(Re)Inventing the Internet Andrew Feenberg, Norm Friesen, 2012-03-24 Although it has been in existence for over three decades, the Internet remains a contested technology. Its governance and role in civic life, education, and entertainment are all still openly disputed and debated. The issues include censorship and network control, privacy and surveillance, the political impact of activist blogging, peer to peer file sharing, the effects of video games on children, and many others. Media conglomerates, governments and users all contribute to shaping the forms and functions of the Internet as the limits and potentialities of the technologies are tested and extended. What is most surprising about the Internet is the proliferation of controversies and conflicts in which the creativity of ordinary users plays a central role. The title, (Re)Inventing the Internet, refers to this extraordinary flowering of agency in a society that tends to reduce its members to passive spectators. This collection presents a series of critical case studies that examine specific sites of change and contestation. These cover a range of phenomena including computer gaming cultures, online education, surveillance, and the mutual shaping of digital technologies and civic life.

The Cambridge Photographic Atlas of Galaxies Michael König, Stefan Binnewies, 2017-09-07 This reference atlas showcases around 250 beautiful galaxies within an amateur astronomer's reach and uses them to explain current astrophysical research.

Phoenix Rising Donald G. Lett, 2008-02 In an age when the supply of gasoline to feed this modern American society has become both more expensive and more scarce questions are being pondered. Inquires like, How can a modern society scale back its dependence on gasoline as a motive source?' Are there genuine alternative power sources?' Are they the answer to a growing crisis?' Recent announcements of hybrids like those from Honda, Toyota, and Ford have really brought attention to this issue. Hybrids that use both gasoline engines and electric motors. Really, though, alternative power sources have been around for as long as the automobile has been. The battle between and among the steam car, the electric and the gas car was fought out in the first couple of decades of the twentieth century. This book explores the ins and outs of that battle. A struggle from which the gasoline car emerged completely victorious. To such an extent that steam cars and electric cars virtually disappeared from the scene for many decades. We will look over all three alternatives, exploring their advantages and disadvantages. We will also look over the obstacles to the steamers and the electrics. Barriers that still exist to a certain

extent. Handicaps that caused their disappearance in the first place.

Microelectronic Applications of Chemical Mechanical Planarization Yuzhuo Li, 2007-10-19 An authoritative, systematic, and comprehensive description of current CMP technology Chemical Mechanical Planarization (CMP) provides the greatest degree of planarization of any known technique. The current standard for integrated circuit (IC) planarization, CMP is playing an increasingly important role in other related applications such as microelectromechanical systems (MEMS) and computer hard drive manufacturing. This reference focuses on the chemical aspects of the technology and includes contributions from the foremost experts on specific applications. After a detailed overview of the fundamentals and basic science of CMP, *Microelectronic Applications of Chemical Mechanical Planarization*: * Provides in-depth coverage of a wide range of state-of-the-art technologies and applications * Presents information on new designs, capabilities, and emerging technologies, including topics like CMP with nanomaterials and 3D chips * Discusses different types of CMP tools, pads for IC CMP, modeling, and the applicability of tribometry to various aspects of CMP * Covers nanotopography, CMP performance and defect profiles, CMP waste treatment, and the chemistry and colloidal properties of the slurries used in CMP * Provides a perspective on the opportunities and challenges of the next fifteen years Complete with case studies, this is a valuable, hands-on resource for professionals, including process engineers, equipment engineers, formulation chemists, IC manufacturers, and others. With systematic organization and questions at the end of each chapter to facilitate learning, it is an ideal introduction to CMP and an excellent text for students in advanced graduate courses that cover CMP or related semiconductor manufacturing processes.

Also included are a chronology of events, an introductory essay, and a comprehensive bibliography, subdivided by topic and fully annotated.

