Nathan D. Grawe

Green Mountain Poets Albert J. Sanborn, 1872

Vermont Michael E. Flocker, 2002-07-02 Surveys the history, land, economy, politics and government, culture, and notable people and events of Vermont.

The Oxen at the Intersection Patrice Jones, 2014-06-18 When Green Mountain College in Poultney, Vermont, announced that two oxen called Bill and Lou would be killed and turned into hamburgers despite their years of service as unofficial college and town mascots, Patrice Jones and her colleagues at nearby VINE Sanctuary offered an alternative scenario: to allow the elderly bovines to retire to the sanctuary. What transpired after this simple offer was a catastrophe of miscommunication, misdirection, and misinterpretations, as the college dug in its heels, activists piled on, and social media erupted. Part true-crime mystery, part on-the-ground reportage, and part sociocultural critique, *The Oxen at the Intersection* is a brilliant unearthing of the assumptions, preconceptions, and biases that led all concerned with the lives and deaths of these two animals to fail to achieve their ends. How and why the threads of this story unspooled, as Jones reveals, raises profound questions—most particularly about how ideas rooted in history, race, gender, region, and speciesism intersect and complicate strategy and activism, and their desired outcomes. In the end, notes Jones, we must always ask, Where's the body?

Sustainability in Higher Education Peggy F. Barlett, Geoffrey W. Chase, 2013-08-16 Campus leaders describe how community colleges, publicly funded universities, and private liberal arts colleges across America are integrating sustainability into curriculum, policies, and programs. In colleges and universities across the United States, students, faculty, and staff are forging new paths to sustainability. From private liberal arts colleges to major research institutions to community colleges, sustainability concerns are being integrated into curricula, policies, and programs. New divisions, degree programs, and courses of study cross traditional disciplinary boundaries; Sustainability Councils become part of campus governance; and new sustainability issues link to historic social and educational missions. In this book, leaders from twenty-four colleges and universities offer their stories of institutional and personal transformation. These stories document both the power of leadership—whether by college presidents, faculty, staff, or student activists—and the potential for institutions to redefine themselves. Chapters recount, among other things, how inclusive campus governance helped mobilize students at the University of South Carolina; how a course at the Menominee Nation's tribal college linked sustainability and traditional knowledge; how the president of Furman University convinced a conservative campus community to make sustainability a strategic priority; how students at San Diego State University built sustainability into future governance while financing a LEED platinum-certified student center; and how sustainability transformed pedagogy in a lecture class at Penn State. As this book makes clear, there are many paths to sustainability in higher education. These stories offer a snapshot of what has been accomplished and a roadmap to what is possible. Colleges and Universities Covered Arizona State University • Central College, Iowa • College of the Menominee Nation, Wisconsin • Curriculum for the Bio-region Project, Pacific Northwest • Drury University, Missouri • Emory University, Georgia • Florida A&M University • Furman University, South Carolina • Green Mountain College, Vermont • Kap'olani Community College, Honolulu, Hawaii • Pennsylvania State University • San Diego State University • Santa Clara University, California • Slippery Rock State University, Pennsylvania • Spelman College, Georgia • Unity College, Maine • University of Hawaii-Manoa • University of Michigan • University of South Carolina • University of South Florida • University of Wisconsin-Oshkosh • Warren Wilson College, North Carolina • Yale University

Demographics and the Demand for Higher Education Nathan D. Grawe, 2018 The economics of American higher education are driven by one key factor--the availability of students willing to pay tuition--and many related factors that determine what schools they attend. By digging into the data, economist Nathan Grawe has created probability models for

predicting college attendance. What he sees are alarming events on the horizon that every college and university needs to understand. Overall, he spots demographic patterns that are tilting the US population toward the Hispanic southwest. Moreover, since 2007, fertility rates have fallen by 12 percent. Higher education analysts recognize the destabilizing potential of these trends. However, existing work fails to adjust headcounts for college attendance probabilities and makes no systematic attempt to distinguish demand by institution type. This book analyzes demand forecasts by institution type and rank, disaggregating by demographic groups. Its findings often contradict the dominant narrative: while many schools face painful contractions, demand for elite schools is expected to grow by 15+ percent. Geographic and racial profiles will shift only slightly--and attendance by Asians, not Hispanics, will grow most. Grawe also use the model to consider possible changes in institutional recruitment strategies and government policies. These what if analyses show that even aggressive innovation is unlikely to overcome trends toward larger gaps across racial, family income, and parent education groups. Aimed at administrators and trustees with responsibility for decisions ranging from admissions to student support to tenure practices to facilities construction, this book offers data to inform decision-making--decisions that will determine institutional success in meeting demographic challenges--

Academic Turnarounds Terrence MacTaggart, 2010-02-16 What are the hallmarks of a lasting institutional turnaround? It is too easy to mistake a single initiative—mounting a new marketing program, for example, or bringing in a million dollar donation—for a true turnaround. Successful turnarounds involve profound, often difficult, actions that affect the finances, academic offerings, and reputations of colleges and universities. They take institutions to new levels of performance and then present new challenges. MacTaggart examines the several stages that comprise institutional turnarounds and offers practical advice on setting and reaching higher levels of performance. MacTaggart also discusses the early indicators of a college or university's need for a turnaround. He and his colleagues outline financial trends and other indicators of distress, as well as benchmarks for the various stages in an effective turnaround strategy. *Academic Turnarounds* will help trustees, presidents, and faculty members diagnose whether or not they are in denial over the true condition of the institution they are charged

with preserving. Donors, state officials, accreditors, and others interested in the quality and vitality of American higher education will find direction in this book.
