The Routledge Handbook on Extraterritorial Human Rights Obligations Mark Gibney, Gamze Erdem Türkelli, Markus Krajewski, Wouter Vandenhoele, 2021-12-24 The Routledge Handbook on Extraterritorial Human Rights Obligations brings international scholarship on transnational human rights obligations into a comprehensive and wide-ranging volume. Each chapter combines a thorough analysis of a particular issue area and provides a forward-looking perspective of how extraterritorial human rights obligations (ETOs) might come to be more fully recognized, outlining shortcomings but also best state practices. It builds insights gained from state practice to identify gaps in the literature and points to future avenues of inquiry. The Handbook is organized into seven thematic parts: conceptualization and theoretical foundations; enforcement; migration and refugee protection; financial assistance and sanctions; finance, investment and

trade; peace and security; and environment. Chapters summarize the cutting edge of current knowledge on key topics as leading experts critically reflect on ETOs, and, where appropriate, engage with the Maastricht Principles to critically evaluate their value 10 years after their adoption. The Routledge Handbook on Extraterritorial Human Rights Obligations is an authoritative and essential reference text for scholars and students of human rights and human rights law, and more broadly, of international law and international relations as well as to those working in international economic law, development studies, peace and conflict studies, environmental law and migration. The Handbook is an invaluable desk reference for researchers in a wide variety of fields, not only smart cities specialists but also by scientists and policy-makers in related disciplines that are deeply influenced by the emergence of intelligent cities. The handbook is also of interest to industry and business innovators.

The European Court of Human Rights Helmut P. Aust, Esra Demir-Gürsel, 2021-04-30 This insightful book considers how the European Court of Human Rights (ECHR) is faced with numerous challenges which emanate from authoritarian and populist tendencies arising across its member states. It argues that it is now time to reassess how the ECHR responds to such challenges to the protection of human rights in the light of its historical origins.

Struggles for recognition , Over the past decades, an increasingly influential Political Philosophy approach has been seen to defend issues relating to cultural injustices. The daily struggles arising from political agendas within different societies confirm this. This perspective can be summarised using the Hegelian expression “struggle for recognition”, and it is this expression that underpins the current position of minorities members and their defenders. This means that misrecognition, disrespect, and humiliation form the base of (cultural) injustices and must be avoided. Minorities are a fundamental part of democratic societies, but their rights have not always been respected. Inmigrants are currently the object of xenophobic campaigns. Some people, the European minority, face additional difficulties, which results in them

being key players in cases of indirect discrimination. The distribution of territorial power and the situation of national minorities have been causes of different political problems. “Who am I? Where do I belong?” are questions asking for identity. Some people argue these should be relevant issues when applying the criminal law, circle of moral incumbency to cover animals -non humans-, arguing that they of life that involves their survival as a whole. Those groups are faced with members and their defenders. This publication is part of the “New Challenges of Law” project. Capital City Samuel Stein, 2019-03-05 “This superbly succinct and incisive book couldn’t be more timely or urgent.” —Michael Sorkin, author of *All Over the Map* Our cities are changing. Around the world, more and more money is being invested in buildings and land. Real estate is now a \$217 trillion dollar industry, worth thirty-six times the value of all the gold ever mined. It forms sixty percent of global assets, and one of the most powerful people in the world—the president of the United States—made his name as a landlord and developer. Samuel Stein shows that this explosive transformation of urban life and politics has been driven not only by the tastes of wealthy newcomers, but by the state-driven process of urban planning. Planning agencies provide a unique window into the ways the state uses and is used by capital, and the means by which urban renovations are translated into rising real estate values and rising rents. *Capital City* explains the role of planners in the real estate state, as well as the remarkable power of planning to reclaim urban life.

Paramilitarism and the Assault on Democracy in Haiti Jeb Sprague, 2012-08-01 In this path-breaking book, Jeb Sprague investigates the dangerous world of right-wing paramilitarism in Haiti and its role in undermining the democratic aspirations of the Haitian people. Sprague focuses on the period beginning in 1990 with the rise of Haiti’s first democratically elected president, Jean-Bertrand Aristide, and the right-wing movements that succeeded in driving him from power. Over the ensuing two decades, paramilitary violence was largely directed against the poor and supporters of Aristide’s Lavalas movement, taking the lives of thousands of Haitians. Sprague seeks to understand how this occurred, and traces connections between paramilitaries and their elite financial and political backers, in Haiti but also in the United States and the Dominican Republic. The product of years of original research, this book draws on over fifty interviews—some of which placed the author in severe danger—and more than 11,000 documents secured through Freedom of Information Act (FOIA) requests. It makes a substantial contribution to our understanding of Haiti today, and is a vivid reminder of how democratic struggles in poor countries are often met with extreme violence organized at the behest of capital.