Historical Dictionary of the War of 1812 Robert Malcomson, 2006-01-16 The War of 1812 was an extremely complicated war motivated by British seizures of American vessels and goods, American desire to expand into Canada, and impressment of American sailors into the British Navy. However, these are merely the immediate causes. To fully understand the War of 1812, one must delve deeper into history. This book does just that, as it covers the period leading up to the war (1803-1812) and the events of the war itself (1812-1815) through the use of a dictionary consisting of more than 1,400 cross-referenced entries covering descriptions of engagements, ships, weaponry, the compositions of regiments, significant political and military figures, and a full list of key places, issues and terms. Also included are 21 photographs, 6 maps, a chronology of events, an introductory essay, and a comprehensive bibliography, subdivided by topic and fully annotated.

English Wetlands Mary Gearey, Andrew Church, Neil Ravenscroft, 2020-07-16 This book argues that to understand wetlands is to understand human development. Using case studies drawn from three English wetlands, the book moves between empirical research and scholarship to interrogate how these particular ecosystems have played an essential part in the development of our contemporary society; yet inhabit a strange place in our national psyche. Chapters address a range of cultural and environmental wetland concerns. Consideration is given to: the ways in which we have revered, engineered and renaturalised these landscapes throughout history; English wetlands as spaces of beauty, creativity, reflection, rejuvenation and multi-species interactions; accelerating climate change in an age of neoliberalism. The final chapter then is a reflection on our collective lives together alongside other species, exploring what sustainability transitions might mean for human-wetland relationships.

Shadow Blessed D.K. Holmberg, The A'ras of Nyaesh have a terrifying reputation: skilled swordsmen, owners of powerful magic, and ruthless killers. When they kill her parents, Carth discovers her parents had trained her for magic she never knew she possessed. She must use the skills they taught to stay alive, discover a way to find answers, and avenge them if she can. Only the discovery of a greater threat than the A'ras forces her to risk herself for new friends and a home she never wanted.

Strukturen der Entwicklung von e-Learning im institutionellen Bereich Österreichs vor dem Hintergrund des europäischen Bildungsmarktes Ari Arif, 2005-06-21 Inhaltsangabe: Einleitung: Elektronische Medien bieten heute dem gesamten Bereich der Bildung ein ungeheures Innovations- und Effizienzsteigerungspotenzial. Multimedia und Telematik eröffnen neue Formen des alten Themas Distance Learning : In virtuellen Seminarräumen werden räumliche Distanzen und zeitliche Beschränkungen des Lernens aufgehoben und das individuelle Lernen gefördert. In der vorliegenden Arbeit soll unter anderem veranschaulicht werden, wie aus dem traditionellen Fernunterricht ganze virtuelle Lehrgänge entstanden sind. Des Weiteren wird auf die didaktische Entwicklung und Einsatzformen des e-Learning Angebotes eingegangen, um dann die Frage zu beantworten, ob neue didaktische Modelle notwendig sind. Vor allem eine Studie, durchgeführt auf nationaler Ebene um herauszufinden in wie weit e-Learning im institutionellen Bereich Österreichs bereits verbreitet ist, steht im Mittelpunkt dieser Arbeit. Am Ende wird auch auf die Zukunftsaussichten von e-Learning sowohl national als auch international eingegangen. Die gesamte Arbeit gliedert sich wie folgt: Im ersten Kapitel wird genauer auf die Problemstellung und auf die Zielsetzungen der Arbeit eingegangen. Zusätzlich wird der Untersuchungsraum abgegrenzt, die wissenschaftlichen Methoden genauer erklärt und die notwendigen Definitionen gegeben. Das zweite Kapitel beschäftigt sich mit der historischen Entwicklung des e-Learning. Da diese Entwicklung nicht nur auf einer Ebene oder in einem Bereich stattgefunden hat, ist es notwendig, sich dieser Thematik von verschiedenen Seiten her zu nähern. Deswegen werden auch die technischen Voraussetzungen für ein modernes e-Learning dargestellt, zu welchen eine genaue Beschreibung des Internets wichtig ist. Im dritten Kapitel werden allgemeine pädagogische Grundlagen und Methoden des e-Learnings

