Dual Enrollment Policies, Pathways, and Perspectives Jason L. Taylor, Joshua Pretlow, 2015-03-16 Looking to develop new dual enrollment programs or adapt and revamp an existing dual enrollment programs at a community college? This volume addresses the critical issues and topics of dual enrollment practices and policies, including: state policies that regulate dual enrollment practice and the influence of state policy on local practice, the usage of dual enrollment programs as a pathway for different populations of students such as career and technical education students and students historically underrepresented in higher education, and chapters that surface student, faculty, and high school stakeholder perspectives and that examine institutional and partnership performance and quality. This is the 169th volume of this Jossey-Bass quarterly report series. Essential to the professional libraries of presidents, vice presidents, deans, and other leaders in today's open-door institutions, *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

Dual Enrollment: Strategies, Outcomes, and Lessons for School-College Partnerships Eric Hoffman, Daniel Voloch, 2012-06-20 This volume focuses on the goals, practices, policies, and outcomes of programs that enroll high school students in college courses for college credit. This volume examines: The details of dual enrollment programs Their impact on student achievement and institutional practices How they support a student's transition to, and success in, college The role of higher education in improving K-12 education. It presents quantitative and qualitative studies that investigate the impact of dual enrollment programs on student and faculty participants. Accounts by dual enrollment program administrators provide examples of how their programs operate and how data have been used to set benchmarks for program success. Chapters also explore models that build off dual enrollment's philosophy of school-college partnerships and embrace a more robust framework for supporting college transition. This is the 158th volume of this Jossey-Bass series. Addressed to higher education decision makers on all kinds of campuses, *New Directions for Higher Education* provides timely information and authoritative advice about major issues and administrative problems confronting every institution.

Dual Enrollment Handbook - California Jeannie Karlitz, 2020-08-04 California high school students can simultaneously earn high school and college credits for free! California Community College dual enrollment classes will demonstrate academic rigor on high school transcripts for college admissions, save students money on college tuition, and possibly allow

students to graduate from college early. Dual enrollment credits are accepted at most four year institutions of higher education, including the University of California system, Cal State Universities, and most other private universities and colleges. The popular distance learning (online) classes are often asynchronous, where students can learn at their own pace without live instruction. High school students also enjoy in-person instruction at their local California Community Colleges or, if offered, on their high school campuses. Registering for dual enrollment classes at California Community Colleges is an exhausting manual procedure. This handbook simplifies the process and includes a 10 step guide.

Building Competitiveness in Africa's Agriculture C. Martin Webber,Patrick Labaste,2009-12-16 Value chain based approaches offer tremendous scope for market-based improvements in production, productivity, rural economy diversification, and household incomes, but are often covered by literature that is too conceptual or heavily focused on analysis. This has created a gap in the information available to planners, practitioners, and value chain participants. Furthermore, few references are available on how these approaches can be applied specifically to developing agriculture in Africa. 'Building Competitiveness in Africa s Agriculture: A Guide to Value Chain Concepts and Applications' describes practical implementation approaches and illustrates them with scores of real African agribusiness case studies. Using these examples, the 'Guide' presents a range of concepts, analytical tools, and methodologies centered on the value chain that can be used to design, implement, and evaluate agricultural and agribusiness development initiatives. It stresses principles of market focus, collaboration, information sharing, and innovation. The 'Guide' begins by examining core concepts and issues related to value chains. A brief literature review then focuses on five topics of particular relevance to African agricultural value chains. These topics address challenges faced by value chain participants and practitioners that resonate through the many cases described in the book. The core of the book presents methodological tools and approaches that blend important value chain concepts with the topics and with sound business principles. The tools and case studies have been selected for their usefulness in supporting market-driven, private-sector initiatives to improve value chains. The 'Guide' offers 13 implementation approaches, presented within the implementation cycle of a value chain program, followed by descriptions of actual cases. Roughly 60 percent of the examples are from Africa, while the rest come from Europe, Latin America, and Asia. The 'Guide' offers useful guidance to businesspeople, policy makers, representatives of farmer or trade organizations, and others who are engaged in agro-enterprise and agribusiness development. These readers will learn how to use value chain approaches in ways that can contribute to sound operational decisions, improved market linkage, and better results for enterprise and industry development.

