**Painleve Equations in the Differential Geometry of Surfaces** Alexander I. Bobenko TU Berlin,Ulrich Eitner,2003-07-01 This book brings together two different branches of mathematics: the theory of Painlevé and the theory of surfaces. Self-contained introductions to both these fields are presented. It is shown how some classical problems in surface theory can be solved using the modern theory of Painlevé equations. In particular, an essential part of the book is devoted to Bonnet surfaces, i.e. to surfaces possessing families of isometries preserving the mean curvature function. A global classification of Bonnet surfaces is given using both ingredients of the theory of Painlevé equations: the theory of isomonodromic deformation and the Painlevé property. The book is illustrated by plots of surfaces. It is intended to be used by mathematicians and graduate students interested in differential geometry and Painlevé equations. Researchers working in one of these areas can become familiar with another relevant branch of mathematics.

**Forms of Intersubjectivity** Beatrice Beebe,2020-09-15 With new discussions by Theodore Jacobs and Regina Pally Adult psychoanalysis has approached the study of intersubjectivity by concentrating primarily on the verbal dialogue, an explicit mode of communication. Infant research, on the other hand, focuses on nonverbal communication and implicit modes of action sequences, operating largely out of awareness, such as interactions of gaze, facial expression, and body rhythms. This book proposes that an integration of these two approaches is essential to a deeper understanding of the therapeutic action. The authors use a dyadic systems model of self- and interactive regulation as a lens for comparing diverse theories of intersubjectivity, both in adults and infants. Building on the definition of intersubjectivity in infancy as correspondence and matching of expressions, the authors offer an expanded view of the presymbolic origins of intersubjectivity. They address the place of interactive regulation, problems with the concept of matching, the roles of self-regulation and of difference, and the balance of self- and interactive regulation. An adult treatment of early trauma is described through detailed clinical case material illustrating both the verbal narrative and the implicit action dialogue operating largely outside of awareness. This book includes new discussions by Theodore Jacobs, arguing that nonverbal communication is vitally important to psychoanalysis, and by Regina Pally, arguing that aspects of this book have parallels in neuroscience.

**Peonies of the World** De-yuan Hong,De-Yuan Hong,2010 Hong De-Yuan's new monograph of the popular genus *Paeonia* is a comprehensive taxonomic revision, based on extensive field observations, population sampling, and examination of more than 5,000 specimens. Detailed species descriptions are enhanced by 78 line drawings and 39 maps. This is an essential reference for taxonomists, growers, breeders, and horticulturalists. --
