The Most Dangerous Game Richard Connell, 2023-02-23 Sanger Rainsford is a big-game hunter, who finds himself washed up on an island owned by the eccentric General Zaroff. Zaroff, a big-game hunter himself, has heard of Rainsford's abilities with a gun and organises a hunt. However, they're not after animals - they're after people. When he protests, Rainsford the hunter becomes Rainsford the hunted. Sharing similarities with The Hunger Games, starring Jennifer Lawrence, this is the story that created the template for pitting man against man. Born in New York, Richard Connell (1893 - 1949) went on to become an acclaimed author, screenwriter, and journalist. He is best remembered for the gripping novel The Most Dangerous Game and for receiving an Oscar nomination for the screenplay Meet John Doe.

Fundamentals of Physics David Halliday, Oriel Incorporated, 2001-07-05 The publication of the first edition of Physics in 1960 launched the modern era of physics textbooks. It was a new paradigm then and, after 40 years, it continues to be the dominant model for all texts. The big change in the market has been a shift to a lower level, more accessible version of the model. Fundamentals of Physics is a good example of this shift. In spite of this change, there continues to be a demand for the original version and, indeed, we are seeing a renewed interest in Physics as demographic changes have led to greater numbers of well-prepared students entering university. Physics is the only book available for academics looking to teach a more demanding course.

Hearts and Mines Tanner Mirrlees, 2016-01-15 The US security state is everywhere in cultural products: in army-supported news stories, TV shows, and video games; in CIA-influenced blockbusters and comics; and in State Department ads, broadcasts, and websites. Hearts and Mines examines the rise and reach of the US Empire's culture industry - a nexus between the US's security state and media firms and the source of cultural products that promote American strategic interests around the world. Building on Herbert I. Schiller's classic study of US Empire and communications, Tanner Mirrlees interrogates the symbiotic geopolitical and economic relationships between the US state and media firms that drive the production of imperial culture.

From Hindi to Urdu Tariq Rahman, 2018-02-10 This book is the first of its kind on the socio-political history of Urdu. It analyses the historiography of the language-narratives about its names, linguistic ancestry, place of birth-and relates it to the

politics of identity-construction among the Hindus and Muslims of India during the last two centuries. More importantly, a historical account of the use of Urdu in social domains such as employment, education, printing and publishing, radio, films and television etc. has been provided for the first time. These accounts are related to the expression of Hindu and Muslim identity-politics during the last two centuries. Evolution of Urdu from the language of the laity, both Hindus and Muslims, of the Indian subcontinent during the period between 15th-18th centuries to its standardization into two languages: Persianized Urdu and Sanskritized Hindi are highlighted here. The writer looks at narratives of the names, theories of genealogy and places of origin of the language in relation to the political imperatives of identity-politics of Hindus and Muslims during the nineteenth and twentieth centuries. In a nutshell, historiography is analyzed with reference to its political and ideological dimensions-and a fresh analysis regarding the linguistic history of Urdu is provided.
