Media Convergence Handbook - Vol. 2 Artur Lugmayr,Cinzia Dal Zotto,2016-05-11 The Media Convergence Handbook sheds new light on the complexity of media convergence and the related business challenges. Approaching the topic from a managerial, technological as well as end-consumer perspective, it acts as a reference book and educational resource in the field. Media convergence at business level may imply transforming business models and using multiplatform content production and distribution tools. However, it is shown that the implementation of convergence strategies can only succeed when expectations and aspirations of every actor involved are taken into account. Media consumers, content producers and managers face different challenges in the process of media convergence. Volume II of the Media Convergence Handbook tackles these challenges by discussing media business models, production, and users' experience and perspectives from a technological convergence viewpoint.

The Emergence of EU Criminal Law Sarah J Summers,Christian Schwarzenegger,Gian Ege,Finlay Young,2014-12-01 Criminal law can no longer be neatly categorised as the product and responsibility of domestic law. That this is true is emphasised by the ever-increasing amount of legislation stemming from the European Union (EU) which impacts, both directly and indirectly, on the criminal law. The involvement of the EU institutions in the substantive criminal laws of its Member States is of considerable legal and political significance. This book deals with the emerging EU framework for creating, harmonising and ensuring the application of EU criminal law. This book aims to highlight some of the consequences of EU involvement in the criminal law by examining the provisions which have been adopted in the field of information and communications technology. It provides an overview of the criminal law competence of the EU and evaluates the impact of these developments on the criminal laws of the Member States. It then goes on to consider the EU legislation which requires Member States to regulate matters such as data protection, e-security, intellectual property and various types of illegal content through the criminal law is analysed. In the course of this evaluation, particular consideration is given to issues such as the basis on which the EU institutions establish the need for criminal sanctions, the liability of service providers and the extent to which the Member States have adhered to, or departed from, the legislation in the course of implementation.

Weapons Of The Rich. Strategic Action Of Private Entrepreneurs In Contemporary China Thomas

Heberer, Gunter Schubert, 2020-04-22 This book provides a fresh perspective on the political agency of private entrepreneurs in contemporary China. Most Chinese scholarship describes this group as being politically acquiescent due to systematic co-optation by the party state. This book, however, argues that private entrepreneurs should be understood, and analytically conceptualized, as a 'strategic group' that makes use of different formal and informal channels to safeguard and expand its interests, though so far it has not challenged the current regime. State-business relations in contemporary China should thus be understood not in terms of mere clientelism, but as a dynamic symbiosis in which private entrepreneurs contribute substantially to policy and institutional change. This book is based on several years of comparative empirical fieldwork across China. With its rich and unique qualitative data and insights, this volume contributes significantly to our understanding of the political behaviour and impact of private entrepreneurs in contemporary China.

Semiotic Analysis and Public Policy Christopher L. Atkinson, 2019-03-20

Semiotic Analysis and Public Policy evaluates several key areas of public policy that are dependent on narrative, naming, sign, and branding to create meaning. Semiotic analysis, drawing on the work of Saussure, Peirce, and others, allows for creation of a case-oriented model of brand versus product, and of medium compared with message. Using a critical Habermasian lens, Atkinson convincingly exposes approaches focusing too heavily on instrumentality and rhetoric that claims a resolution of complex societal dilemmas. Rooted in the literature on public policy and semiotics, Atkinson creates an opportunity to delve more fully into the creation of narratives and meaning in policy, and the origins and maintenance of public programs. Evaluation of such programs shows various levels of disconnect between popular understanding of public considerations, political outcomes, and what results from the administrative/regulatory process in support of the law. This book will be of interest for scholars and researchers of public policy, policy analysis, public administration, public management, and policy implementation.

Mammals and Birds as Bioindicators of Trace Element Contaminations in Terrestrial Environments Elżbieta

Kalisińska, 2019-03-01 The population explosion that began in the 1960s has been accompanied by a decrease in the quality of the natural environment, e.g. pollution of the air, water and soil with essential and toxic trace elements. Numerous poisonings of people and animals with highly toxic anthropogenic Hg and Cd in the 20th century prompted the creation of the abiotic environment, mainly in developed countries. However, the system is insufficient for long-term exposure to low concentrations of various substances that are mainly ingested through food and water. This problem could be addressed by the monitoring of sentinels - organisms that accumulate trace elements and as such reflect the rate and degree of

environmental pollution. Usually these are long-lived vertebrates - herbivorous, omnivorous and carnivorous birds and mammals, especially game species. This book describes the responses of the sentinels most commonly used in ecotoxicological studies to 17 trace elements.

