume on the topic, the Handbook describes the fundamental knowledge, techniques, and strategies that define institutional research. The book contains an overview of the profession and its history, examines how institutional research supports executive and academic leadership and governance, and discusses the varied ways data from federal, state, and campus sources are used by research professionals. With contributions from leading experts in the field, this important resource reviews the analytic tools, techniques, and methodologies used by institutional researchers in their professional practice and covers a wide range of topics such as: conducting institutional research; statistical applications; comparative analyses; quality control systems; measuring student, faculty, and staff opinions; and management activities designed to improve organizational effectiveness.

**Conducting Institutional Research in Non-Campus-Based Settings** Robert K. Toutkoushian, 2008 Expanding the understanding of the nature of institutional research, this volume documents alternative ways that it is currently being carried out beyond the confines of a traditional campus-based IR office. Chapters show how institutional research is being conducted by public university system offices, state higher education coordinating boards, institutional-affiliated research offices, and higher education consultants. Chapter topics discussed include: Developing a Statewide Student Tracking Tool The Role of Consultants in Institutional Research Collaborating on State-Level Institutional Research in New Hampshire: NH Paper Using College Board Data to Examine Trends in New Hampshire's College-Bound Students Virginia Improves Teaching and Learning (VITAL): A Comprehensive Statewide Data System for Teacher Quality Confronting Ambiguity, Anarchy, and Crisis in Institutional Research: Using Student Unit Record Databases in Extra-Institutional Research. Because these entities often do not have ready access to campus-specific data, they must be creative in finding ways to obtain data and information

that enable them to provide a value-added function in the field. The chapter authors highlight ways in which these offices acquire and use information for institutional research. This is the 139th volume of the Jossey-Bass quarterly report series New Directions for Institutional Research. Always timely and comprehensive, New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation, and institutional management.

**Burden or Benefit: External Data Reporting** Kristina Powers, Angela E. Henderson, 2016-01-20 Blazing new trails in the area of reporting and transparency? Required and voluntary reporting of student data to external agencies has increased in volume, quantity, and complexity, and understanding the scope of reporting requirements and the associated burden is critical to higher education practitioners. This volume focuses on new directions in institutional reporting--and the associated burden. The convergence of increased reporting coupled with the demand to be more efficient with resources in a saturated and competitive higher education market make this a timely and needed volume for higher education administrators. This is the 166th volume of this Jossey-Bass quarterly report series. Timely and comprehensive, New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation, and institutional management.

**Transformative Experiences in College** Neal Christopherson, 2020-11-24 Transformative Experiences in College: Connections and Community explores the intersection of two concepts: transformative experience in college and the communities in which students learn. Emerging from a five-year longitudinal interview study tracking a panel of 75 students through four years at a selective liberal arts college, this book provides a rich depiction of how aspects of the college community (and the relationships developed within that community) create opportunities for transformative experiences that lead to personal and academic growth. Neal Christopherson argues that transformative experiences in college are primarily the results of interactions with other people and with a broader campus community, documenting the ways in which relationships with faculty, experiences in courses, interaction with peers, and the general institutional environment can generate these experiences. Christopherson also touches on extracurricular and co-curricular activities, the importance of a healthy environment for interacting with difference, and how students transition out of the institution. Scholars of education, sociology, and communication will find this book particularly useful.

Institutional Research Dawn G. Terkla, 2008 The modern incarnation of institutional research has at its disposal an array of statistical, psychological, sociological and general analytical tools. This volume presents a rich group of informative

examples and perspectives to help administrators realize the fullest potential of institutional research and understand all the roles it can play. Institutional research is a facet of administration too little known and too often underappreciated. It appears in many guises, from a small, unnamed group in a college development office to a collection of professional branches dispersed across a huge research university. As an in-house resource, it offers unparalleled opportunities for other administrative branches to probe and analyze nearly every aspect of an institution: student learning outcomes faculty teaching and workload broad measures of efficiency and performance. Institutional research can also play a pivotal role in accreditation's self-study process, lay the foundation for benchmarking against peer institutions, and inform both ends of a strategic plan by supplying the data that make a plan realistic and concrete and following up to measure progress. It is also the source for information demanded by institutions external to the university or college: public and private, nonprofit and for-profit. This is the 141st volume of the Jossey-Bass higher education report *New Directions for Higher Education*. Addressed to presidents, vice presidents, deans, and other higher education decision makers on all kinds of campuses, *New Directions for Higher Education* provides timely information and authoritative advice about major issues and administrative problems confronting every institution.

**Institutional Research Initiatives in Higher Education** Nicolas A. Valcik, Jeffrey Alan Johnson, 2017-11-06  
American higher education faces a challenging environment. Decreasing state appropriations, rising costs, and tightening budgets have left American colleges and universities scrambling to achieve their missions with ever more limited resources. Campus leaders have therefore increasingly relied upon institutional research and strategic planning departments to make transparent and rational decisions and to promote good stewardship of critical but finite resources. Institutional Research

Initiatives in Higher Education illustrates the wealth of institutional research activities occurring in American higher education. Featuring chapters by a prominent mix of authors representing community colleges, traditional undergraduate institutions, land grant institutions, research and flagship universities, and state agencies, this book provides numerous insights into the contemporary challenges, innovative programs, and best practices in institutional research. With contributors from a variety of regions and types of institutions, each chapter provides rigorous analysis of campus-based research activities in areas such as strategic planning, admissions and enrollment management, assessment and compliance, and financial planning and budgeting. Like the departments it studies, Institutional Research Initiatives in Higher Education is an invaluable resource for university administrators, researchers, and policymakers alike.

**The Harmon and Harriet Kelley Collection of African American Art** Harmon Kelley, Douglas K. S. Hyland, Gilbert Coker, Corrine Jennings, San Antonio Museum of Art, 1994 . . . this collection has a narrative and descriptive thrust that is centered on the social and economic history of African Americans in the United States and presents a kaleidoscopic view of Black life and cultural history. The insistent integrity of the works included reflects a deep understanding of African American social values and celebrates with pride both a humble and a noble existence. -- Corrine Jennings African American art is reaching a wider audience today than ever before, as major exhibitions tour museums around the country. Inspired by the exhibit Hidden Heritage: Afro-American Art, 1800-1950, Harmon and Harriet Kelley began collecting African American art in 1987 and have amassed a collection that represents a broad range of genres and artists from the nineteenth and twentieth centuries. Profusely illustrated with color and black-and-white plates, this catalog accompanies a traveling exhibition of the Kelley collection, comprised of 124 works by 70 artists, including Edward M. Bannister, Elizabeth Catlett, William H. Johnson, Emma Lee Moss, Charles E. Porter, Henry O. Tanner, and Dox Thrash. Essays on Nineteenth-Century African American Art, Twentieth-Century Artists, and American Art and the Black Folk Artist build an illuminating context for the works, restoring them to their rightful places in the history of American art.