Decolonizing Trauma Work Renee Linklater, 2020-07-10T00:00:00Z In *Decolonizing Trauma Work*, Renee Linklater explores healing and wellness in Indigenous communities on Turtle Island. Drawing on a decolonizing approach, which puts the “soul wound” of colonialism at the centre, Linklater engages ten Indigenous health care practitioners in a dialogue regarding Indigenous notions of wellness and wholistic health, critiques of psychiatry and psychiatric diagnoses, and

Indigenous approaches to helping people through trauma, depression and experiences of parallel and multiple realities. Through stories and strategies that are grounded in Indigenous worldviews and embedded with cultural knowledge, Linklater offers purposeful and practical methods to help individuals and communities that have experienced trauma. *Decolonizing Trauma Work*, one of the first books of its kind, is a resource for education and training programs, health care practitioners, healing centres, clinical services and policy initiatives.

Silva, 2021-04-23 For its breadth and depth of research, this is an essential text for researchers and students of, sociology, law, criminology, and criminal justice. Handbook of Human Dignity in Europe Paolo Becchi, Klaus Mathis, 2019-05-08 This handbook provides a systematic overview of the legal concept and the meaning of human dignity for each European state and the European Union. For each of these 43 countries and the EU, it scrutinizes three main aspects: the constitution, legislation, and application of law (court rulings). The book addresses and presents answers to important questions relating to the concept of human dignity. These questions include the following: What is the meaning of human dignity? What is the legal status of the respective human dignity norms? Are human dignity norms of a programmatic nature, or do they establish an individual right which can be invoked before court? Is human dignity inviolable? The volume answers these questions from the perspectives of all European countries. As a reaction to the barbaric events during World War II, human dignity (dignitas) found its way into international law. Article 1 of the Universal Declaration of Human Rights (UDHR) states that “[a]ll human beings are born free and equal in dignity and rights.” The starting point for developing the concept on a national level was the codification of human dignity in article 1, paragraph 1 of the German Grundgesetz. Consequently, the concept of human dignity spread throughout Europe and, in the context of human rights, became a fundamental legal concept.

Colour? What colour? Sonntag, Albrecht, Ranc, David, 2015-11-27 The playing fields of football are built with the profound values of fair play, equality and mutual respect -- they sometimes also display unacceptable racist, xenophobic and intolerant views. To counter this challenge, UNESCO is acting across the board with all its partners. In 2009, the European Club Association signed, on behalf of its 144 members, a Declaration promoting the inclusion of anti-discrimination and anti-racism clauses in players' contracts. Since then, in multiple partnerships with football clubs including Barcelona and Malaga FC (Spain), Ruby Shenzhen (China), Al Hilal (Saudi Arabia) and recently with Juventus Football Club (Italy) -- UNESCO has placed emphasis on the role of clubs in propagating the essential messages of tolerance, respect and inclusion. This Report offers the first exhaustive overview of the challenge and proposes good practice that can be taken forward by clubs everywhere. -- foreword.

The Needed Balances in EU Criminal Law Chloé Brière, Anne Weyembergh, 2017-12-28 This important volume provides an up-to-date overview of the main questions currently discussed in the field of EU criminal law. It makes a stimulating addition to literature in the field, while offering its own distinctive features. It takes a four-part approach: firstly, it addresses issues of a constitutional nature, such as the EU competence in the field of criminal law, the importance of the principle of subsidiarity and the role played by the different EU institutions. Secondly, it looks at issues linked to the quest of the right balance between diversity and unity, and focuses in particular on the special relationship between approximation and mutual recognition. Thirdly, it focuses on the balance between security and freedom, or, in other words, between the shield and sword functions of EU criminal law. Special attention is given here to transatlantic cooperation, data protection, terrorism, the European Arrest Warrant and the European Investigation Order. Finally, it examines the importance of balanced relations between criminal justice actors.

Blocking Public Participation Byron Sheldrick, 2014-02-18 Strategic litigation against public participation (SLAPP) involves lawsuits brought by individuals, corporations, groups, or politicians to curtail political activism and expression. An increasingly large part of the political landscape in Canada, they are often launched against those protesting, boycotting, or participating in some form of political activism. A common feature of SLAPPs is that their intention is rarely to win the case or secure a remedy; rather, the suit is brought to create a chill on political expression. Blocking Public Participation examines the different types of litigation and causes of action that frequently form the basis of SLAPPs, and how these lawsuits transform political disputes into legal cases, thereby blocking political engagement. The resource imbalance between plaintiffs and defendants allows plaintiffs to tie up defendants in complex and costly legal processes. The book also examines the dangers SLAPPs pose to political expression and to the quality and integrity of our democratic political institutions. Finally, the book examines the need to regulate SLAPPs in Canada and assesses various regulatory proposals. In Canada, considerable attention has been paid to the “legalization of politics” and the impact on the Charter in diverting political activism into the judicial arena. SLAPPs, however, are an under-studied element of this process, and in their obstruction of political engagement through recourse to the courts they have profound implications for democratic practice.

Asset Recovery Handbook Jean-Pierre Brun, Anastasia Sotiropoulou, Larissa Gray, Clive Scott, 2021-02-08 Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace

and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.

