Cyber Enigma E. Dilipraj, 2019-06-04 Cyber and its related technologies such as the Internet was introduced to the world only in late 1980s, and today it is unimaginable to think of a life without it. Despite being ubiquitous, cyber technology is still seen as an enigma by many, mainly due to its rapid development and the high level of science involved. In addition to the existing complexities of the technology, the level of threat matrix surrounding the cyber domain further leads to various misconceptions and exaggerations. Cyber technology is the future, thus forcing us to understand this complex domain to survive and evolve as technological beings. To understand the enigma, the book analyzes and disentangles the issues related to cyber technology. The author unravels the threats that terrorize the cyber world and aims to decrypt its domain. It also presents the existing reality of cyber environment in India and charts out a few recommendations for enhancing the country's cyber security architecture. Further, the book delves into detailed analysis of various issues like hacking, dark web, cyber enabled terrorism and covert cyber capabilities of countries like the US and China. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka

New Consumer Behavior Theories from Japan Akira Shimizu, 2021-04-20 This book focuses on a new type of inclusive consumer decision-making process model (CDM) related to new leading-edge consumers. There have been two main types of CDMs for consumer behavior: one is the stimulus-response model and the other is the information-processing model. The stimulus-response model is applicable when consumers buy low-involvement products, and the information-processing model applies for high-involvement products. Thus consumers' decision making depends on the involvement level for the products.

With the advent of the widespread use of the Internet, however, the situation has changed. Consumers whose information sensitivity is high (i.e., among leading-edge consumers) now use the Internet to search for information even for low-involvement products. The consumers' decision-making process depends therefore on their information sensitivity, not on the involvement level of the products. Also, these leading-edge consumers become in effect another type of media as they broaden their experience through the Internet. Under these circumstances, research about leading-edge consumers and the introduction of a new CDM is highly significant. This book gathers data about leading-edge consumers, analyzes these data, then proposes a new type of CDM called "circulation marketing". Following this model, not only the previous types of CDM, but also the new kind of CDM, including share behavior of leading-edge consumers, is explained.

James' TELEGRAPH THE DEADLIEST POWER.THE FIERCEST PASSION.THE CRUELLEST FATE. The #1 Sunday Times bestseller and sequel to the #1 New York Times bestseller. Sarah J. Maas's sexy, groundbreaking CRESCENT CITY series continues with this second instalment. Bryce Quinlan and Hunt Athalar have made a pact. As they process the events of the Spring they will keep things platonic until Winter Solstice. Dragged into a rebel movement they want no part of, Bryce, Hunt and their friends find themselves pitted against the terrifying Asteri - whose

notice they must avoid at all costs. But as they learn more about the rebel cause, they face a choice: stay silent while others are oppressed, or fight. And they've never been very good at staying silent. In this sexy, action-packed sequel to the #1 bestseller House of Earth and Blood, Sarah J. Maas weaves a captivating story of a world about to explode - and the people who will do anything to save it.