Strategies and Priorities for African Agriculture Xinshen Diao,James Thurlow,Samuel Benin,Shenggen Fan,2012 In the first decade of the twenty-first century, countries within Sub-Saharan Africa reached milestones that seemed impossible only

ten years ago: macroeconomic stability, sustained economic growth, and improved governance. Continuing this pattern of success will require enhancing the region's agricultural sector, in which a large proportion of poor people make a living. The authors of *Strategies and Priorities for African Agriculture: Economywide Perspectives from Country Studies* argue that, although the diversity of the region makes generalization difficult, increasing staple-crop production is more likely to reduce poverty than increasing export-crop production. This conclusion is based on case studies of ten low-income African countries that reflect varying levels of resource endowments and development stages. The authors also recommend increased, more efficient public investment in agriculture and agricultural markets and propose new directions for future research. The last ten years have been an encouraging time for one of the world's poorest regions; this book offers an analysis of how recent, promising trends can be sustained into the future.

Agricultural Research in Africa Lynam, John, Beintema, Nienke M., Roseboom, Johannes, Badiane, Ousmane, 2016-09-06

This book—prepared by Agricultural Science and Technology Indicators (ASTI), which is led by IFPRI—offers a comprehensive perspective on the evolution, current status, and future goals of agricultural research and development in Africa, including analyses of the complex underlying issues and challenges involved, as well as insights into how they might be overcome. Agriculture in Africa south of the Sahara is at a prospective tipping point. Growth has accelerated in the past decade, but is unsustainable given increasing use of finite resources. The yield gap in African agriculture is significant, and scenarios on feeding the world's population into the future highlight the need for Africa to expand its agricultural production. *Agricultural Research in Africa: Investing in Future Harvests* discusses the need to shift to a growth path based on increased productivity—as in the rest of the developing world—which is essential if Africa is to increase rural incomes and compete in both domestic and international markets. Such a shift ultimately requires building on evolving improvements that collectively translate to deepening rural innovation capacity.

Africa Human Development Report 2012, 2012 Sub-Saharan Africa has the highest prevalence of hunger in the world. Until this situation improves, the human development prospects of millions of Africans will remain at risk. UNDP's first Africa Human Development Report shows that food security and human development reinforce each other. If African countries are to realise their long-term potential, the report says, they must boost agricultural productivity to both improve the availability of food and reduce poverty. Policies to enhance nutrition are central to ensuring that access to food translates into human development. The report argues further that local populations must have the resources and decision-making power to

produce and consume nutritious food throughout the year, overcoming the risks represented by continuing conflict, climate change and variations in food prices.

The Emergence of Land Markets in Africa Stein T Holden, Keijiro Otsuka, Frank M Place, 2010-09-30 This book is the first systematic attempt to address emerging land markets and their implications for poverty, equity, and efficiency across a number of African countries. The high incidence of poverty and the need for increased agricultural productivity remain acute in rural areas of sub-Saharan Africa, where a lack of secure land rights and a growing scarcity of land relative to the size of the population are becoming increasingly critical issues. Indeed, land issues in the region are high on the international policy agenda. Yet our knowledge about land tenure security and other rural factor markets (such as labor, oxen, manure, purchased inputs, and credit) is far from adequate to formulate sensible policies. The case studies in the book show that, while land markets and especially informal markets have been rapidly emerging in densely populated parts of Africa - and have generally been to the benefit of the poor--their functions remain imperfect. This is due to policy-induced tenure insecurity and the fragmentation of agricultural land. Applying rigorous quantitative analyses, the book provides a basis for taking into account the role of land markets in national land policies. All too often, the authors argue, land policies have been extreme, either prohibiting all land transactions or giving unrestricted freehold rights to a small elite at the expense of the poor. From the long experience in Asia, it is known that such policies are detrimental to both production efficiency and equity of land use. The authors argue that future policies in Africa should work with the markets. Regulations should be imposed only with careful testing that they are having the intended effects. The Emergence of Land Markets in Africa is a resource for teaching in developed and developing countries, as it provides both comprehensive reviews of the literature and detailed case studies. It is intended to facilitate the dialogue between researchers and policymakers, as well as inspire researchers to go further in their investigations and build an even stronger basis for good policies. The Emergence of Land Markets in Africa is the first publication in the new Environment for Development (EfD) book series. EfD books focus on research and applications in environmental and natural resource economics as they are relevant to poverty reduction and environmental problems in developing countries. The EfD book series is part of the EfD initiative. (www.environmentfordevelopment.org)
