Microfoundations of Institutions Patrick Haack, Jost Sieweke, Lauri Wessel, 2019-11-25 The notion of microfoundations has received growing interest in neo-institutional theory along with an interest in microfoundational research in disciplines such as strategic management and economics.

Confluence of Policy and Leadership in Academic Health Science Centers Steven A. Wartman, 2022-02-22 Academic Health Science Centers are complex organizations with three principal functions: the education of the next generation of health professionals; the conduct of biomedical and clinical research that leads to new treatments and approaches to disease; and the delivery of comprehensive and advanced patient care. This is the first comprehensive book that describes in detail the knowledge and skill base necessary to successfully lead these complex organizations. Written by the world's leading authorities it combines the science of leadership, organizational structure, financial and personnel management, public relations and communications, trainee and student policy, community relations, and globalization. This volume focuses on policy considerations that provide the foundation for AHSCs to thrive. While the legislation, challenges, and strategies will change over time, the need for strong policy to influence and guide organizational and individual behavior will not. AHSCs are complex organizations that must continue to evolve to face the multifactorial nature of health care problems. How they do so will depend to a great extent not only on having appropriate policies in place but also on their success in translating these policies into effective implementation. Andrew M. Ibrahim and M. Roy Wilson, in the Foreword

Encyclopedia of White-Collar and Corporate Crime Lawrence M. Salinger, 2013-06-14 Since the first edition of the Encyclopedia of White Collar and Corporate Crime was produced in 2004, the number and severity of these crimes have risen to the level of calamity, so much so that many experts attribute the near-Depression of 2008 to white-collar malfeasance,

namely crimes of greed and excess by bankers and financial institutions. Whether the perpetrators were prosecuted or not, white-collar and corporate crime came near to collapsing the U.S. economy. In the 7 years since the first edition was produced we have also seen the largest Ponzi scheme in history (Maddoff), an ecological disaster caused by British Petroleum and its subcontractors (Gulf Oil Spill), and U.S. Defense Department contractors operating like vigilantes in Iraq (Blackwater). White-collar criminals have been busy, and the Second Edition of this encyclopedia captures what has been going on in the news and behind the scenes with new articles and updates to past articles.

The Technology Management Handbook Richard C. Dorf, 1998-07-27 If you are not already in a management position, chances are you soon will be. According to the Bureau of Statistics, the fastest growing areas of employment for engineers are in engineering/science management. Transportation, Land Use, and Environmental Planning Elizabeth Deakin, 2019-10 *Transportation, Land Use, and Environmental Planning* examines the practices and policies linking transportation, land use and environmental planning needed to achieve a healthy environment, thriving economy, and more equitable and inclusive society. It assesses best practices for improving the performance of city and regional transportation systems, looking at such issues as public transit and non-motorized travel investments, mixed use and higher density urban development, radically transformed vehicles, and transportation systems. The book lays out the growing need for greater integration of transportation, land use, and environmental planning, looking closely at changing demographic needs, public health concerns, housing affordability, equity, and livability. In addition, strategies for achieving these desired outcomes are presented, including urban design and land use planning, regional and corridor-level transit plans, bike and pedestrian improvements, demand management strategies, and emerging technologies and services. The final part of the book examines implementation challenges, considering lessons from the US and around the globe at both local and regional levels. Introduces never-before-published research Offers best practices for transit, cycling, urban design and housing provision Assesses emerging developments, such as smart cities, new vehicle technologies, automated highways and transportation sharing Examines the institutional and political dimensions of sustainability planning at the urban and regional levels Utilizes case studies from around the world that show alternative ways forward

The Transformation of Academic Health Centers Steven Wartman, 2015-03-30 The Transformation of Academic Health Centers: The Institutional Challenge to Improve Health and Well-Being in Healthcare's Changing Landscape presents the direct knowledge and vision of accomplished academic leaders whose unique positions as managers of some of the most complex academic and business enterprises make them expert contributors. Users will find invaluable insights and leadership perspectives on healthcare, health professions education, and bio-medical and clinical research that systematically explores the evolving role of global academic health centers with an eye focused on the transformation necessary to be successful in challenging environments. The book is divided into five sections moving from the broad perspective of the role of academic health centers to the role of education, training, and disruptive technologies. It then addresses the discovery processes, improving funding models, and research efficiency. Subsequent sections address the coming changes in healthcare delivery and future perspectives, providing a complete picture of the needs of the growing and influential healthcare sector. Outlines strategies for academic health centers to successfully adapt to the global changes in healthcare and delivery Offers forward-thinking and compelling professional and personal assessments of the evolving role of academic health centers by recognized outstanding academic healthcare leaders Includes case studies and personal reflections, providing lessons learned and new recommendations to challenge leaders Provides discussions on the discovery process, improving funding models, and research efficiency

