Immune Thrombocytopenic Purpura Charles S. Abrams, 2007

Heartaches and Miracles Greta Burroughs, Robert F. Deburgh, 2011-08-10 But I don't feel sick. Why do I have to stay here in the hospital? I stubbornly asked the emergency room doctor, and he replied in an exasperated voice, Because you are one sick chick. Your platelets are down to 2000. You are going upstairs to PCU and you are going to stay there until I say you can go home. I (Greta Burroughs) was diagnosed with an autoimmune disorder called ITP (Idiopathic or Immune Thrombocytopenia Purpura) in April 2005. At that time, I knew very little about platelets, CBC's, corticosteroids and other factors that would play a significant role in my well-being for the rest of my life. Since that time, I have researched autoimmune disorders and ITP and have spoken with a number people who also suffer from this chronic blood disease. I kept a journal describing my relapses, treatments, successes and failures and wrote up all this information so that I could share it with others who are also fighting this illness. Heartaches and Miracles is a combination biography, research information and pep talk for anyone suffering with ITP or for family members and friends who want to understand what this disease is all about. There are excerpts from other ITPers who have been on or are still on the never ending roller coaster ride of steroids, surgery and other types of medications and treatments. There are no cures for ITP or for any autoimmune disorder for that matter. The treatments and medications can have terrible side effects, but the disease can be controlled in most people. It can be a hard road filled with relapses and disappointments but with a positive attitude and support from friends and family, there is hope. Heartaches and Miracles was written as a form of chicken soup for the ITP soul to give encouragement and strength to those affected by this blood disorder. Reading how others have coped, hopefully will give those newly diagnosed a glimpse of what to expect and give everyone with ITP a new hope for tomorrow.

Immune Thrombocytopenia (ITP) Thomas R. Kühne,2022

My Purple Patch Anthony P Heard,2019-07-17 This book tells the story of my personal experience of living with the enigmatic, auto immune illness ITP (Immune Thrombocytopenia).In the following pages I will tell you my story, I will share with you my ITP experiences but I can't diagnose your illness, give you platelets or cure your ITP. Hopefully I can give you some comfort, point out some of the pitfalls that I fell into and offer you a few interesting observations about ITP along the way. I hope that recording my story will help other ITP sufferers and their families better understand the journey that we have all been sent on. There is no standard map or guide book to get us through our individual ITP expeditions. However, by telling my story I hope that it will be informative, occasionally amusing, often painful but certainly honest and definitely positive.

Fibrin Sealing in Surgical and Nonsurgical Fields Günther Schlag,H.-W. Waclawiczek,R. Daum,2012-12-06 These eight volumes, which developed out of the international congress Update and Future Trends in Fibrin Sealing in Surgical and Nonsurgical Fields held in November 1992, present the state of the art in fibrin sealing. Initially, fibrin sealant played an important role in surgery. During the past few years, it has been increasingly applied in nonsurgical applications and we can now say that it has become an integral component of medical treatment. The doubts which have been raised by nonusers about the efficacy of fibrin sealant are no longer valid. The correct indication and technique continue to be basic prerequisites for effective treatment. Even today - 20 years after fibrin sealant was first used - the three most prominent effects of fibrin sealant are still hemostasis, sealing of the wound, and support of wound healing. The problems posed by the transmission of viral infections have gained substantially in importance because of the potential transmission of AIDS via fibrin sealant. Fortunately, this is so unlikely today that it no longer represents a cause for concern, which does not mean, however, that research in this field can be discontinued.

Then one day your reality takes a dramatic turn. You get diagnosed with something that forces you to change your ENTIRE life. From living a normal everyday life, to having it flipped upside down. Mhorgan Stephens gives readers the details of how it feels living with the chronic blood disorder idiopathic thrombocytopenic purpura, known as ITP for short. This book will give readers a better understanding of the symptoms, the regular hospital visits, the treatments, the pain, and details of living with ITP everyday of your life. What the author wants readers to get most from this book is that no matter what you are faced with, know that you have to take control of your situation, and never let your situation take control of you, and you too will make it through. Like my brother Anthony Ray Allen II. Always said Remember that we're all pregnant with greatness and some of us are actually in labor. This simply means we're already headed down the right road but we have to keep pushing until greatness is birthed. Greatness doesn't mean that we won't fall short, or we won't have our flaws. It is being able to acknowledge your flaws and work to do something about them.
