Sports, Society, and Technology Jennifer J. Sterling,Mary G. McDonald,2019-11-12 Sports, Society, and Technology: Bodies, Practices, and Knowledge Production addresses the complex entanglements of science, technology, and sporting cultures. The collection explores themes around human and non-human actants, knowledge formations and processes, and the materiality and multiplicity of bodies through an engagement with the interdisciplinary fields of Sport Studies and Science and Technology Studies. Representing a range of methodological, theoretical, and disciplinary approaches, contributors interrogate the social, cultural, political, and historical intersections of an ever-expanding techno-scientific sporting landscape - from true bounce and brain trauma to exercise physiology, metrics, and esports, and from feminist technoscience, whey protein, and epigenetics to sickle cell screening and testosterone regulation.
