Study Guide for the Therapeutic Recreation Specialist Certification Examination, 5th Ed. - Book/Flashcards Bundle NORMA J. FOLKERTH STUMBO (JEAN E.), Jean E. Folkerth, 2019-03-31 Compare our prices! The purpose of this study guide is to assist candidates in preparing for the NCTRC national certification examination for Certified Therapeutic Recreation Specialists. 850 flashcards (included in the bundle and separately) on the 6 topic areas of the test: Foundational knowledge; Assessment; Documentation; Implementation; Administration of TR; Advancement of the profession. We are excited to tell you that this fifth edition of the Study Guide for the Therapeutic Recreation Specialist Certification Examination has changed significantly from previous editions. This is largely due to two reasons: (a) the National Council for Therapeutic Recreation Certification (NCTRC) has recently updated the Job Analysis, which helps structure the content of the test, and (b) the computerized test has a newer format of a 150-item test. Therefore, we have restructured the Study Guide to align more closely with the most recent NCTRC exam content and format. In addition, we've added over 100 new items for a total of over 850 practice test items! The Study Guide offers over 250 random practice items, plus four practice exams, each with 150 items distributed across the job analysis that mirrors the national exam. In preparing this Study Guide, we had a twofold mission: (a) to provide information that helps candidates reduce test anxiety and maximize test performance and (b) to provide numerous sample questions, similar to those actually found on the exam, that will allow candidates to practice and

self-assess their own readiness for the test. For many individuals, the thought of taking a certification examination can be unsettling. We often hear statements such as I have never taken a comprehensive exam. There is so much information. How do I learn it all? This Study Guide will help you to identify areas where you need further study to help you ace your NCTRC certification examination!

Therapeutic Recreation Marcia Jean Carter, Glen E. Van Andel, 2019-06-17 For over 35 years, *Therapeutic Recreation: A Practical Approach* has provided an authoritative and engaging introduction to the field of therapeutic recreation. The Fifth Edition of Carter and Van Andel's well-regarded text extends this tradition of excellence, equipping a new generation of students with the theoretical foundations and practical methods they need to become successful practitioners. The authors present the fundamentals of recreational therapy practice from the perspective of a 21st-century health and human service profession: emphasizing evidenced-based practices and documented outcomes, supporting individual and community assets, promoting fiscal responsibility, and utilizing a strengths-based approach that focuses on an individual's capacities when developing a strategy to improve health status, quality of life, and functional abilities. Updates throughout reflect recent scholarship, revised standards and operational definitions, evidence-based literature to support interventions, and global health concerns. The critical component of documentation has been added to discussions of the APIE-D process, while chapters on neurodevelopmental disorders and behavioral and mental health issues incorporate the terminology and organization of the DSM-5. The latest edition also features expanded treatment of social issues and the adult-onset, chronic, and lifelong illnesses and disabilities associated with aging. This full-featured edition retains the student-oriented approach that makes it an ideal text for introductory courses. Illustrations, case studies, key terms, study questions, and practical exercises reinforce key concepts and offer opportunities to apply chapter content, while abundant field-based photographs illuminate the practice of recreational therapy.

Management Functions in Recreational Therapy David R. Austin, Bryan P. McCormick, Marieke Van Puymbroeck, 2016-07-01 This book provides students and practitioners with perspectives on the management of recreational therapy heretofore unavailable to them. Many of the management concepts apply to middle level managers, but the focus of the book is on first-line recreational therapy managers and the areas of management identified by the National Council on Therapeutic Recreation Certification (NCTRC). In-depth coverage is given to the five basic functions of management:

planning, organization, staffing, influencing, and controlling. In addition, chapters are provided on key concepts integral to the management of recreational therapy programs. Included are chapters on internship supervision, clinical supervision, volunteer management, and managing marketing. The final chapter, Issues and Concerns for Managers, is unique in that it contains areas of substantial importance to managers that have received little attention in the recreational therapy literature. The format for the book is readable and easy to follow. Each chapter lists objectives for the chapter, gives definitions of key terms used within the chapter, and ends with a conclusion or summary of the chapter.

