The Master Adaptive Learner William Cutrer,Martin Pusic,Larry D Gruppen,Maya M. Hammoud,Sally A. Santen,2019-09-29 Tomorrow's best physicians will be those who continually learn, adjust, and innovate as new information and best practices evolve, reflecting adaptive expertise in response to practice challenges. As the first volume in the American Medical Association's MedEd Innovation Series, The Master Adaptive Learner is an instructor-focused guide covering models for how to train and teach future clinicians who need to develop these adaptive skills and utilize them throughout their careers. Explains and clarifies the concept of a Master Adaptive Learner: a metacognitive approach to learning based on self-regulation that fosters the success and use of adaptive expertise in practice. Contains both theoretical and practical material for instructors and administrators, including guidance on how to implement a Master Adaptive Learner approach in today's institutions. Gives instructors the tools needed to empower students to become efficient and successful adaptive learners. Helps medical faculty and instructors address gaps in physician training and prepare new doctors to practice effectively in 21st century healthcare systems. One of the American Medical Association Change MedEd initiatives and innovations, written and edited by members of the ACE (Accelerating Change in Medical Education) Consortium - a unique, innovative collaborative that allows for the sharing and dissemination of groundbreaking ideas and projects.

The Colored Conventions Movement P. Gabrielle Foreman,Jim Casey,Sarah Lynn Patterson,2021-03-22 This volume of essays is the first to focus on the Colored Conventions movement, the nineteenth century's longest campaign for Black civil rights. Well before the founding of the NAACP and other twentieth-century pillars of the civil rights movement, tens of thousands of Black leaders organized state and national conventions across North America. Over seven decades, they advocated for social justice and against slavery, protesting state-sanctioned and mob violence while demanding voting, legal,

labor, and educational rights. Collectively, these essays highlight the vital role of the Colored Conventions in the lives of thousands of early organizers, including many of the most famous writers, ministers, politicians, and entrepreneurs in the long history of Black activism--

Feedback in Higher and Professional Education David Boud,Elizabeth Molloy,2013 Learners complain that they do not get enough feedback, and educators resent that although they put considerable time into generating feedback, students take little notice of it. Both parties agree that it is very important. Feedback in Higher and Professional Education explores what needs to be done to make feedback more effective. It examines the problem of feedback and suggests that there is a lack of clarity and shared meaning about what it is and what constitutes doing it well. It argues that new ways of thinking about feedback are needed. There has been considerable development in research on feedback in recent years, but surprisingly little awareness of what needs to be done to improve it and good ideas are not translated into action. The book provides a multi-disciplinary and international account of the role of feedback in higher and professional education. It challenges three conventional assumptions about feedback in learning: That feedback constitutes one-way flow of information from a knowledgeable person to a less knowledgeable person. That the job of feedback is complete with the imparting of

performance-related information. That a generic model of best-practice feedback can be applied to all learners and all learning situations. It seeking a new approach to feedback, it proposes that it is necessary to recognise that learners need to be much more actively involved in seeking, generating and using feedback. Rather than it being something they are subjected to, it must be an activity that they drive.

Systematic Reviews in the Social Sciences Mark Petticrew,Helen Roberts,2008-04-15 Such diverse thinkers as Lao-Tze, Confucius, and U.S. Defense Secretary Donald Rumsfeld have all pointed out that we need to be able to tell the difference between real and assumed knowledge. The systematic review is a scientific tool that can help with this difficult task. It can help, for example, with appraising, summarising, and communicating the results and implications of otherwise unmanageable quantities of data. This book, written by two highly-respected social scientists, provides an overview of systematic literature review methods: Outlining the rationale and methods of systematic reviews; Giving worked examples from social science and other fields; Applying the practice to all social science disciplines; It requires no previous knowledge, but takes the reader through the process stage by stage; Drawing on examples from such diverse fields as psychology, criminology, education, transport, social welfare, public health, and housing and urban policy, among others. Including detailed sections on assessing the quality of both quantitative, and qualitative research; searching for evidence in the social sciences; meta-analytic and other methods of evidence synthesis; publication bias; heterogeneity; and approaches to dissemination.