dargestellt, die eine gemeinsame Grundlage für eine multimediale Didaktik bilden. Das vierte Kapitel beschäftigt sich mit dem Status quo des e-Learnings im institutionellen Bereich Österreichs. Eine aus diesem Grund an den Universitäten, Fachhochschulen, Ministerien und Kammern durchgeführte nationale Studie wird vorgestellt und die Resultate werden dargelegt. Im fünften Kapitel werden die Ergebnisse der zweiten Studie, bei der diejenigen Institutionen, die e-Learning i.e.S. betreiben und nochmals mit einem ausführlicheren Fragebogen angeschrieben wurden, näher gebracht. Im sechsten Kapitel wird auf Basis der Kriterien und Methoden von BAUMGARTNER et [...]

Labelling Strategies in Environmental Policy Mario Teisl, 2017-11-30 Eco-labelling programmes have been in existence for many years but their recent growth now extends to many products and services. The academic literature has grown in response and there have been several theoretical and empirical advances. This volume presents the best of previously published research on the design and effects of eco-labelling programmes. Whilst concentrating on the economic literature, the articles also approach the topic from a psychological, sociological and political point of view. Part One focuses on a range of theoretical developments, Part Two on empirical measurements of the effectiveness of eco-labelling, Part Three on the factors that influence the success and design of eco-labelling programmes and Part Four on the effects of eco-labelling on international trade and development.

Green Materials for Electronics Mihai Irimia-Vladu, Eric D. Glowacki, Niyazi S. Sariciftci, Siegfried Bauer, 2017-12-04 Combining the materials science, technological, and device aspects of organic bioelectronics based on green materials, this is the first overview of the emerging concepts involving fabrication techniques for sustainable electronics with low energy and material consumption. With contributions from top-notch editors and authors, in one focus, the book covers a collection of natural materials suited for electronics applications such as paper, silk, melanin, DNA and nucleobases, resins, gums, saccharides, cellulose, gelatine and peptides. In another thrust, the book focuses on device fabrication based on these

materials, including processing aspects, and applications such as sensors, signal transducers, transient, implantable and digestible electronics. With its interdisciplinary approach this text will appeal to the chemistry, physics, materials science, and engineering communities.

Big Chicken Maryn McKenna, 2017-09-12 In this eye-opening exposé, acclaimed health journalist and National Geographic contributor Maryn McKenna documents how antibiotics transformed chicken from local delicacy to industrial commodity—and human health threat—uncovering the ways we can make America's favorite meat safer again. What you eat matters—for your health, for the environment, and for future generations. In this riveting investigative narrative, McKenna dives deep into the world of modern agriculture by way of chicken: from the farm where it's raised directly to your dinner table. Consumed more than any other meat in the United States, chicken is emblematic of today's mass food-processing practices and their profound influence on our lives and health. Tracing its meteoric rise from scarce treat to ubiquitous global commodity, McKenna reveals the astounding role of antibiotics in industrial farming, documenting how and why wonder drugs revolutionized the way the world eats—and not necessarily for the better. Rich with scientific, historical, and cultural insights, this spellbinding cautionary tale shines a light on one of America's favorite foods—and shows us the way to safer, healthier eating for ourselves and our children. In August 2019 this book will be published in paperback with the title *Plucked: Chicken, Antibiotics, and How Big Business Changed the Way the World Eats*.

The Earth Awakens D K Holmberg,2019-06-04 Having passed his first test at the Academy, most believe Tolan has proved he belongs. Only Tolan knows the truth: that his shaping required power from the borrowed bondar-and possibly from the elementals themselves. If he can't find a way to shape without one, he'll be expelled from the Academy. When he intervenes to stop another attack on the city, he once again finds himself in the middle of the battle between Terndahl and the Draasin Lord. Worse, because of his continued reliance on the bondars, he begins to fear he might be responsible for releasing elementals. Another test approaches. For him to remain at the Academy, he must find real power within himself, but a greater challenge distracts him. With increased attacks on the city, Tolan might be the only one to know what they're after-and how to stop them.