Internet, Mobile Devices und die Transformation der Medien Ulrich Dolata, Jan-Felix Schrape, 2013 Neue Online- und Mobiltechnologien setzen klassische Mediensektoren wie die Musikindustrie, den Buchhandel oder die Presse zum Teil massiv unter Druck. Sie stellen eingespielte Produktions- und Vertriebsweisen infrage, verlangen nach veränderten Regeln und Geschäftsmodellen, fördern das Auftreten neuer Akteure und tragen zum allgemeinen Strukturwandel der Öffentlichkeit bei. In diesem Buch wird danach gefragt, wie sich Mediensektoren, Wertschöpfungsprozesse und Öffentlichkeitsstrukturen durch das Internet und durch Mobile Devices verändern: Wie tiefgreifend ist dieser Wandel und welche Verlaufsformen nimmt er an? Wie reagieren etablierte Akteure auf diese Herausforderungen und welche Rolle spielen neue Akteure in diesen Transformationsprozessen? Stehen alte und neue Medienstrukturen in einem konkurrierenden oder in einem komplementären Verhältnis zueinander? Die Beiträge des Bandes zeigen, dass sich der einschneidende mediale Wandel nicht als radikaler Bruch in kurzer Frist fassen lässt, sondern als schrittweiser und diversifizierter Restrukturierungsprozess begriffen werden sollte: Weit typischer als der fundamentale Austausch von Akteuren, Strukturen und Arenen medialer Öffentlichkeit sind Formen graduellen Wandels, der Koexistenz und wechselseitigen Ergänzung alter und neuer Medienstrukturen. - Dieser Band ist auch als E-Book (PDF) erhältlich

Structural Bioinformatics: Applications in Preclinical Drug Discovery Process C. Gopi Mohan, 2019-01-10 This book reviews the advances and challenges of structure-based drug design in the preclinical drug discovery process, addressing various diseases, including malaria, tuberculosis and cancer. Written by internationally recognized researchers, this edited book discusses how the application of the various in-silico techniques, such as molecular docking, virtual screening, pharmacophore modeling, molecular dynamics simulations, and residue interaction networks offers insights into pharmacologically active novel molecular entities. It presents a clear concept of the molecular mechanism of different drug targets and explores methods to help understand drug resistance. In addition, it includes chapters dedicated to natural-product-derived medicines, combinatorial drug discovery, the CryoEM technique for structure-based drug design and big data in drug discovery. The book offers an invaluable resource for graduate and postgraduate students, as well as for researchers in academic and industrial laboratories working in the areas of chemoinformatics, medicinal and pharmaceutical chemistry and pharmacoinformatics.

Towards a New Enlightenment? , 2019-09-17 Addresses key issues in understanding the decade 2008-2018 and its impact on the societies of the future. Brings together the articles B28 of twenty-two prestigious international experts in different fields of thought. Through an informative approach, the essays form a transversal view of today's thinking. This is

the tenth title of the Open Mind essay collection published by BBVA. A27.0We are living through years of great importance, marked by the unstoppable evolution of technology, science and the information society. This book brings together twenty-two essays written by prestigious researchers from the world's leading universities on areas as diverse as crucial to our future: climate change, artificial intelligence, economics, cyber-security and geopolitics, democracy, anthropology, new media, astrophysics and cosmology, nanotechnology, biomedicine, globalisation, gender theory and the cities of the future.

The Paradox of Knowledge-Intensive Entrepreneurship in Low-Tech Industries Isabel Schwinge,2015-07-22 This book presents the first multidimensional investigation of KIE in the context of low-tech industries and gives insights in paradox conditions and specific mechanisms, using the example of the German textile industry. Therefore, the author solves conceptual inconsistencies and develops an alternative framework referring to systemic concepts of sectoral innovation systems and KIE as well as to the concept of institutional entrepreneurs. As a result, the deviation of willful actors from a restricting institutional environment and sources of entrepreneurial opportunities can be investigated more comprehensively.

