Michel, PhD, LPC,2016-02-11 Goes beyond traditional “job hunt strategies” to provide innovative solutions targeted to specific populations This graduate text for courses in career counseling is distinguished by its emphasis on creative interventions tailored to the unique needs of diverse populations. With a focus on career as a cornerstone of personal identity, the book explores the specific meaning of careers within different cultures and examines the challenges faced by—and potential solutions for--individuals with diverse backgrounds and needs. It describes unique interventions that

allow counseling students to visualize and actualize career counseling with a wide range of clients and demonstrates techniques targeted to each population that can be put into practice immediately. The text provides demographic information regarding specific job-seeking groups including such “traditional” populations as college graduates and working parents, as well as groups that encounter special challenges such as stay-at-home parents returning to work, formerly incarcerated individuals, people with disabilities, teen mothers, African American, Hispanic and Asian males and females, older adults, LGBT individuals, and many others. Over fifty creative, innovative interventions that have been successfully applied help counselors to provide effective career development strategies with each population. Chapters include a vignette representing each population, group demographics, a history of career paths and obstacles, unique needs of the group, supports already in place, and specific career counseling assessment and interventions. The book also provides abundant resources for additional study. In addition to its value to career counselors, the text will also be useful to personal counselors who often deal with their client’s career issues during treatment. Key Features: Provides in-depth exploration of underserved populations who hold unique career development needs Includes innovative career counseling interventions that move beyond standard “job hunt strategies” or “resume preparation tips” Explores life stage concerns related to career development across multiple diverse identities Gives readers step-by-step details on implementing over 40 innovative career counseling techniques Presents case studies that provide clear examples of the application of relevant interventions

Career Counseling Larry Cochran,1997-04-08 While personality traits and talents may help to predict a predisposition to a career type, this method of analysis neglects the influences of human purpose, passion, and life history. In Career Counseling, author Larry Cochran fills the void by introducing the theory of narrative construction, a method of counseling that injects personal identity into career development in a practical way. Cochran demonstrates how literary models and constructivist methods can be used in career development to provide the essential subjective dimension that has been lacking in practical counseling. In addition, he provides the innovative materials that are necessary for making this process both efficient and effective. This volume will be widely used by scholars and professionals in the fields of career counseling, clinical/counseling psychology, social psychology, and management.

Career Development Across the Lifespan Grafton T. Eliason,Mark Lepore,Jeff L. Samide,John Patrick,2019-08-01 This second edition of Career Counseling Across the Lifespan: Community, School, Higher Education, and Beyond is the latest volume in the Issues in Career Development Series, edited by Drs. Grafton Eliason, Mark Lepore, Jeff Samide, and John

Patrick, from California University of Pennsylvania and Clarion University of Pennsylvania. The purpose of *Career Development Across the Lifespan* is to provide a broad and in-depth look at the field of career development as it applies to individuals involved in all areas of community counseling, school counseling, and higher education. The book will examine some of the field's major theories, themes, approaches, and newest models incorporating chapters from national and international career counseling experts. Specific emphasis is spent examining issues reflective of today's challenges in developing and maintaining a workforce that is diverse, flexible, and efficient. Readers will be provided with an action-based framework built on the best available research. This text book is truly the culmination of a decade's work, compiling comprehensive studies from four previous volumes and updating key concepts in career counseling with the most contemporary theories and innovations. We examine three primary domains of career counseling throughout all of the developmental stages of the lifespan: community, schools K-12, and higher education. We include a specific focus on career history and theories, to prepare students for both the counseling environment and for national exams leading to certification and licensure, such as the (NCE) National Counseling Exam. We also include cutting edge research on contemporary topics, including such areas as: military careers, life after the military, individuals with disabilities or special needs, career counseling in our current socio-economic environment, and current technologies such as virtual counseling. In addition, we have added case studies and key terms as study guides at the end of each chapter. We are fortunate to include many recognized experts in the field of career counseling. *Career Counseling Across the Lifespan: Community, School, Higher Education, and Beyond* is a comprehensive text, written to address the broad needs of career counselors, educators, and students today.
