**Crude Strategy** Charles L. Glaser, Rosemary A. Kelanic, 2016-08-12 Should the United States ask its military to guarantee the flow of oil from the Persian Gulf? If the US security commitment is in fact strategically sound, what posture should the military adopt to protect Persian Gulf oil? Charles L. Glaser and Rosemary A. Kelanic present a collection of new essays from a multidisciplinary team of political scientists, historians, and economists that provide answers to these questions.

Contributors delve into a range of vital economic and security issues: the economic costs of a petroleum supply disruption, whether or not an American withdrawal increases the chances of oil-related turmoil, the internal stability of Saudi Arabia, budgetary costs of the forward deployment of US forces, and the possibility of blunting the effects of disruptions with investment in alternative energy resources. The result is a series of bold arguments toward a much-needed revision of US policy toward the Persian Gulf during an era of profound change in oil markets and the balance of power in the Middle East.

**Modern Dog Parenting** Sarah Hodgson, 2016-09-06 You and your dog are a lot alike. By several behavioral measures, your dog's mental abilities are equivalent to those of a two to three and a half-year-old toddler. Dogs can learn up to 250 words, count from one to five and understand basic arithmetic. Your dog can imitate and understand your behavior and has a sense of fairness. Doesn't it make sense to treat these sensitive, intelligent creatures a bit more like children? Kids—and dogs—raised with kindness and respect grow up happy. And happy is good. Modern Dog Parenting will show readers that yes, you can love your dog and live with him, too. Dogs (and the people who love them) are tired of the school of dominant, top-dog training. They are looking for a new kind of pack leader: someone funny, enthusiastic, intuitive, approachable, and, above all, effective. And they've found her. Sarah Hodgson rejects dominance-based training and gets astonishing results with a blend of wit, compassion, energy, and proven skills. She communicates instructions clearly, directs behavior compassionately, and rewards success lavishly. Topics include: \*Understanding the signs your dog is giving you \*Having fun while learning manners \*How to fit your dog into your lifestyle \*How to communicate lovingly and effectively with your dog

Game theory has become increasingly popular among undergraduate as well as business school students. This text is the first to provide both a complete theoretical treatment of the subject and a variety of real-world applications, primarily in economics, but also in business, political science, and the law. An appendix presents a thorough discussion of single-agent decision theory, as well as the optimization and probability theory required for the course. Every chapter that introduces a new theoretical concept opens with examples and ends with a case study. Case studies include Global Warming and the Internet, Poison Pills, Treasury Bill Auctions, and Final Jeopardy. Each part of the book also contains several chapter-length applications including Bankruptcy Law, the NASDAQ market, OPEC, and the Commons problem.