Creativity and Innovation in the Music Industry Peter Tschmuck,2006-01-18 This book charts the effects of new communication technologies and the Internet on the creation of music in the early 21st century. It examines how the music industry will be altered by the Internet, music online services and MP3-technology. This is done through an integrated model based on an international history of the industry since the phonograph's invention in 1877, and thus, the history of the music industry is described in full detail for the first time.

Smaller, Quicker, Cheaper Daniel A. Wagner,2011 The effective use of educational assessments is fundamental to improving learning. However, effective use does not refer only to the technical parameters or statistical methodologies. Learning assessments in use todaywhether large-scale or household surveys or hybrid (smaller, quicker, cheaper or SQC)have varied uses and purposes. The present volume provides a review of learning assessments, their status in terms of the empirical knowledge base, and some new ideas for improving their effectiveness, particularly for those children most in need. It is argued here that SQC learning assessments have the potential to enhance educational accountability, increase transparency, and support a greater engagement of stakeholders with an interest in improving learning. In addition, countries need a sustained policy to guide assessment choices, including a focus on poor and marginalized populations.

Transformative Learning Meets Bildung Anna Laros,Thomas Fuhr,Edward W. Taylor,2017-01-28 This edited volume sets the groundwork for a dialogue between transformative learning and continental theories of Bildung in adulthood. Both

theoretical frameworks bring meaning to the complex learning process of individuals as they develop a more critical worldview. In this volume, a variety of authors from different countries and theoretical backgrounds offer new understandings about Bildung and transformative learning through discussion of theoretical analyses, educational practices, and empirical research. As a result, readers gain greater insight into these theories and related implications for teaching for change. From the various chapters an exciting relationship between both theories begins to emerge and provides impetus for greater discussion and further research about two important theories of change in the field of adult education. /div

Meantone Temperaments on Lutes and Viols David Dolata, 2016-07-04 Written for musicians by a musician, Meantone Temperaments on Lutes and Viols demystifies tuning systems by providing the basic information, historical context, and practical advice necessary to easily achieve more satisfying tuning results on fretted instruments. Despite the overwhelming organological evidence that many of the finest lutenists, vihuelists, and viola da gamba players in the Renaissance and Baroque eras tuned their instruments in one of the meantone temperaments, most modern early instrument players today still tune to equal temperament. In this handbook richly supplemented with figures, diagrams, and music examples, historical performers will discover why temperaments are necessary and how they work, descriptions of a variety of temperaments, and their application on fretted instruments. This technical book provides downloadable audio tracks and other tools for fretted instrument players to achieve more stable consonances, colorful dissonances, and harmonic progressions that vividly propel the music forward.

Conflicts in Environmental Regulation and the Internationalisation of the State Ulrich Brand, Christoph Görg, Joachim Hirsch, Markus Wissen, 2008-04-24 This book examines the global regulation of biodiversity politics through the UN Convention on Biological Diversity (CBD), the WTO and other international treaties. Using historical-materialist state and regulation theory, it assesses how the discourse and politics of sustainable development have contributed to the internationalisation of the state. The authors argue that sustainable development, far from being a fixed concept, is a conceptual terrain on which different and conflicting symbolisations of and solutions responses to of the ecological crisis struggle for hegemony. Furthermore, it shows that the international multilateral environmental organisations agreements are not at all a means to counteract neoliberal globalisation but, on the contrary, form an integral part of the ongoing transformation process. Focussing on the UN Convention on Biological Diversity CBD, the FAO International Treaty on Plant Genetic Resources for Food and Agriculture and the Agreement on Trade-related Aspects of Intellectual Property Rights (TRIPS) in the World Trade Organisation, this co-authored volume addresses the following issues: state theory, regulation theory and International Political Economy biodiversity protection and valorisation of genetic resources access to genetic resources and sharing of benefits which arise out of its use enforcement of intellectual property rights and their impact on biodiversity. This book will be of interest to students and scholars of international politics, international political economy,

environmental studies, development studies and political ecology.
