Violence and Society Larry Ray, 2012-08-14 In this compelling and timely book, Larry Ray offers a wide-ranging and integrated account of the many manifestations of violence in society. He examines violent behaviour and its meanings in contemporary culture and throughout history. Introducing the major theoretical debates, the book examines different levels of violence - interpersonal, institutional and collective - and different forms of violence - such as racist crime, homophobic crime and genocide. It provides readers with a succinct and comprehensive overview of its nature and effects, and the solutions and conflict resolutions involved in responses to violence. Interdisciplinary in its approach, the text draws on evidence from sociology, criminology, primate studies and archaeology to shed light on arguments about the social construction and innate nature of violence. Engaging, wide-reaching and authoritative, this is essential reading for students, academics and researchers in sociology, criminology, social psychology and cultural studies.

An introductory chapter orients the reader on the basic structure and function of immunoglobulins and their fragments while subsequent chapters outline the methodology to generate monoclonal antibodies using hybridoma technology and the general methods used to purify antibodies. Multiple chapters demonstrate how to creatively use the properties of the antibody to identify, localize and quantify target analytes to answer questions and resolve problems. The reader will learn how to use a variety of immunoassay strategies, reporters and detection systems that will undoubtedly facilitate their efforts to gain answers to their own questions. Written in the successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols and notes on troubleshooting and avoiding known pitfalls.
