Redesigning Continuing Education in the Health Professions Institute of Medicine, Board on Health Care Services, Committee on Planning a Continuing Health Care Professional Education Institute, 2010-02-12 Today in the United States, the professional health workforce is not consistently prepared to provide high quality health care and assure patient safety, even as the nation spends more per capita on health care than any other country. The absence of a comprehensive and well-integrated system of continuing education (CE) in the health professions is an important contributing factor to knowledge and performance deficiencies at the individual and system levels. To be most effective, health professionals at every stage of their careers must continue learning about advances in research and treatment in their fields (and related fields) in order to obtain and maintain up-to-date knowledge and skills in caring for their patients. Many health professionals regularly undertake a variety of efforts to stay up to date, but on a larger scale, the nation's approach to CE for health professionals fails to support the professions in their efforts to achieve and maintain proficiency. *Redesigning Continuing Education in the Health Professions* illustrates a vision for a better system through a comprehensive approach of continuing professional development, and posits a framework upon which to develop a new, more effective system. The book also offers principles to guide the creation of a national continuing education institute.

Internet Based Learning Deanie French, 1999 This book is for every teacher or trainer-- whose computer skills may be limited-- who wants to understand the Internet educationally, and use it in his or her courses. As institutional pressures mount to integrate the Internet into teaching, this book provides a framework and a hands-on introduction to what's involved, whether it's adapting materials and teaching styles for the Web, or designing a virtual course. This book provides: + an introduction to the key educational concepts needed to adapt teaching methods and materials to the medium of the Internet + an introduction to both basic and advanced Internet skills--from using e-mail to collaborative conferencing + a framework for harnessing the Internet to achieve educational goals, and successfully exploiting its resources, features and applications to promote effective learning The framework starts from the premise that teachers should progressively apply Internet technology as their skills and confidence develop. It develops the concept of augmented teaching styles--supplementing traditional teaching with Internet based options; demonstrates how to use modules as the building blocks for Web-based

learning; and shows how to use the Internet to deliver individualized learning, by enhancing personal communication between teacher and student, and addressing the diversity of learning styles. The book abounds with inspiring and thought-provoking examples of Internet course materials developed by a wide variety of teachers and trainers, including modules and forms created by the authors who have extensive experience in delivering Internet-based courses. A glossary of terms and directory of Internet sites and resources complete the book, which is also supported by a related Web site.

Sexuality and Aging Jennifer Hillman, 2012-03-27 Despite continuing ageist beliefs that sexuality is a privilege designed only for the young and physically healthy, research continues to indicate that the majority of older adults maintain interest in sexuality and may engage in fulfilling sexual behavior well into their last decade of life. Unfortunately, many professionals remain unaware of general knowledge of elderly sexuality, including the expected and normal physiological changes that can occur within the context of both male and female aging. The presence of chronic illness and other medical problems certainly can influence the expression of an aging adult's sexuality, and emergent research suggests that there are effective ways to

cope with menopause, heart disease, arthritis, incontinence, diabetes, sleep disorders, breast cancer, prostate cancer, and erectile dysfunction (ED), among others. Dramatic changes have taken place within the last decade alone in terms of non-surgical treatment for incontinence and ED, with forms of sex therapy, biofeedback, and PDE-5 inhibitors. Regrettably, many aging adults and their care providers remain unaware of their increased risk factors for STDs, including HIV infection via lack of knowledge, changes in the vaginal lining, and typical declines in immune function. Estimates suggest that by the year 2020, more than half of all individuals living with HIV will be over the age of 50. Although some high quality professional books are available for clinicians, they tend to be disjointed research bibliographies, edited volumes on a narrowly focused aspect of elderly sexuality, or texts that are more than 10 years old. With the extent of new information available regarding sexuality and aging, an up to date, empirically based text is necessary.
