Academic E-Books Suzanne M. Ward,Robert S. Freeman,Judith M. Nixon,2015-11-15 *Academic E-Books: Publishers, Librarians, and Users* provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

Both Hands Tied Jane L. Collins, Victoria Mayer, 2010-05-15 Both Hands Tied studies the working poor in the United States, focusing in particular on the relation between welfare and low-wage earnings among working mothers. Grounded in the experience of thirty-three women living in Milwaukee and Racine, Wisconsin, it tells the story of their struggle to balance child care and wage-earning in poorly paying and often state-funded jobs with inflexible schedules—and the moments when these jobs failed them and they turned to the state for additional aid. Jane L. Collins and Victoria Mayer here examine the situations of these women in light of the 1996 national Personal Responsibility and Work Opportunity Reconciliation Act and other like-minded reforms—laws that ended the entitlement to welfare for those in need and provided an incentive for them to return to work. Arguing that this reform came at a time of gendered change in the labor force and profound shifts in the responsibilities of family, firms, and the state, Both Hands Tied provides a stark but poignant portrait of how welfare reform

afflicted poor, single-parent families, ultimately eroding the participants' economic rights and affecting their ability to care for themselves and their children.

Academic Capitalism and the New Economy Sheila Slaughter,Gary Rhoades,2009-06-01 As colleges and universities become more entrepreneurial in a post-industrial economy, they focus on knowledge less as a public good than as a commodity to be capitalized on in profit-oriented activities. In *Academic Capitalism and the New Economy*, higher education scholars Sheila Slaughter and Gary Rhoades detail the aggressive engagement of U.S. higher education institutions in the knowledge-based economy and analyze the efforts of colleges and universities to develop, market, and sell research products, educational services, and consumer goods in the private marketplace. Slaughter and Rhoades track changes in policy and practice, revealing new social networks and circuits of knowledge creation and dissemination, as well as new organizational structures and expanded managerial capacity to link higher education institutions and markets. They depict an ascendant academic capitalist knowledge/learning regime expressed in faculty work, departmental activity, and administrative behavior. Clarifying the regime's internal contradictions, they note the public subsidies embedded in new revenue streams and the shift in emphasis from serving student customers to leveraging resources from them. Defining the terms of academic capitalism in the new economy, this groundbreaking study offers essential insights into the trajectory of American higher

education.

Environmental Management in Construction Heng Li, Zhen Chen, 2007-01-24 Demands on the construction industry are changing, and it is now virtually essential for environmental management to be considered at all stages of a project. Many construction managers are finding a quantitative approach useful, and this book outlines four quantitative methods which can be applied at different construction stages, and which fit within a comprehensive framework of dynamic Environmental Impact Assessment (EIA). These include: a method to quantitatively evaluate and reduce pollution and hazards levels a method to evaluate the environmental-consciousness of proposed construction plans a method to reduce on-site construction wastes through an incentive reward programme a method to promote C and D waste exchange in the local construction industry. With an experimental case study of the application of these methods, this book delivers a comprehensive review of environmental management issues in construction. With regulatory requirements potentially favouring the quantitative approach, this timely guide ensures that contractors will be able to keep pace with environmental management standards.

Education for Global Leadership Committee for Economic Development. Research and Policy Committee, Committee for Economic Development, 2006 To confront the twenty-first century challenges to our economy and national security, our education system must be strengthened to increase the foreign language skills and cultural awareness of our students. America's continued global leadership will depend on our students' abilities to interact with the world community both inside and outside our borders. This report warns that the U.S. will become less competitive in the global economy because of

declining quality foreign language education at the college and high school level. Additionally, the American public's deficiency in foreign languages and cultures is hampering efforts to counter terrorist threats. To have a citizenry that is knowledgeable of world regions, global issues, and foreign cultures, as well as conversant in other languages, we will need to strengthen the curriculum of the K-12 education system as well as that of our colleges, universities, and professional schools. Although there is much that can be done by states, governors, business leaders, and others, leadership by the Federal government will be crucial in jump-starting this effort. This report recommends (1) teaching international content across the curriculum and at all levels of learning to expand American students' knowledge of other countries and cultures; (2) expanding the training pipeline at every level of education to address the paucity of Americans fluent in foreign languages, especially critical, less-commonly taught languages, such as Arabic, Chinese, Hindi, Japanese, Korean, Persian/Farsi, Russian, and Turkish; and (3) national leaders--political leaders as well as the business and philanthropic communities and the media--should educate the public about the importance of improving education in languages other than English and in international studies. Appended are: (1) A Timeline of Important Developments in International Studies and Foreign Language Education; and (2) Major Federal Legislation Pertaining to International Studies and Foreign Language Education. (Contains 167 endnotes.) [This report represents a statement by the Research and Policy Committee of the Committee for Economic Development. For the Executive Summary of this report, see ED502295.].

