Facility Integrated Contingency Planning Thomas M. Socha,2002-10 The Integrated Contingency Plan (ICP) will minimize duplication in the preparation and use of emergency response plans at the same facility and will improve economic efficiency for both the regulated and regulating communities. Public School Emergency Preparedness and Crisis Management Plan Don Philpott, Paul Serluco, 2010 Written in accordance with the President's 2003 homeland security directive and the Department of Education's guidelines, and in response to the ever-present threats facing our school systems, this book helps schools and institutions develop a comprehensive emergency response plan. This book outlines programs and procedures that can be applied to any school system to address hazard mitigation and prevention, emergency preparedness and response, and recovery and restoration of school functions to an effective learning environment. It describes specific actions and assigns responsibilities and response roles to district and individual school staff emergency teams, cooperating agencies, and community response partners that have agreed to share responsibilities and resources as defined in this plan. This book also outlines, in the event of an emergency involving response by fire and/or law enforcement, the district/school site personnel who should establish an Incident Command System-based response organization in accordance with procedures outlined in the National Incident Management System. In addition, the authors predetermine, to the extent possible, operational procedures across any U.S. school system and cooperating governmental, private, and volunteer agencies for responding to and recovering from any and all types of natural, human, or technology-based emergencies that may occur within school system operations or outside the jurisdiction of the school system but nonetheless cause/could cause collateral impact to school system operations. Contents examine emergency notification and immediate actions; concept of operations, including first key actions, partnering with community agencies, and the initial briefing; crisis management team action checklists; response resources, including

Building an Emergency Plan , 2000-02-03 Building an Emergency Plan provides a step-by-step guide that a cultural

institution can follow to develop its own emergency preparedness and response strategy. This workbook is divided into three parts that address the three groups generally responsible for developing and implementing emergency procedures—institution directors, emergency preparedness managers, and departmental team leaders—and discuss the role each should play in devising and maintaining an effective emergency plan. Several chapters detail the practical aspects of communication, training, and forming teams to handle the safety of staff and visitors, collections, buildings, and records. Emergencies covered include natural events such as earthquakes or floods, as well as human-caused emergencies, such as fires that occur during renovation. Examples from the Barbados Museum and Historical Society, the Museo de Arte Popular Americano in Chile, the Mystic Seaport Museum in Connecticut, and the Seattle Art Museum show how cultural institutions have prepared for emergencies relevant to their sites, collections, and regions.
