WordNet Christiane Fellbaum, 1998 WordNet, an electronic lexical database, is considered to be the most important resource available to researchers in computational linguistics, text analysis, and many related areas. English nouns, verbs, adjectives, and adverbs are organized into synonym sets, each representing one underlying lexicalized concept. Different relations link the synonym sets. The purpose of this volume is twofold. First, it discusses the design of WordNet and the theoretical motivations behind it. Second, it provides a survey of representative applications, including word sense identification, information retrieval, selectional preferences of verbs, and lexical chains.

Electronic Databases and Publishing Albert Henderson, 2018-01-18 The true pioneers in electronic publishing put their bibliographic databases on tape and online in the 1960s. Nearly all of them had long experience with compiling information for distribution in printed form and a strong market connection. As a result of Soviet advances in science and space technology, American government support for information science and academic libraries flowed freely for a little over a decade, making possible tremendous advances in technology, in retrieval techniques and in sophisticated coverage. Advances in information technology and market conditions have encouraged many more participants to underwrite the development of databases that now extend into the arts, social sciences, business, and popular interests. These essays show how production statistics accompanied by statements of editorial coverage provide a fairly accurate reflection of output of many of the major disciplinary bibliographic databases. The urgent priority of information resources in the 1960s has encouraged comprehensive servicing of the formal research literature as published in journals and monographs. Authors have counted subject words, languages, origins, types of publication, and so on over several decades. This volume also includes articles on some databases that are not strictly bibliographic, such as the CMG database of college courses, which illuminates some of the changes in college textbook publishing. Information seekers will find the many tables of practical use, as guidance to what and how much may be found within each database. Analysts of publishing, of science policy, and of higher education will find information relevant to expenditures, human resources, and other indicators of education, research, and technology activity.

Teaching Electronic Literacy Kathleen W. Craver, 1997-09-30 School library media specialists will find this concepts-based approach to teaching electronic literacy an indispensable basic tool for instructing students and teachers. It provides step-by-step instruction on how to find and evaluate needed information from electronic databases and the Internet, how to formulate successful electronic search strategies and retrieve relevant results, and how to interpret and critically analyze search results. The chapters contain a suggested lesson plan and sample assignments for the school library media specialist to use in teaching electronic literacy skills to students and teachers. Dr. Kathleen W. Craver, a nationally recognized specialist in technology in the library media center, identifies the universal concepts of electronic literacy and provides the library media specialist with the rationales, background, methods, and model assignments to teach students and faculty to become proficient and critical users of electronic information technologies. At the beginning of each chapter, Craver furnishes a rationale for change that school library media specialists can use to justify these essential modifications to their teaching curriculum. Chapters include: The Structure of Electronic Information; The Common Vocabulary and Characteristics of Electronic Resources; Formulating Electronic Search Strategies; The Physical Arrangement of Information; Choosing Appropriate On-Site and Remote Electronic Libraries; Choosing Appropriate Electronic Databases; Internet Search Tools and Techniques; Identifying Electronic Resources; On-Site Electronic Records Access; Using Primary Electronic Resources; and Evaluating Electronic Sources. The Appendix contains a list of principal vendors. A glossary of terms and a

bibliography of suggested reading complete the work. This basic teaching guide provides the media specialist with all the tools necessary to help novice users to be successful and avoid the frustration of electronic database searching and retrieval.

Handbook of Electronic and Digital Acquisitions Thomas W. Leonhardt, 2006 Handbook of Electronic and Digital Acquisitions steers librarians through the process of evaluating, choosing, and managing electronic resources as they expand their collection development policies to include electronic databases. This handy, how-to guide takes a practical approach to acquisitions, providing commonsense information on basic copyright laws, fair use guidelines and policies, offsite and in-house databases, virtual reference software, EDI, and vendors. The book's contributors draw on their own experiences, providing case studies and helpful evaluation checklists, worksheets, and templates.

Image Databases Vittorio Castelli, Lawrence D. Bergman, 2004-04-07 The explosive growth of multimedia data transmission has generated a critical need for efficient, high-capacity image databases, as well as powerful search engines to retrieve image data from them. This book brings together contributions by an international all-star team of innovators in the field who share their insights into all key aspects of image database and search engine construction. Readers get in-depth discussions of the entire range of crucial image database architecture, indexing and retrieval, transmission, display, and user interface issues. And, using examples from an array of disciplines, the authors present cutting-edge applications in medical imagery, multimedia communications, earth science, remote sensing, and other major application areas.

