WHO global air quality guidelines Weltgesundheitsorganisation, World Health Organization, 2021-09-07 The main objective of these updated global guidelines is to offer health-based air quality guideline levels, expressed as long-term or short-term concentrations for six key air pollutants: PM_{2.5}, PM₁₀, ozone, nitrogen dioxide, sulfur dioxide and carbon monoxide. In addition, the guidelines provide interim targets to guide reduction efforts of these pollutants, as well as good practice statements for the management of certain types of PM (i.e., black carbon/elemental carbon, ultrafine particles, particles originating from sand and duststorms). These guidelines are not legally binding standards; however, they provide WHO Member States with an evidence-informed tool, which they can use to inform legislation and policy. Ultimately, the goal of these guidelines is to help reduce levels of air pollutants in order to decrease the enormous health burden resulting from the exposure to air pollution worldwide.

Certified PM² Foundation by PM² GROUP Courseware Laurent Kummer, In this courseware, you will not only “learn the ropes” about a very efficient and light methodology, you will also be exposed to a positive philosophy of good project management practice, focused on delivering value to citizens, following sustainable principles and ethics. The material is articulated around three objectives: Giving you an overview of PM² in the context of general project management. Teaching you the fundamentals of PM² in preparation or the Foundation Certification exam. Helping you concretely manage projects by discussing general project management techniques and putting them in the context of PM². To this effect you will see that the various pages of this courseware have been coded accordingly. The reach of PM² on the European landscape has been exponential in the past few years since its original release to the public in 2016. The demand for an official syllabus from the European Commission to structure good qualitative certification has finally been answered, and the courseware you have in hand is the first to adhere strictly to this syllabus. Consequently, you have all the chances to pass the exam, get certified and be globally recognized as a PM² Project Manager.

Environmental Security and Environmental Management: The Role of Risk Assessment Benoit Morel,Igor Linkov,2007-05-22 The concept of “environmental security” has emerged as one basis for understanding international conflicts. This phrase can mean a variety of things. It can signify security issues stemming from environmental concerns or conflicting needs, or it can mean that the environment is treated as a resource for the long term, and the question is what should be done today to preserve the quality of the environment in the future. In the same way that energy security is about ensuring access to energy for the long run, it can also mean that pressing environmental concerns create a situation where different countries and communities are forced to collaboratively design a unified response, even if cooperation is not generally in the logic of their relations. Over the last several years, the authors of this book and their colleagues have tried to demonstrate the power of risk assessment and decision analysis as valuable tools that decision makers should use for a broad range of environmental problems, including environmental security. Risk analysis is almost more a state of mind or a way of looking at problems than it is a kind of algorithm or a set of recipes. It projects a kind of rationality on problems and forces a certain degree of quantitative rigor, as opposed to the all too common tendency of making environmental recommendations based on anecdotal evidence.

Pakistan at Seventy Shahid Javed Burki,Iftekhhar Ahmed Chowdhury,Asad Ejaz Butt,2019-06-07 This handbook examines Pakistan’s 70-year history from a number of different perspectives. When Pakistan was born, it did not have a capital, a functioning government or a central bank. The country lacked a skilled workforce. While the state was in the process of being established, eight million Muslim refugees arrived from India, who had to be absorbed into a population of 24 million people. However, within 15 years, Pakistan was the fastest growing and transforming economy in the developing

world, although the political evolution of the country during this period was not equally successful. Pakistan has vast agricultural and human resources, and its location promises trade, investment and other opportunities. Chapters in the volume, written by experts in the field, examine government and politics, economics, foreign policy and environmental issues, as well as social aspects of Pakistan's development, including the media, technology, gender and education. Shahid Javed Burki is an economist who has been a member of the faculty at Harvard University, USA, and Chief Economist, Planning and Development Department, Government of the Punjab. He has also served as Minister of Finance in the Government of Pakistan, and has written a number of books, and journal and newspaper articles. He joined the World Bank in 1974 as a senior economist and went on to serve in several senior positions. He was the (first) Director of the China Department (1987-94) and served as the Regional Vice-President for Latin America and the Caribbean during 1994-99. He is currently the Chair of the Board of Directors of the Shahid Javed Burki Institute of Public Policy at NetSol (BIPP) in Lahore. Iftexhar Ahmed Chowdhury is a career Bangladeshi diplomat and former Minister of Foreign Affairs in the Government of Bangladesh (2007-08). He has a PhD in international relations from the Australian National University, Canberra. He began his career as a member of the civil service of Pakistan in 1969. Dr Chowdhury has held senior diplomatic positions in the course of his career, including as Permanent Representative of Bangladesh to the United Nations in New York (2001-07) and in Geneva (1996-2001), and was ambassador to Qatar, Chile, Peru and the Vatican. He is currently a visiting senior research fellow at the Institute of South Asian Studies, National University of Singapore. Asad Ejaz Butt is the Director of the Burki Institute of Public Policy, Lahore, Pakistan.

