*A Beginner's Guide to College Success* Jonathan Golding, Philipp Kraemer, David Royse, 2017-12-31 *A Beginner's Guide to College Success* is designed to address a wide range of topics that are of interest to aspiring or new college students, including financial decisions, choosing an area of study, adapting to new responsibilities, managing time wisely, and more. The guide begins by introducing the reader to the way college is structured and walking the reader through the preparations required to embark upon a college career. Preliminary chapters help the reader explore the value of a college education, begin to consider a major, and better understand the role credits, grades, and degrees play in the higher education system. Later chapters address the challenges different types of students--military veterans, those with disabilities, and student athletes, to name a few--may face as they transition from high school to college. These chapters also cover best practices for communicating with faculty members, succeeding in large lecture classes, dealing with reading assignments, how to get the most out of online learning, and more. The guide closes with a collection of chapters dedicated to studying, preparing for exams, and taking advantage of campus resources, including the library, to bolster personal learning. Full of tips and practical advice, *A Beginner's Guide to College Success* is a useful resource for any student considering college and wondering how it differs from high school. Jonathan Golding, Ph.D., is a professor in the Department of Psychology at the

University of Kentucky. He is the creator and author of the Beginner's Guide to College Success blog, as well as numerous books, journal articles, and book chapters within the field of psychology. **Overloaded and Underprepared** Denise Pope, Maureen Brown, Sarah Miles, 2015-07-27 Praise for *Overloaded and Underprepared* "Parents, teachers, and administrators are all concerned that America's kids are stressed out, checked out, or both—but many have no idea where to begin when it comes to solving the problem. That's why the work of Challenge Success is so urgent. It has created a model for creating change in our schools that is based on research and solid foundational principles like communication, creativity, and compassion. If your community wants to build better schools and a brighter future, this book is the place to start." —Daniel H. Pink, author of *Drive* and *A Whole New Mind* "Challenge Success synthesizes the research on effective school practices and offers concrete tools and strategies that educators and parents can use immediately to make a difference in their communities. By focusing on the day-to-day necessities of a healthy schedule; an engaging, personalized, and rigorous curriculum; and a caring climate, this book is an invaluable resource for school leaders, teachers, parents, and students to help them design learning communities where every student feels a sense of belonging, purpose, and motivation to learn the skills necessary to succeed now and in the future." —Linda Darling-Hammond, Charles E. Ducommun Professor of Education, Stanford University "Finally, a book about education and student well-being that is both research-based and eminently readable. With all the worry about student stress and academic engagement, Pope, Brown and Miles gently remind us that there is much we already know about how to create better schools and healthier kids. Citing evidence-based 'best practices' gleaned from years of work with schools across the country, they show us what is not working, but more importantly, what we need to do to fix things. Filled with practical suggestions and exercises that can be implemented easily, as well as advice on how to approach long-term change, *Overloaded and Underprepared* is a clear and compelling roadmap for teachers, school administrators and parents who believe that we owe our children a better education." —Madeline Levine, co-founder Challenge Success; author of *The Price of Privilege* and

Teach Your Children Well “This new book from the leaders behind Challenge Success provides a thorough and balanced exploration of the structural challenges facing students, parents, educators, and administrators in our primary and secondary schools today. The authors’ unique approach of sharing proven strategies that enable students to thrive, while recognizing that the most effective solutions are tailored on a school-by-school basis, makes for a valuable handbook for anyone seeking to better understand the many complex dimensions at work in a successful learning environment.” —John J. DeGioia, President of Georgetown University

Blueprint for Success in College Dave Dillon, 2014-09-01

Teach Students How to Learn Sandra Yancy McGuire, 2023-07-03 Co-published with and Miriam, a freshman Calculus student at Louisiana State University, made 37.5% on her first exam but 83% and 93% on the next two. Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom’s Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students’ mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with

campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Sandra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.

**College Success for Students with Learning Disabilities** Cynthia G. Simpson, Vicky G. Spencer, 2020 College Success for Students With Learning Disabilities (2nd ed.) offers students the knowledge, guidance, and strategies they need to effectively choose a college, prepare for university life, and make the most of their collegiate experience--

**From the Projects to College** Cierra Griffin, Brandy McCreary, 2022-09-05 When you are a first generation college student, meaning you are the first in your family to attend college, you likely have no idea how to navigate the college world. We, my sister and I, are first generation college students, and we learned how to navigate college by watching each other, by watching others, and ultimately by trial and error. One of the many goals of this book is to offer guidance to new college students on how to benefit from college and make it work for you. The information in this book is especially for students who grew up like we did: ambitious, but financially poor, with limited access to information that could have truly prepared us to navigate college. This book by no means guarantees that what worked for us will work for you, but when you have no idea how to college, having a resource like this book will make all the difference for a first generation college student. My sister

and I want to see every student succeed in college because not only does this have the potential to improve your financial status, it also helps to improve the world that we live in. We hope that this book will help new college students who simply have no clue on how to navigate college.

**One Student to Another** David Seybert, 2020-04-22 When I started to write this book, I was 19 years old. I was finishing my sophomore year at UMass Lowell. Even though I had not reached my 20s yet, I had experienced a lot in my college career. I had just finished a Fall Semester of 24 credits (8 classes) while on the Division 1 Track & Field team. I was finishing up the Spring Semester of 27 credits (9 classes) while working full-time at an internship. Flash forward about a year, I am 20 years old and finished my college classes, debt-free, and have been working a full-time upper level role for the past 9 months at one of the top companies in my field. Why am I telling you this? I tell my story to you because I was not the top of my class in high school. I didn't get a perfect score of the SAT. I failed 5 out of the 7 AP tests I took in high school. I'm here to tell you that as soon as you walk off that stage at high school graduation, you are in control. No matter what cards you have been dealt, you have the chance to create your own future. As you read through this book you will get a look into the experiences I had during my college years and how you can change the course of your life using the tips written for you. I wrote this book for you. It does not matter what has happened in the past, your story begins here and now. I wrote this book so that you can take what I have learned and use it to build the life that you want.
