Joseph Hamburg

Allied Health Services Institute of Medicine, Committee to Study the Role of Allied Health Personnel, 1989-02-01 With estimates of their numbers ranging from one million to almost four million people, allied health care personnel make up a large part of the health care work force. Yet, they are among the least studied elements of our health care system. This book describes the forces that drive the demand for and the supply of allied health practitioners—forces that include demographic change, health care financing policies, and career choices available to women. Exploring such areas as credentialing systems and the employment market, the study offers a broad range of recommendations for action in both the public and private sectors, so that enough trained people will be in the right place at the right time.

Review of Allied Health Education: 1 Joseph Hamburg, 2015-01-13 Allied health education has long lacked a common literature, as the activities of all these diverse disciplines have been reported only in the specialty journals of each. This review provides a locus for articles of a broad and general nature which the entire spectrum of allied health educators and students will find of vital interest. Some of the topics included in this first review include dental education, clinical laboratory work, radiologic technology, the physician's assistant, occupational therapy, and preventive health care. Additional reviews to be published on a regular basis will be devoted to other health disciplines and general health topics. Essays by Ruth M. French, Joseph Hamburg, John W. Hein, Dennis Robert Howard, Marceline E. Jaques, Jerry A. Johnson, David E. Lewis, Samuel P. Martin, Darrel J. Mase, Edmund Pellegrino, J. Warren Perry, A. Bradley Soule, and George Szasz Joseph Hamburg, general editor; J. Warren Perry & Darrel J. Mase, associate editors

Allied Health Workforce and Services Institute of Medicine, Board on Health Care Services, 2012-01-02 The demand for health care is growing as the nation ages and seeks to provide coverage for the millions of Americans who lack health insurance. At the same time, escalating costs have led to a variety of initiatives to make the delivery of health care more effective and efficient. The allied health workforce is critical to the success of these efforts. The IOM held a workshop May 9-10, 2011, to examine the current allied health care workforce and consider how it can contribute to improving health care access, quality, and effectiveness.

Review of Allied Health Education: 4 Joseph Hamburg, 2015-01-13 This book is the fourth in a series designed to provide a current appraisal of the developments in allied health education and research, through original articles contributed by recognized leaders in the health field. The Review of Allied Health Education speaks, through enlightened commentary, to help bind the health professions into a true alliance.

Advanced Practice in Nursing and the Allied Health Professions Paula McGee, 2009-06-01 Advanced Practice in Nursing and the Allied Health Professions enables nurses and members of allied health professions to effectively diagnose and treat patients, in a wide variety of settings. It is especially relevant in regions where access to other health providers is limited. This new, completely revised, third edition shows how advanced practice continues to develop in response to the impact of health service reforms, the introduction of health policies aimed at developing a patient-led service based in primary care and changes in working conditions. Advanced Practice in Nursing and the Allied Health Professions presents an examination of the potential for advanced practitioners, at all levels, to have a significant effect on the health of the population and provide holistic care for the sick. Practice is identified as the central and most important feature of the advanced role in nursing and allied health professions. Advanced Practice in Nursing and the Allied Health Professions also considers: The development of advanced practice in nursing and the allied health professions and the implications for future health and social care services; Challenging professional boundaries that hinder the provision of care and pioneering innovation within a diverse society; The relationship between health policy and service reforms, current and future advanced roles; International developments in advanced practice; Leadership, management in relation to advanced roles; The responsibilities of advanced practitioners in meeting health care needs in a diverse society; Educating advanced practitioners and tracking their career development; The future possibilities for advanced practice and an agenda for research.

HIPAA for Allied Health Careers Cynthia Newby, CPC, 2008-02-01 HIPAA for Allied Health Careers covers the concepts and knowledge allied health workers need to correctly handle patients' protected health information (PHI) and to comply with all HIPAA regulations, including: • Administrative Simplification • Privacy Rule • Security Rule • Transactions and Code Sets • Compliance to Avoid Fraud and Abuse. Major emphasis is placed on communication skills--written and oral—because they underpin HIPAA compliance in most careers. Such skills include handling requests for release of information (ROI) from patients, payers, and other clinicians; effective interviewing of patients to gather information, complete authorization forms, and explain procedures; and documenting data using tools such as electronic medical records. HIPAA for Allied Health Careers provides students with the must-know information on HIPAA compliance. Titles I (COBRA) and II (HIPAA) are covered. The HIPAA privacy, security, and e-transactions are taught in depth. The concluding chapter presents the recently-published final HIPAA enforcement rule, and also provides an overview of compliance guidelines for the various allied health career settings, such as hospital-, physician practice, and billing-service based careers. Throughout the chapters, students think through case scenarios that cover the types of situations in which allied health personnel will need to make the correct choices for protecting patient privacy under HIPAA.

Review of Allied Health Education: 5 Joseph Hamburg,2015-01-13 Ferment and change best describe the health care scene today. Any semblance of stability and controlled evolution in this important area is over for the foreseeable future. Unanticipated and sudden shifts in priorities have occurred because of society's concern with the excessive costs, limited access, and restrictive modes of delivery of care in this major industry. Volume 5 of this useful and popular series explores in depth a number of these contemporary issues and changes: geriatrics, prospective payment, rural health, health promotion, computerized education, accreditation, and curricular articulation. These original essays will be of interest and importance to all concerned with education in the health professions.
