The Master Adaptive Learner William Cutrer,Martin Pusic,Larry D Gruppen,Maya M. Hammoud,Sally A.

Santen,2019-09-29 Tomorrow's best physicians will be those who continually learn, adjust, and innovate as new information and best practices evolve, reflecting adaptive expertise in response to practice challenges. As the first volume in the American Medical Association's MedEd Innovation Series, The Master Adaptive Learner is an instructor-focused guide covering models for how to train and teach future clinicians who need to develop these adaptive skills and utilize them throughout their careers. Explains and clarifies the concept of a Master Adaptive Learner: a metacognitive approach to learning based on self-regulation that fosters the success and use of adaptive expertise in practice. Contains both theoretical and practical material for instructors and administrators, including guidance on how to implement a Master Adaptive Learner approach in today's institutions. Gives instructors the tools needed to empower students to become efficient and successful adaptive learners. Helps medical faculty and instructors address gaps in physician training and prepare new doctors to practice effectively in 21st century healthcare systems. One of the American Medical Association Change MedEd initiatives and innovations, written and edited by members of the ACE (Accelerating Change in Medical Education) Consortium - a unique, innovative collaborative that allows for the sharing and dissemination of groundbreaking ideas and projects.

World Report 2020 Human Rights Watch,2020-01-28 The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Sustainable Interdisciplinarity Giuseppe T. Cirella,Alessio Russo,2020-01-23 Sustainable interdisciplinarity focuses on human-nature relations and a multitude of contemporary overlapping research between society and the environment. A variety of disciplines have played a large part in better understanding sustainable development since its high-profile emergence approximately a quarter of a century ago. At present, the forefront of sustainability research is an array of methods, techniques, and growing knowledge base that considers past, present, and future pathways. Specific multidisciplinary concentrations within the scope of societal changes, urban landscape transformations, international environmental comparative studies, as well as key theories and dynamics relating to sustainable performance are explored. Specializations in complex sustainability issues address international governance arrangements, rules, and organizations—both public and private—within the scope of four themes: sustainability, human geography, environment, and interdisciplinary societal studies. This book contains eleven thoroughly refereed contributions concerning pressing issues that interlink sustainable interdisciplinarity with the presented themes in terms of the human-nature interface.

Logics of History William H. Sewell Jr.,2009-07-27 While social scientists and historians have been exchanging ideas for a long time, they have never developed a proper dialogue about social theory. William H. Sewell Jr. observes that on questions of theory the communication has been mostly one way: from social science to history. Logics of History argues that both history and the social sciences have something crucial to offer each other. While historians do not think of themselves as theorists, they know something social scientists do not: how to think about the temporalities of social life. On the other hand, while social scientists' treatments of temporality are usually clumsy, their theoretical sophistication and penchant for structural accounts of social life could offer much to historians. Renowned for his work at the crossroads of history, sociology, political science, and anthropology, Sewell argues that only by combining a more sophisticated understanding of historical time with a concern for larger theoretical questions can a satisfying social theory emerge. In Logics of History, he

reveals the shape such an engagement could take, some of the topics it could illuminate, and how it might affect both sides of the disciplinary divide.

Feedback in Higher and Professional Education David Boud, Elizabeth Molloy, 2013 Learners complain that they do not get enough feedback, and educators resent that although they put considerable time into generating feedback, students take little notice of it. Both parties agree that it is very important. *Feedback in Higher and Professional Education* explores what needs to be done to make feedback more effective. It examines the problem of feedback and suggests that there is a lack of clarity and shared meaning about what it is and what constitutes doing it well. It argues that new ways of thinking about feedback are needed. There has been considerable development in research on feedback in recent years, but surprisingly little awareness of what needs to be done to improve it and good ideas are not translated into action. The book provides a multi-disciplinary and international account of the role of feedback in higher and professional education. It challenges three conventional assumptions about feedback in learning: That feedback constitutes one-way flow of information from a knowledgeable person to a less knowledgeable person. That the job of feedback is complete with the imparting of performance-related information. That a generic model of best-practice feedback can be applied to all learners and all learning situations. It seeking a new approach to feedback, it proposes that it is necessary to recognise that learners need to be much more actively involved in seeking, generating and using feedback. Rather than it being something they are subjected to, it must be an activity that they drive.

Confucius and Cicero Andrea Balbo, Jaewon Ahn, 2019-12-16 This book explores the relationships between ancient Roman and Confucian thought, paying particular attention to their relevance for the contemporary world. More than 10 scholars from all around the world offer thereby a reference work for the comparative research between Roman (and early Greek) and Eastern thought, setting new trends in the panorama of Classical and Comparative Studies.

Last Child in the Woods Richard Louv, 2008-04-22 “The children and nature movement is fueled by this fundamental idea: the child in nature is an endangered species, and the health of children and the health of the Earth are inseparable.” —Richard Louv, from the new edition In his landmark work *Last Child in the Woods*, Richard Louv brought together cutting-edge studies that pointed to direct exposure to nature as essential for a child’s healthy physical and emotional development. Now this new edition updates the growing body of evidence linking the lack of nature in children’s lives and the rise in obesity, attention disorders, and depression. Louv’s message has galvanized an international back-to-nature campaign to “Leave No Child Inside.” His book will change the way you think about our future and the future of our children. “[The] national movement to ‘leave no child inside’ . . . has been the focus of Capitol Hill hearings, state legislative action, grass-roots projects, a U.S. Forest Service initiative to get more children into the woods and a national effort to promote a ‘green hour’ in each day. . . . The increased activism has been partly inspired by a best-selling book, *Last Child in the Woods*, and its

author, Richard Louv.” —The Washington Post “Last Child in the Woods, which describes a generation so plugged into electronic diversions that it has lost its connection to the natural world, is helping drive a movement quickly flourishing across the nation.” —The Nation’s Health “This book is an absolute must-read for parents.” —The Boston Globe Now includes A Field Guide with 100 Practical Actions We Can Take Discussion Points for Book Groups, Classrooms, and Communities Additional Notes by the Author New and Updated Research from the U.S. and Abroad