Which Way to Livable and Productive Cities? Kirsten Hommann, Somik V. Lall, 2019-04-18 For African cities to grow economically as they have grown in size, they must create productive environments to attract investments, increase economic efficiency, and create livable environments that prevent urban costs from rising with increased population densification. What are the central obstacles that prevent African cities and towns from becoming sustainable engines of economic growth and prosperity? Among the most critical factors that limit the growth and livability of urban areas are land markets, investments in public infrastructure and assets, and the institutions to enable both. To unleash the potential of African cities and towns for delivering services and employment in a livable and environmentally friendly environment, a sequenced approach is needed to reform institutions and policies and to target infrastructure investments. This book lays out three foundations that need fixing to guide cities and towns throughout Sub-Saharan Africa on their way to productivity and livability.

Fiscal Policies for Development and Climate Action Miria A. Pigato, 2018-12-31 This report provides actionable advice on how to design and implement fiscal policies for both development and climate action. Building on more than two decades of research in development and environmental economics, it argues that well-designed environmental tax reforms are especially

valuable in developing countries, where they can reduce emissions, increase domestic revenues, and generate positive welfare effects such as cleaner water, safer roads, and improvements in human health. Moreover, these reforms need not harm competitiveness. New empirical evidence from Indonesia and Mexico suggests that under certain conditions, raising fuel prices can actually increase firm productivity. Finally, the report discusses the role of fiscal policy in strengthening resilience to climate change. It provides evidence that preventive public investments and measures to build fiscal buffers can help safeguard stability and growth in the face of rising climate risks. In this way, environmental tax reforms and climate risk-management strategies can lay the much-needed fiscal foundation for development and climate action.

Sustainable Development Report 2021 Jeffrey Sachs,Christian Kroll,Guillame Lafortune,Grayson Fuller,Finn Woelm,2021-10-14 The Sustainable Development Report 2021 features the SDG Index and Dashboards, the first and widely used tool to assess country performance on the UN Agenda 2030 and the Sustainable Development Goals. The report analyses and outlines what needs to happen for the Decade of Action and Delivery of the SDGs. In order to build back better following the Covid-19 pandemic, especially low-income countries will need increased fiscal space. The report frames the implementation of the SDGs in terms of six broad transformations. The authors examine country performance on the SDGs for 193 countries using a wide array of indicators, and calculate future trajectories, presenting a number of best practices to achieve the historic Agenda 2030. The views expressed in this report do not reflect the views of any organizations, agency or programme of the United Nations. This title is available as Open Access on Cambridge Core.

Shaping Urbanization for Children UNICEF,2019-01-03 This publication calls all urban stakeholders to invest in child-responsive urban planning, recognizing that cities are not only drivers of prosperity, but also of inequity. Through 10 Children's Rights and Urban Planning principles, the handbook presents concepts, evidence, tools and promising practices to create thriving and equitable cities where children live in healthy, safe, inclusive, green and prosperous communities. By focusing on children, it provides guidance on the central role that urban planning should play in achieving the Sustainable Development Goals, from a global perspective to a local context.

Towards a Climate-Neutral Europe Jos Delbeke,Peter Vis,2019-10-16 This book explains the EU's climate policies in an accessible way, to demonstrate the step-by-step approach that has been used to develop these policies, and the ways in which they have been tested and further improved in the light of experience. The latest changes to the legislation are fully

explained throughout. The chapters throughout this volume show that no single policy instrument can bring down greenhouse gas emissions. The challenge facing the EU, as for many countries that have made pledges under the Paris Agreement, is to put together a toolbox of policy instruments that is coherent, delivers emissions reductions, and is cost-effective. The book stands out by the fact it covers the EU's emissions trading system, the energy sector and other economic sectors, including their development in the context of international climate policy. This accessible book will be of great relevance to students, scholars and policy makers alike. Respiratory Health Effects of Airborne Hazards Exposures in the Southwest Asia Theater of Military Operations National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on the Respiratory Health Effects of Airborne Hazards Exposures in the Southwest Asia Theater of Military Operations, 2020-09-23 More than 3.7 million U.S. service members have participated in operations taking place in the Southwest Asia Theater of Military Operations since 1990. These operations include the 1990-1991 Persian Gulf War, a post-war stabilization period spanning 1992 through September 2001, and the campaigns undertaken in the wake of the September 11, 2001, attacks. Deployment to Iraq, Kuwait, Saudi Arabia, Bahrain, Gulf of Aden, Gulf of Oman, Oman, Qatar, the United Arab Emirates, and Afghanistan exposed service members to a number of airborne hazards, including oil-well fire smoke, emissions from open burn pits, dust and sand suspended in the air, and exhaust from diesel vehicles. The effects of these were compounded by stressors like excessive heat and noise that are inevitable attributes of service in a combat environment. *Respiratory Health Effects of Airborne Hazards Exposures in the Southwest Asia Theater of Military Operations* reviews the scientific evidence regarding respiratory health outcomes in veterans of the Southwest Asia conflicts and identifies research that could feasibly be conducted to address outstanding questions and generate answers, newly emerging technologies that could aid in these efforts, and organizations that the Veterans Administration might partner with to accomplish this work.
