**Non-credit Instruction** Lea Leever Oldham, 1995

**Managing Credit Programs in Continuing Higher Education** Joe F. Donaldson, 1990 In this discussion of managing continuing education credit programming units, three themes emerge. The first theme is that unit administrators must rely upon leverage, or influence, to coordinate programs effectively and to gain the institution's acceptance of policies and procedures that support the credit programming unit and the adult learners it serves. The second theme is the comprehensive nature of organizing and administering credit courses and programs. Administrators must simultaneously juggle needs assessment, budgeting, marketing, student recruitment and retention, program development, program coordination, faculty participation and development, budgeting and financing, various modes of course and program delivery, student support services, and course and program evaluation, while also attending to the demands and constraints imposed by external agencies and by the parent institution. The third theme is opportunity. Continuing education credit programming has reached a stage of maturity during the past decade. The potential for stimulation and personal and professional growth through such opportunities is boundless. Unit administrators must be willing to participate fully and proficiently in leading higher education into a new era of educational service to adults. (34 references) (CML)

Continuing Education in Colleges and Universities: Challenges and Opportunities Ronald White, Frank

DiSilvestro, 2013-12-31 These are times of great opportunity and challenge for continuing education (CE) programs in colleges and universities. While lifelong learning remains central to CE's mission, means of promoting and delivering adult education programs through distance and online learning are undergoing tremendous technological transformation. Within institutions, CE units are increasingly collaborating with academic departments. In addition, demographic shifts have resulted in new audiences and types of programs offered, both credit and noncredit. Schools are pressured to increase their participation in economic development. All these changes carry administrative considerations. This volume suggests perspective and solutions for the challenges that must be successfully confronted by today's CE programs and the professionals who develop them. This is the 140th volume of this Jossey-Bass series. Noted for its depth of coverage, it explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of adult and continuing education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

**Redesigning Continuing Education in the Health Professions** Institute of Medicine,Board on Health Care Services,Committee on Planning a Continuing Health Care Professional Education Institute,2010-02-12 Today in the United States, the professional health workforce is not consistently prepared to provide high quality health care and assure patient safety, even as the nation spends more per capita on health care than any other country. The absence of a comprehensive and well-integrated system of continuing education (CE) in the health professions is an important contributing factor to knowledge and performance deficiencies at the individual and system levels. To be most effective, health professionals at every stage of their careers must continue learning about advances in research and treatment in their fields (and related fields) in order to obtain and maintain up-to-date knowledge and skills in caring for their patients. Many health professionals regularly undertake a variety of efforts to stay up to date, but on a larger scale, the nation's approach to CE for health

professionals fails to support the professions in their efforts to achieve and maintain proficiency. *Redesigning Continuing Education in the Health Professions* illustrates a vision for a better system through a comprehensive approach of continuing professional development, and posits a framework upon which to develop a new, more effective system. The book also offers principles to guide the creation of a national continuing education institute.

**Persuading with Data** Miro Kazakoff,2022-03-29 An integrated introduction to data visualization, strategic communication, and delivery best practices. *Persuading with Data* provides an integrated instructional guide to data visualization, strategic communication, and delivery best practices. Most books on data visualization focus on creating good graphs. This is the first book that combines both explanatory visualization and communication strategy, showing how to use visuals to create effective communications that convince an audience to accept and act on the data. In four parts that proceed from micro to macro, the book explains how our brains make sense of graphs; how to design effective graphs and slides that support your ideas; how to organize those ideas into a compelling presentation; and how to deliver and defend data to an audience. *Persuading with Data* is for anyone who has to explain analytical results to others. It synthesizes a wide range of skills needed by modern data professionals, providing a complete toolkit for creating effective business communications. Readers will learn how to simplify in order to amplify, how to communicate data analysis, how to prepare for audience resistance, and much more. The book integrates practitioner and academic perspectives with real-world examples from a variety of industries, organizations, and disciplines. It is accessible to a wide range of readers—from undergraduates to mid-career and executive-level professionals—and has been tested in settings that include academic classes and workplace training sessions.

Foundations of Adult and Continuing Education Travis Collins,2023-09-19 Adult education refers to an education system wherein adults are involved in sustained and systematic self-educating activities for obtaining new forms of values, knowledge, attitudes and skills. It can encompass any kind of learning taken up by adults after the conventional schooling, which comprises fundamental literacy to ensure personal fulfillment of an individual. Adult education is taken voluntarily and

the participants are self-motivated to complete the learning. Continuing education is a form of adult education, which consists of post-secondary learning programs and activities. These include college remediation, non-degree career training, degree credit courses taken up by non-traditional students, formal workforce training, and personal enrichment courses. This book provides comprehensive insights on the foundations of adult and continuing education. Coherent flow of topics, student-friendly language, and extensive use of examples make this book an invaluable source of knowledge.