Electronic Resources Ling Yuh W Pattie, Bonnie J Cox, 2020-08-26 The universe of electronic resources is indeed diverse, expansive, intimidating, and unstructured compared to the finite, prepackaged print world upon which the information delivery infrastructure has been constructed. *Electronic Resources: Selection and Bibliographic Control* addresses the resultant concerns of information professionals as they struggle to define, select, and control electronic resources in libraries and information centers today. This book offers readers an overview of issues and provides a common ground for deliberations and decisionmaking. Librarians and students concerned with the Internet and related issues will appreciate the broad scope and in-depth discussions in *Electronic Resources: Selection and Bibliographic Control*. From both conceptual and pragmatic standpoints, this book enlightens the reader on such topics as: Internet resources the relationship between OPAC and Internet Standard Generalized Markup Language (SGML) versus USMARC Text Encoding Initiative (TEI) Core Language and the Information Bus Dublin Core Metadata as a discovery/retrieval tool decision-making matrix model e-texts and e-theses digital materials and digital libraries This book also gives the reader an inside look at a number of specific emerging projects from around the world. Highlighted here are the CATRIONA project from the U.K.--designing an Internet

discovery and retrieval system; the ALCUIN project--using traditional infrastructure to handle Internet resources; the Center for Electronic Texts in the Humanities (CETH) and the Electronic Text Center at the University of Virginia; the OCLC Internet Cataloging project; and the National Digital Library Program (NDLP), Encoded Archival Description (EAD), and electronic CIP projects at the Library of Congress. Electronic Resources: Selection and Bibliographic Control clearly illustrates the evolving role of librarian from

A Practical Guide to Electronic Resources in the Humanities Ana Dubnjakovic, Patrick Tomlin, 2010-09-25 From full-text article databases to digitized collections of primary source materials, newly emerging electronic resources have radically impacted how research in the humanities is conducted and discovered. This book, covering high-quality, up-to-date electronic resources for the humanities, is an easy-to-use annotated guide for the librarian, student, and scholar alike. It covers online databases, indexes, archives, and many other critical tools in key humanities disciplines including philosophy, religion, languages and literature, and performing and visual arts. Succinct overviews of key emerging trends in electronic resources accompany each chapter. The only reference guide to electronic resources written specifically for the humanities Addresses all major humanities disciplines in one convenient guide Concise format ideal for students, librarians, and humanities researchers

Electronic Styles Xia Li, Nancy Crane, 1996 Demonstrates how to cite full text information files, bibliographic databases, Internet-accessible electronic journals, e-mail, and other online resources.

Electronic Resources Genevieve Owens, 2020-09-10 Electronic Resources: Implications for Collection Management shows librarians the strengths and weaknesses of electronic resources and the implications these resources have on collection management. The book then helps librarians incorporate electronic resources into their collections accordingly. Contributors in Electronic Resources provide a broad look at the ways in which electronic information affects the business of building and maintaining library collections. They examine the history of electronic resources in document collections and share with readers a thorough analysis of the gains and losses libraries can expect to experience in an increasingly digital environment. Readers also learn: how to budget for both traditional and emerging information sources the effects of electronic collections on the public services realm how to assess the value of journals amidst the many different access and delivery mechanisms how to use resource sharing as a solution to the archival problems which arise as libraries collect materials in continuously proliferating formats selection criteria for electronic resources how to assemble electronic resources into archives social implications of electronic collections Academic librarians in collection management will find Electronic Resources an essential resource for finding their place in the electronic environment. Librarians will refer to this volume again and again as they adjust to increasing dependence upon electronic resources for fulfilling their patrons' needs.

Registries for Evaluating Patient Outcomes Agency for Healthcare Research and Quality/AHRQ,2014-04-01 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

Collaborative Electronic Resource Management Joan E. Conger,2004-11-30 Electronic resource management is becoming a primary responsibility of library managers. This book approaches electronic resource management as a system affecting all library work, linking it to concepts of collaborative management and the assessment cycle. The author demonstrates how collection development, acquisitions, licensing, budgeting, and cataloging techniques; technological infrastructure; and user services for electronic resources fit into the new collaborative management that relies on learning more than control to respond to change. The techniques presented for managing electronic resources improves the library's service value through relationships between library professionals and with library customers. Engaging the librarian in a cycle of constant learning and assessment, the approach ultimately makes work lighter, relationships with colleagues and customers more productive, and library services more relevant to community needs.

Database Systems Paul Beynon-Davies,2003 Most modern day organizations have a need to record data relevant to their

everyday activities and many choose to organise and store some of this information in an electronic database. Database Systems provides an essential introduction to modern database technology and the development of database systems. This new edition has been fully updated to include new developments in the field, and features new chapters on: e business, database development process, requirements for databases, and distributed processing. In addition, a wealth of new examples and exercises have been added to each chapter.
