*Assessing Progress on the Institute of Medicine Report The Future of Nursing* National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Committee for Assessing Progress on Implementing the Recommendations of the Institute of Medicine Report The Future of Nursing: Leading Change, Advancing Health, 2016-03-22  
Nurses make up the largest segment of the health care profession, with 3 million registered nurses in the United States. Nurses work in a wide variety of settings, including hospitals, public health centers, schools, and homes, and provide a continuum of services, including direct patient care, health promotion, patient education, and coordination of care. They serve in leadership roles, are researchers, and work to improve health care policy. As the health care system undergoes transformation due in part to the Affordable Care Act (ACA), the nursing profession is making a wide-reaching impact by providing and affecting quality, patient-centered, accessible, and affordable care. In 2010, the Institute of Medicine (IOM) released the report *The Future of Nursing: Leading Change, Advancing Health*, which made a series of recommendations pertaining to roles for nurses in the new health care landscape. This current report assesses progress made by the Robert Wood Johnson Foundation/AARP Future of Nursing: Campaign for Action and others in implementing the recommendations from the 2010 report and

identifies areas that should be emphasized over the next 5 years to make further progress toward these goals.

Edited by key members of the Quality and Safety Education for Nursing (QSEN) steering team, Quality and Safety in Nursing is divided into three sections. The second section defines each of the six QSEN competencies as well as providing teaching and clinical application strategies, resources and current references. The final section now features redesigned chapters on implementing quality and safety across settings. New to this edition includes: Instructional and practice approaches including narrative pedagogy and integrating the competencies in simulation A new chapter exploring the application of clinical learning and the critical nature of inter-professional teamwork A revised chapter on the mirror of education and practice to better understand teaching approaches This ground-breaking unique text addresses the challenges of preparing future nurses with the knowledge, skills, and attitudes (KSAs) necessary to continuously improve the health care system in which they practice.

Safe, effective, quality patient care is simply not achievable without a strong foundation in evidence-based practice, a reality this text makes apparent. Unique in its approach, the current edition combines research, quality improvement, and evidence-based practice together, illuminating core concepts and showing students how to do the research while establishing a foundation that will lead them to evidence-based practice. Measurable objectives, thoughtful applications of evidence-based practice, and quality improvement concepts all play a prominent role in this text, as knowledgeable researchers and academics explore core concepts alongside current research.
