Change Management Training Elaine Biech,2016-05-09 We need to change how we change. Successful organizations are proactive about change and can turn obstacles into opportunities. Thus managing change—its constant barrage, faster pace, and complexity—has become a required skill for leaders, managers, and employees alike. In *Change Management Training*, master trainer and innovator Elaine Biech presents a complete lineup of workshop resources and tools needed to conduct effective change management training. Help managers understand their expanded role, practice new management techniques, and demystify the people side of change with innovative two-day, one-day, and half-day training workshop. You'll find all the activities, handouts, tools, and assessments you need inside. Free tools and customization options The free, ready-to-use resources (PDF) that accompany this book include downloadable presentation materials, agendas, handouts, assessments, and tools. All workshop program materials, including MS Office PowerPoint presentations and MS Word handouts, may be customized for an additional licensing fee. Browse the licensing options in the Custom Material License pricing menu. Preview a sample activity from the book. About the Series The ATD Workshop Series is written for trainers by trainers, because no one knows workshops as well as the practitioners who have done it all. Each publication weaves in today's technology and accessibility considerations and provides a wealth of new content that can be used to create a training experience like no other. Climate Change Education in Formal Settings, K-14 National Research Council,Division of Behavioral and Social Sciences and Education,Board on Science Education,Steering Committee on Climate Change Education in Formal Settings, K-14,2012-11-02 Climate change is occurring, is very likely caused by human activities, and poses significant risks for a broad range of human and natural systems. Each additional ton of greenhouse gases emitted commits us to further change and greater risks. In the judgment of the Committee on America's Climate Choices, the environmental, economic, and humanitarian risks of climate change indicate a pressing need for substantial action to limit the magnitude of climate change

and to prepare to adapt to its impacts. A principal message from the recent National Research Council report, America's Climate Choices, this brief summary of how climate change will shape many aspects of life in the foreseeable future emphasizes the vital importance of preparation for these changes. The report points to the importance of formal and informal education in supporting the public's understanding of those challenges climate change will bring, and in preparing current and future generations to act to limit the magnitude of climate change and respond to those challenges. Recognizing both the urgency and the difficulty of climate change education, the National Research Council, with support from the National Science Foundation, formed the Climate Change Education Roundtable. The roundtable brings together federal agency representatives with diverse experts and practitioners in the physical and natural sciences, social sciences, learning sciences, environmental education, education policy, extension education and outreach, resource management, and public policy to engage in discussion and explore educational strategies for addressing climate change. Two workshops were held to survey the landscape of climate change education. The first explored the goals for climate change education for various target audiences. The second workshop, which is the focus of this summary, was held on August 31 and September 1, 2011, and focused on the teaching and learning of climate change and climate science in formal education settings, from kindergarten through the first two years of college (K-14). This workshop, based on an already articulated need to teach climate change education, provided a forum for discussion of the evidence from research and practice. The goal of this workshop was to raise and explore complex questions around climate change education, and to address the current status of climate change education in grade K-14 of the formal education system by facilitating discussion between expert researchers and practitioners in complementary fields, such as education policy, teacher professional development, learning and cognitive science, K-12 and higher education administration, instructional design, curriculum development, and climate science. Climate Change Education in Formal Settings, K-14: A Workshop Summary summarizes the two workshops.

Social Change And The Middle Classes Tim Butler, Mike Savage, 2013-11-05 First Published in 1995. The study of the middle classes actually poses a variety of interesting challenges. Traditionally, the social scientific gaze has been directed either downwards, to the working classes, the poor and the dispossessed, or upwards, to the wealthy and powerful. For all these reasons, a collection of original papers on various aspects of the British middle classes seems an important venture that will cast valuable light on the course of social change in Britain more generally. This book is designed to bring together a series of accessible, high-quality research papers on various aspects of the British middle classes.

Leading Change Training Jeffrey Russell, 2006 The Trainer's Workshop Series is designed to be a practical, hands-on roadmap to help you quickly develop training in key business areas. Each book in the series offers all the exercises, handouts, assessments, structured experiences and ready-to-use presentations needed to develop effective training sessions. In addition to easy-to-use icons, each book in the series includes a companion CD-ROM with PowerPoint(TM) presentations and electronic copies of all supporting material featured in the book. Leading Change Training helps you create solid change programmes within your organization and integrate leading-edge change leadership models and other theories into your programme. It not only involves simply reducing resistance, but also creating an awareness of the challenges and responsibilities that each person, irrespective of level, faces as a change initiative goes forward. Contains exercises, handouts, assessments and tools to help you: - create effective change training for executives, leaders, managers and staff- build support and reduce resistance to organisational change- become a more effective and efficient facilitator- ensure training is on target and gets results This book offers not only the 'how' of a programme on leading change, but also an insightful and helpful look at the why, when and where. Lin Standke, Instructional Design Manager, Centre for Professional Development, CUNA & Affiliates Other books in this series: Leadership Training, Customer Service Training, New Employee Orientation Training, Leading Change Training.

Change of Course John Simpson, 2021-09-16 Blood. It's everywhere. Rocks, fist-sized and larger, scatter the area: many are bloody. There's a body: a man's. He's on his back. His head is a mess. A woman leans over him. She feels his neck. Her shoulders are heaving; she's sobbing. Several men are standing around, milling aimlessly; they don't know what to do. It is reported in the British press as a tragic accident in Angola. This story suits the majority of those present, until Sophie Addison turns up. What is her interest and why has it taken thirty years for anyone to question what happened? But one thing

is clear to all who meet Sophie, and that is who she is. She cannot be ignored. How and why did James Lodge die on that dusty mine road thirty years ago? These questions had either been forgotten or buried by all those involved.