All Our Relations Winona LaDuke, 2017-01-15 How Native American history can guide us today: “Presents strong voices of old, old cultures bravely trying to make sense of an Earth in chaos.” —Whole Earth Written by a former Green Party vice-presidential candidate who was once listed among “America’s fifty most promising leaders under forty” by Time magazine, this thoughtful, in-depth account of Native struggles against environmental and cultural degradation features chapters on the Seminoles, the Anishinaabeg, the Innu, the Northern Cheyenne, and the Mohawks, among others. Filled with inspiring testimonies of struggles for survival, each page of this volume speaks forcefully for self-determination and community. “Moving and often beautiful prose.” —Ralph Nader “Thoroughly researched and convincingly written.” —Choice

Renewed Great Power Competition Ronald O'Rourke, 2019-08-22 World events in recent years have led observers, particularly since late 2013, to conclude that the international security environment in recent years has undergone a shift from the post-Cold War era that began in the late 1980s and early 1990s, also sometimes known as the unipolar moment (with the United States as the unipolar power), to a new and different situation that features, among other things, renewed great power competition with China and Russia and challenges by these two countries and others to elements of the U.S.-led international order that has operated since World War II. The shift to renewed great power competition has become a major factor in the debate over future U.S. defense spending levels, and has led to new or renewed emphasis on the following in discussions of U.S. defense strategy, plans, and programs: * grand strategy and geopolitics as part of the context for discussing U.S. defense budgets, plans, and programs; * nuclear weapons and nuclear deterrence; * new U.S. military service operational concepts; * U.S. and NATO military capabilities in Europe; * capabilities for conducting so-called high-end conventional warfare (i.e., largescale, high-intensity, technologically sophisticated warfare) against countries such as China and Russia; * maintaining U.S. technological superiority in conventional weapons; * speed of weapon system development and deployment as a measure of merit in defense acquisition policy; * mobilization capabilities for an extended-length large-scale conflict against an adversary such as China or Russia; * minimizing reliance in U.S. military systems on components and materials from Russia and China; and * capabilities for countering so-called hybrid warfare and gray-zone tactics employed by countries such as Russia and China.

Systematic Reviews in the Social Sciences Mark Petticrew, Helen Roberts, 2008-04-15 Such diverse thinkers as Lao-Tze, Confucius, and U.S. Defense Secretary Donald Rumsfeld have all pointed out that we need to be able to tell the difference

between real and assumed knowledge. The systematic review is a scientific tool that can help with this difficult task. It can help, for example, with appraising, summarising, and communicating the results and implications of otherwise unmanageable quantities of data. This book, written by two highly-respected social scientists, provides an overview of systematic literature review methods: Outlining the rationale and methods of systematic reviews; Giving worked examples from social science and other fields; Applying the practice to all social science disciplines; It requires no previous knowledge, but takes the reader through the process stage by stage; Drawing on examples from such diverse fields as psychology, criminology, education, transport, social welfare, public health, and housing and urban policy, among others. Including detailed sections on assessing the quality of both quantitative, and qualitative research; searching for evidence in the social sciences; meta-analytic and other methods of evidence synthesis; publication bias; heterogeneity; and approaches to dissemination.

Chinese Cyberspaces Jens Damm, Simona Thomas, 2006-02-08 The internet is developing more extensively in China than any other country in the world. Chinese Cyberspaces provides multidisciplinary perspectives on recent developments and the consequences of internet expansion in China. Including first-hand research and case studies, the contributors examine the social, political, cultural and economic impact of the internet in China. The book investigates the political implications of China's internet development as well as the effect on China's information policy and overall political stability. The contributors show how although the digital divide has developed along typical lines of gender, urban versus rural, and income, it has also been greatly influenced by the Communist Party's attempts to exert efficient control. This topical and interesting text gives a compelling overview of the current situation regarding the Chinese internet development in China, while clearly signalling potential future trends.

Principles of Coding and Reimbursement for Surgeons Mark Savarise, Christopher Senkowski, 2016-12-30 This text provides the in-depth understanding of the mechanisms that guide coding and reimbursement. The text is meant to be useful to surgeons in practice, both in general surgery and in surgical subspecialties; practice management teams of surgical practices and to resident physicians in surgery. Part 1 of the text addresses the CPT coding process, the relative valuation system (RVU), the ICD-9 and ICD-10 systems of classification, Medicare Part B payment rules for physicians, the DRG system and Medicare Part A payment for hospitals, alternative payment models, and the myriad of quality measures of importance to surgeons. Part 2 of the text addresses specific coding in areas where surgeons historically have had the most difficulty. This is not meant to substitute for the available texts, software or courses on coding, but to provide the historical background and rationale for the specific coding rules. Principles of Coding and Reimbursement for Surgeons will be of great value to general surgeons and surgical subspecialists in private practice, academic institutions, and employed positions. It will provide direction to management teams from practice and institutional levels. It is also of use to surgical trainees and to researchers in health policy issues.