Standardizing the World Francesco Duina, Crina Viju-Miljusevic, 2023-04-28 The EU has pursued many trade pacts across the world. This is part of its foreign policy: as the third largest economy in the world and lacking hard power, the EU relies on trade agreements to project its interests. These are often complex and far-reaching initiatives that have the potential to shape not only economic but also political and social life in the EU and its trading partners. In *Standardizing the World*, Francesco Duina and Crina Viju-Miljusevic have gathered a group of leading experts to present an unprecedented assessment of the EU's efforts to standardize a wide array of economic, political, and social aspects of life through its trade agreements across the globe. Drawing on economic sociology and constructivist strands in international political economy, the volume examines what is being standardized, the extent to which the EU has been able to project its worldviews, and what explains the observable patterns of standardization across policy areas and geographies. Ten leading scholars from across the world offer as many chapters on EU agreements with all major trading partners and cover efforts in social and labor rights, the environment, investments, rule of law and anti-corruption, agriculture and food quality, services, public procurement, sustainable development, and more. Their findings paint a picture of a dynamic EU capable of projecting its worldviews across the globe that is nonetheless not always consistent or successful. *Standardizing the World* provides a wide-ranging and rigorous understanding of standardization in trade agreement as well as the EU's abilities to project its power and worldviews across the globe.

Healthcare Technology Management - A Systematic Approach Francis Hegarty, John Amoores, Paul Blackett, Justin McCarthy, Richard Scott, 2017-01-06 *Healthcare Technology Management: A Systematic Approach* offers a comprehensive description of a method for providing safe and cost effective healthcare technology management (HTM). The approach is directed to enhancing the value (benefit in relation to cost) of the medical equipment assets of healthcare organizations to best support patients, clinicians and other care providers, as well as financial stakeholders. The authors propose a management model based on interlinked strategic and operational quality cycles which, when fully realized, delivers a comprehensive and transparent methodology for implementing a HTM programme throughout a healthcare organization. The approach proposes that HTM extends beyond managing the technology in isolation to include advancing patient care through supporting the application of the technology. The book shows how to cost effectively manage medical equipment through its full life cycle, from acquisition through operational use to disposal, and to advance care, adding value to the medical equipment assets for the benefit of patients and stakeholders. This book will be of interest to practicing clinical engineers and to students and lecturers, and includes self-directed learning questions and case studies. Clinicians, Chief Executive Officers, Directors of Finance and other hospital managers with responsibility for the governance of medical equipment will

also find this book of interest and value. For more information about the book, please visit the website.

African Americans in Science [2 volumes] Charles W. Carey Jr., 2008-10-23 This encyclopedia provides the most complete treatment to date of the accomplishments of African American scientists—and the struggles of African Americans to find their place in the scientific community. This comprehensive reference work sheds new light on an aspect of African American life that is often overlooked. More than a summary of individuals and accomplishments, *African Americans in Science: An Encyclopedia of People and Progress* explores the entire experience of African Americans seeking a place in the scientific community—not just the triumphs but the frustrations, discriminations, and the efforts to support (and sometimes impede) African American scientists. *African Americans in Science* offers alphabetically organized entries in three areas: the contributions of African Americans in over 30 different fields of science and medicine, schools and organizations that played a role in the development of African American scientists, and additional topics related to African American scientists. No other reference offers such a complete and up-to-date portrait of the pivotal work of African Americans across the spectrum of scientific research and what it took to achieve it.

The Evolution of Pragmatic Markers in English Laurel J. Brinton, 2017-08-31 Based on a rich set of historical data, this book traces the development of pragmatic markers in English, from *hw't* in Old English and *whilom* in Middle English to *whatever* and *I'm just saying* in present-day English. Laurel J. Brinton carefully maps the syntactic origins and development of these forms, and critically examines postulated unilineal pathways, such as from adverb to conjunction to discourse marker, or from main clause to parenthetical. The book sets case studies within a larger examination of the development of pragmatic markers as instances of grammaticalization or pragmaticalization. The characteristics of pragmatic markers - as primarily oral, syntactically optional, sentence-external, grammatically indeterminate elements - are revised in the context of scholarship on pragmatic markers over the last thirty or more years.