Breaking the Mold Kendall D. Gott, 2006 Few lessons are as prevalent in military history as is the adage that tanks don't perform well in cities. The notion of deliberately committing tanks to urban combat is anathema to most. In *Breaking the Mold: Tanks in the Cities*, Ken Gott disproves that notion with a timely series of five case studies from World War II to the present war in Iraq. This is not a parochial or triumphant study. These cases demonstrate that tanks must do more than merely arrive on the battlefield to be successful in urban combat. From Aachen in 1944 to Fallujah in 2004, the absolute need for specialized training and the use of combined arms at the lowest tactical levels are two of the most salient lessons that emerge from this study. When properly employed, well-trained and well-supported units led by tanks are decisive in urban combat. The reverse also is true. Chechen rebels taught the Russian army and the world a brutal lesson in Grozny about what happens when armored units are poorly led, poorly trained, and cavalierly employed in a city. The case studies in this monograph are high-intensity battles in conflicts ranging from limited interventions to major combat operations. It would be wrong to use them to argue for the use of tanks in every urban situation. As the intensity of the operation decreases, the 2nd and 3rd order effects of using tanks in cities can begin to outweigh their utility. The damage to infrastructure caused by their sheer weight and size is just one example of what can make tanks unsuitable for every mission. Even during peace operations, however, the ability to employ tanks and other heavy armored vehicles can be crucial. *Breaking the Mold* provides an up-to-date analysis of the utility of tanks and heavy armored forces in urban combat. The U.S. Army will increasingly conduct combat operations in urban terrain, and it will be necessary to understand what it takes to employ tanks to achieve success in that battlefield environment.

The book discusses journalistic practices and ethnic media in the Global South, managerial and editorial strategies of ethnic media outlets, their content specifics, target audience, distribution channels, main challenges and trends of development in the digital age.

Fundamental Rights and Mutual Trust in the Area of Freedom, Security and Justice Ermioni Xanthopoulou, 2020-04-30 This book explores the relationship of mutual trust and fundamental rights in the Area of Freedom, Security and Justice (AFSJ) of the European Union and asks whether there is any role for proportionality. Mutual trust among Member States has long been presumed by the Court in a manner that mutual recognition was prioritised in regard to, but to the detriment of, the protection of fundamental rights. After thoroughly reviewing this relationship, this book offers a comprehensive framework of proportionality and explores its impact on the protection of fundamental rights in a mutual trust environment. It applies a theoretical and a normative framework of proportionality to two case studies (EU criminal and asylum law) by reference to several fundamental rights, enabling a carefully constructed analysis with useful parallels. The book argues that such analysis, based on proportionality, is not always desirable and helpful for the protection of fundamental rights in this area and thoroughly explores its impact on the protection of fundamental rights vis-à-vis mutual trust.

Women, Islam and International Law Ekaterina Yahyaoui Krivenko, 2009 Islam and womena (TM)s human rights entertain an uneasy relationship. Much has been written on the subject. This volume addresses it from a new perspective. It attempts to define some basis for constructive dialogue and interaction in the context of international law and, more precisely, in the context of participation of many Muslim States in the United Nations Convention on the Elimination of All Forms of Discrimination Against Women. Having discovered a constructive potential in both Islam and womena (TM)s human rights, the author concentrates on the role which international law should play in promoting dialogue and constructive interaction. This is done mainly through analysis of the regime of reservations and of the practice of reservations developed in the context of Muslim Statesa (TM) participation in the CEDAW. The basic thesis defended is the following: Islam as articulated in the practice of States and womena (TM)s human rights, as reflected in international instruments, are both results of human activity. Their analysis in this study reveals more commonalities than one might expect. International law should be more attentive to their voices and more innovative in using these commonalities in order to promote constructive dialogue between them and thus help to improve the situation of women suffering from discrimination and inequalities.

International Surrogacy Arrangements Katarina Trimmings, Paul Beaumont, 2013-05-17 This book addresses the pressing challenges presented by the proliferation of international surrogacy arrangements. The book is divided into three parts. Part 1 contains National Reports on domestic approaches to surrogacy from Argentina, Australia, Belgium, Brazil, China, Czech Republic, France, Germany, Greece, Guatemala, Hungary, India, Ireland, Israel, Mexico, Netherlands, New Zealand, Russia, South Africa, Spain, Ukraine, United Kingdom, United States and Venezuela. The reports are written by domestic specialists,

each demonstrating the difficult and urgent problems arising in many States as a result of international surrogacy arrangements. These National Reports not only provide the backdrop to the authors' proposed model regulation appearing in Part 3, but serve as a key resource for scrutinising the most worrying incompatibilities in national laws on surrogacy. Part 2 of the book contains two contributions that provide international perspectives on cross-border surrogacy such as the 'human rights' perspective. Part 3 contains a General Report, which consists of an analysis of the National Reports appearing in Part 1, together with a proposed model of regulation of international surrogacy arrangements at the international level written by the two co-editors, Paul Beaumont and Katarina Trimmings. The research undertaken by Katarina Trimmings and Paul Beaumont from 2010 to 2012 was funded by the Nuffield Foundation.