Library Education and Employer Expectations E. Dale Cluff, 1990 This unique new volume considers how well new librarians are being prepared for the profession. Here, in one easy-to-reference volume, are the valuable opinions, perspectives, and facts of those who influence library education, those who are responsible for it, and those who are the recipients of it. Intended for those who are considering entering the library profession, professors of library and information science, current students in library school, and for administrators of academic, school, public, and special libraries that

employ library school graduates, this comprehensive volume features chapters that are both candid and philosophical. In *Library Education and Employer Expectation*, the question of preparation is discussed from several perspectives by individuals representing various aspects of the library profession. Potential employers of those with library degrees spell out their expectations of potential employees, voice their views on how well library education is preparing those who choose to go into the profession, and give suggestions aimed to help library educators to better meet employer expectations. Persons representing academic, school, public, law, health science, and state libraries, as well as a major network and the archival profession are among the contributors. This volume also represents the library school perspective. Deans of a public and private library school explain present library education philosophy, tell of specific objectives of their schools, indicate the type of student they like to attract, spell out constraints under which they work, and indicate expectations they have of future employers of their graduates. Another important dimension presented is that of the recent graduate who has been on the job for a few years. These authors indicate why they decided to go into the profession, detail why they chose the library school they did, tell what they expected to get out of library school education, and spell out how well library school prepared them for the profession. Another perspective represented in *Library Education and Employer Expectations* is that of the accreditation body. A thorough coverage of the Committee on Accreditation's role in library education is given by the Chair of the committee. An issue very much associated with the topic of library education and employer expectations is that of the value of the ALA accredited degree. A recent study undertaken by a librarian reports on how Association of Research Libraries' directors value the ALA accredited degree for potential employees. Included in the study is a summary of what appears in job ads in the professional literature about ALA accredited degree requirements.

Algorithms from and for Nature and Life Berthold Lausen,Dirk Van den Poel,Alfred Ultsch,2013-08-28 This volume provides approaches and solutions to challenges occurring at the interface of research fields such as, e.g., data analysis, data mining and knowledge discovery, computer science, operations research, and statistics. In addition to theory-oriented contributions various application areas are included. Moreover, traditional classification research directions concerning network data, graphs, and social relationships as well as statistical musicology describe examples for current interest fields tackled by the authors. The book comprises a total of 55 selected papers presented at the Joint Conference of the German Classification Society (GfKl), the German Association for Pattern Recognition (DAGM), and the Symposium of the International Federation of Classification Societies (IFCS) in 2011.

The Reform of Health Care H. Dickinson,R. Mannion,2011-12-07 This book examines how healthcare organisations shape,

adapt and resist developments in healthcare policy and practice. This is an international text bringing together contributions from around the globe and covers a wide range of different discussions in relation to the policy/practice gap.

Service Breakthroughs James L. Heskett, 1990-09-17 What Do Citicorp, UPS and Marriott have in common? They are breakthrough service providers, firms that changed the rules of the game in their respective industries by consistently meeting or exceeding customer needs and expectations. To find out how these companies do it, service management experts James Heskett, Earl Sasser, and Christopher Hart put the question to the chief executive officers of fifteen of America's leading service firms attending a workshop at the Harvard Business School. Breakthrough leaders, they discovered, think very differently about their businesses than do their competitors, in distinct and well-defined ways. Now, in *Service Breakthroughs*, based upon five years of exhaustive research in fourteen service industries, Heskett, Sasser, and Hart show exactly what enables one or two companies in each industry to constantly set new standards for quality and value that force competitors to adapt or fail. At the heart of breakthrough performance, the authors contend, is a sometimes intuitive but thorough understanding of the self-reinforcing service cycle that replaces traditional management of trade-offs. The cycle is a paradigm derived from the research results suggesting direct links between heightened customer satisfaction, increased customer retention, augmented sales and profit, improved quality and productivity, greater service value per unit of cost, improved satisfaction of service providers, increased employee retention, and further heightened customer satisfaction. With detailed examples and dramatic case studies of Mark Twain Bancshares, American Airlines, Florida Power & Light, Federal Express, McDonald's and many other companies, Heskett, Sasser, and Hart show how this self-reinforcing cycle of behavior differentiates breakthrough leaders from their merely good competitors. The authors describe how breakthrough managers develop counterintuitive, even contrarian, strategic service visions. These companies define their service concept in terms of results achieved for customers rather than services performed. They target market segments by focusing on psychographics - how customers think and behave -- instead of demographics. And instead of viewing a service delivery system as a facility where the service is produced and sold, breakthrough firms see it as an opportunity to enhance the quality of the service. These profound differences in thought and action have brought spectacular results. For managers who wish to set the pace in their service industries, *Service Breakthroughs* will be essential reading.

Challenging Perspectives on Organizational Change in Health Care Louise Fitzgerald, Aoife McDermott, 2017-04-21 This volume provides theory and research on organizational change and predominantly features the application of these ideas to the health care domain, broadly defined. It addresses enduring issues in advancing to an effective health care system. The aim of this book is to offer an accessible and readable text aimed at provoking thought and questioning, and aiding creativity. It proffers arguments and ideas which are firmly based in empirical data and evidence, so that the reader may make informed

personal evaluations. This book is designed to furnish a comprehensive theoretical basis for understanding organizational change in health care, as well as selected core issues of contemporary and future importance to the provision of effective care within sustainable systems. A series of coherent themes are addressed throughout the book from differing perspectives. However, every chapter has been written to stand alone and be read independently. Each offers resources relevant to its' focal topic, in the form of references, case studies and critique. Setting out a future research agenda, the book will be vital reading for organizational change researchers and practitioners in the healthcare industry.