Therapeutic Recreation Processes and Techniques, 8th Ed DAVID R. AUSTIN, 2018-08-02 An extensive and up-to-date treatment on the topic of recreational therapy, the eighth edition of *Therapeutic Recreation Processes and Techniques: Evidence-Based Recreational Therapy* continues to focus on the practice of recreational therapy, with a philosophy of practice that has been consistent since the first edition in 1982. Like prior editions, this new edition attempts to offer a theory-based, evidence-based, client-centered approach to practice, offering many new references and an expanded discussion of facilitation techniques. This edition also emphasizes aspects of practice rated as critical in recreational therapy and offers information on recreational therapy topics such as the helping relationship, leadership, communication skills, and clinical supervision.

Perspectives on Recreational Therapy David R. Austin, Bryan P. McCormick, 2017 At no other time in the history of the profession have recreational therapists been presented with such tremendous opportunities to improve care and advance their profession. By gaining perspectives on issues and concerns in recreational therapy presented within this book by leading authorities, students and practitioners will be better prepared to serve clients and further their profession through a renewed mind-set. Who Will Benefit from This Book? *Perspectives on Recreational Therapy* is designed for advanced undergraduate and graduate courses in recreational therapy. Its contents should also prove helpful to those practicing recreational therapy. It therefore is a text that helps prepare students for the realization of what it is like to be a practitioner and to serve as a resource for them once they have entered into their careers. Two chapters that may draw the most interest from students are titled *How to Take and Pass Tests* and *Hire Me!* The first gives valuable information about how to prepare for tests in courses and for the NCTRC certification exam. (Study Guide) *Hire Me!* provides detailed information on how to obtain a position as a recreational therapist. User-Friendly Approach: Throughout *Perspectives on Recreational Therapy*, the authors have attempted to make the content of the chapters readable and easy to follow. Reading comprehension questions are provided at the conclusion of each chapter to aid students in gaining understandings of the material and to provide instructors with possible exam questions.

Recreational Therapy Assessment Thomas K. Skalko, Jerome Singleton, 2019-09-24 The profession of recreational therapy relies on the ability to plan, implement, and evaluate the services offered to clients. Determining what those services will be requires a complex assessment process in which therapeutic recreation specialists, recreational therapists, and other rehabilitation professionals integrate client assessment with the classification from the International Classification of Functioning, Disability, and Health (ICF). *Recreational Therapy Assessment* is an evidence-based guide that illustrates best practices in performing those assessments in different settings so the needs of each client can be addressed. *Recreational Therapy Assessment* provides direction on how to assess clients in order to determine their specific needs. The first book of its kind structured to facilitate program planning at an individualized level, readers will find assessment protocols for various consumer groups: Older adults Mental health consumers Individuals with intellectual and developmental disabilities People with physical disabilities Those from diverse cultural backgrounds Of particular value to readers is understanding how the ICF classification system can aid and affirm assessment goals and outcomes, and how practitioners can better integrate their services with those of other members of an interdisciplinary team of providers. The chapters include practical examples, case studies, reflection questions, and learning activities to promote student understanding and assist in the assessment and classification process. Conducting effective consumer assessments is a vital skill for both current and future professionals in the field of recreational therapy. *Recreational Therapy Assessment* will prepare readers to perform those assessments to help them plan and implement customized services for a range of clients.

Case Studies in Therapeutic Recreation Sherri Hildebrand, Rachel Elizabeth Smith, 2018-03-02 This is a relatable, easy-to-read text that explains theory and provides opportunities to practice skills needed to become a successful recreational

therapist. The text focuses on problem-based learning using case studies to describe disabilities, diseases, and conditions often seen in recreation therapy practice. Each case tells the story of a person living with a medical condition or disability. Details are provided about how a recreational therapist might encounter working with or for an individual. In addition, pertinent questions guide the reader toward a greater knowledge and application of the planning phase of the therapeutic recreation process. Thirty different case studies set in a variety of therapeutic recreation workplaces give ample opportunity for students to practice their problem-solving skills. Case Studies in Therapeutic Recreation also describes how to use both the DENT and Rehab-CYCLE Problem-Solving Models. Readers will learn the basic skills needed to conduct research and evaluate their findings as they incorporate this knowledge into evidence-based practice. With inclusion of the International Classification of Functioning, Disability, and Health (ICF) and evidence-based practice in therapeutic recreation, this textbook allows readers the opportunity to apply information learned throughout their coursework into practice.
