The Mysteries of Pittsburgh Michael Chabon, 2011-12-20 The Pulitzer Prize-winning author's "astonishing" debut novel, about a son's struggle to find his own identity and integrity (The New York Times). Michael Chabon, author of The Amazing Adventures of Kavalier & Clay, Moonglow, and The Yiddish Policeman's Union, is one of the most acclaimed talents in contemporary fiction. The Mysteries of Pittsburgh, published when Chabon was just twenty-five, is the beautifully crafted debut that propelled him into the literary stratosphere. Art Bechstein may be too young to know what he wants to do with his life, but he knows what he doesn't want: the life of his father, a man who laundered money for the mob. He spends the summer after graduation finding his own way, experimenting with a group of brilliant and seductive new friends: erudite

Arthur Lecomte, who opens up new horizons for Art; mercurial Phlox, who confounds him at every turn; and Cleveland, a poetry-reciting biker who pulls him inevitably back into his father's mobbed-up world. A New York Times bestseller, *The Mysteries of Pittsburgh* was called "astonishing" by Alice McDermott, and heralded the arrival of one of our era's great voices. This ebook features a biography of the author.

Impossible Domesticity Leila Gomez, 2021-10-26 Travelers from Europe, North, and South America often perceive Mexico as a mythical place onto which they project their own cultures' desires, fears, and anxieties. Gómez argues that Mexico's role in these narratives was not passive and that the environment, peoples, ruins, political revolutions, and economy of Mexico were fundamental to the configuration of modern Western art and science. This project studies the images of Mexico and the ways they were contested by travelers of different national origins and trained in varied disciplines from the nineteenth to the twenty-first century. It starts with Alexander von Humboldt, the German naturalist whose fame sprang from his trip to Mexico and Latin America, and ends with Roberto Bolaño, the Chilean novelist whose work defines Mexico as an "oasis of horror." In between, there are archaeologists, photographers, war correspondents, educators, writers, and artists for whom the trip to Mexico represented a rite of passage, a turning point in their intellectual biographies, their scientific disciplines, and their artistic practices.

Steppe Dreams Margarethe Adams, 2020-06-16 *Steppe Dreams* concerns the political significance of temporality in Kazakhstan, as manifested in public events and performances, and its reverberating effects in the personal lives of

Kazakhstanis. Like many holidays in the post-Soviet sphere, public celebrations in Kazakhstan often reflect multiple temporal framings—utopian visions of the future, or romanticized views of the past—which throw light on present-day politics of identity. Adams examines the political, public aspects of temporality and the personal and emotional aspects of these events, providing a view into how time, mighty and unstoppable, is experienced in Kazakhstan.

Beyond the Lab and the Field Eike-Christian Heine, Martin Meiske, 2022-04-19 *Beyond the Lab and the Field* analyzes infrastructures as intense sites of knowledge production in the Americas, Europe, and Asia since the late nineteenth century. Moving beyond classical places known for yielding scientific knowledge, chapters in this volume explore how the construction and maintenance of canals, highways, dams, irrigation schemes, the oil industry, and logistic networks intersected with the creation of know-how and expertise. Referred to by the authors as “scientific bonanzas,” such intersections reveal opportunities for great wealth, but also distress and misfortune. This volume explores how innovative technologies provided research opportunities for scientists and engineers, as they relied on expertise to operate, which resulted in enormous profits for some. But, like the history of any gold rush, the history of infrastructure also reveals how technologies of modernity transformed nature, disrupting communities and destroying the local environment. Focusing not on the victory march of science and technology but on ambivalent change, contributors consider the role of infrastructures for ecology, geology, archaeology, soil science, engineering, ethnography, heritage, and polar exploration. Together, they also examine largely overlooked perspectives on modernity: the reliance of infrastructure on knowledge, and infrastructures as places and occasions that inspired a greater understanding of the natural world and the technologically made environment.

Galileo in Pittsburgh Clark Glymour, 2010-03-15 What did the trial of Galileo share with the trial for fraud of the foremost investigator of the effects of lead exposure on children’s intelligence? In the title essay of this rollicking collection on science and education, Clark Glymour argues that fundamentally both were disputes over what methods are legitimate and authoritative. From testing the expertise of NASA scientists to discovering where software goes to die to turning educational research upside down, Glymour’s reports from the front lines of science and education read like a blend of Rachel Carson and Hunter S. Thompson. Contrarian and original, he criticizes the statistical arguments against Teach for America, argues for teaching the fallacies of Intelligent Design in high school science, places contemporary psychological research in a Platonic cave dug by Freud, and gives (and rejects) a fair argument for a self-interested, nationalist response to climate change. One of the creators of influential new statistical methods, Glymour has been involved in scientific investigations on such diverse topics as wildfire prediction, planetary science, genomics, climate studies, psychology, and educational research. Now he provides personal reports of the funny, the absurd, and the appalling in contemporary science and education. More bemused

than indignant, Galileo in Pittsburgh is an ever-engaging call to rethink how we do science and how we teach it.

Pittsburgh Surveyed Maurine Weiner Greenwald, Margo J. Anderson, From 1909-1914 the Pittsburgh Survey brought together statisticians, social workers, engineers, lawyers, physicians, economists, and city planners to study the effects of industrialization on the city of Pittsburgh. Pittsburgh Surveyed examines the accuracy and the impact of the influential Pittsburgh Survey, emphasizing its role in the social reform movement of the early twentieth century.
