Encyclopedia of Human Development Neil J. Salkind, Lewis H. Margolis, 2006 Publisher description

Nurturing Our Humanity Riane Eisler, Douglas P. Fry, 2019 Nurturing Our Humanity offers a new perspective on our personal and social options in today's world, showing how we can build societies that support our great human capacities for consciousness, caring, and creativity. It brings together findings--largely overlooked--from the natural and social sciences debunking the popular idea that we are hard-wired for selfishness, war, rape, and greed. Its groundbreaking new approach reveals connections between disturbing trends like climate change denial and regressions to strongman rule. Moving past right vs. left, religious vs. secular, Eastern vs. Western, and other familiar categories that do not include our formative parent-child and gender relations, it looks at where societies fall on the partnership-domination scale. On one end is the domination system that ranks man over man, man over woman, race over race, and man over nature. On the other end is the more peaceful, egalitarian, gender-balanced, and sustainable partnership system. Nurturing Our Humanity explores how behaviors, values, and socio-economic institutions develop differently in these two environments, documents how this impacts nothing less than how our brains develop, examines cultures from this new perspective (including societies that for millennia oriented toward partnership), and proposes actions supporting the contemporary movement in this more life-sustaining and enhancing direction. It shows how through today's ever more fearful, frenzied, and greed-driven technologies of destruction and exploitation, the domination system may lead us to an evolutionary dead end. A more equitable and sustainable way of life is biologically possible and culturally attainable: we can change our course.

Creative Dimensions of Teaching and Learning in the 21st Century Jill B. Cummings, Mary L.

Blatherwick, 2017-09-12 In a rapidly changing world the importance of creativity is more apparent than ever. As a result, creativity is now essential in education. Creative Dimensions of Teaching and Learning in the 21st Century appeals to educators across disciplines teaching at every age level who are challenged daily to develop creative practices that promote innovation, critical thinking and problem solving. The thirty-five original chapters written by educators from different disciplines focus on theoretical and practical strategies for teaching creatively in contexts ranging from mathematics to music, art education to second language learning, aboriginal wisdom to technology and STEM. They explore and illustrate deep learning that is connected to issues vital in education - innovation, identity, engagement, relevance, interaction,

collaboration, on-line learning, dynamic assessment, learner autonomy, sensory awareness, social justice, aesthetics, critical thinking, digital media, multi-modal literacy and more. The editors and authors share their passion for creativity, teaching, learning, curriculum, and teacher education in this collection that critically examines creative practices that are appearing in today's public schools, post-secondary institutions and adult and community learning centres. Creativity is transforming education in the 21st century.

Mental Illness and Public Health Care James M. Humber, Robert F. Almeder, 2001-11-07 Is the involuntary commitment of the mentally ill morally proper? How can we determine proper psychiatric care in a managed health care system? And can a mental health professional violate patient's confidentiality when they believe a patient is a threat to someone? In six non-ideological essays, leading bioethicists, including one with practical experience in medical administration, search for clear moral and legal guidelines for dealing with the complex issues presented when treating mentally ill patients. Objective and readily understandable, *Mental Illness and Public Health Care* illuminates for the educated reader some of the key ethical issues facing mental health care professionals and provides convincing practical conclusions with real moral import.

Famous American Crimes and Trials: 1960-1980 Frankie Y. Bailey, Steven M. Chermak, 2004 What do Lizzie Borden and O.J. Simpson have in common? Or the Lindbergh baby and Gary Gilmore? They were all the focus of famous crimes and/or trials in the United States. In this five-volume set, historical and contemporary cases that not only shocked the nation but that also became a part of the popular and legal culture of the United States are discussed in vivid, and sometimes shocking, detail. Each chapter focuses on a different crime or trial, and explores the ways in which each became famous in its own time. The fascinating cast of characters, the outrageous crimes, the involvement of the media, the actions of the police, and the trials that often surprised combine to offer here one of the most comprehensive sets of books available on the subject of famous U.S. crimes and trials.

Criminology Gennaro F. Vito, Jeffrey R. Maahs, Ronald M. Holmes, 2006 Across America, crime is a consistent public concern. The authors have produced a comprehensive work on major criminological theories, combining classical criminology with new topics, such as Internet crime and terrorism. The text also focuses on how criminology shapes public policy.

Challenging Behavior in Young Children Barbara Kaiser, Judy Sklar Rasminsky, 2003 Two renowned authors provide an in-depth look into the latest research on specific strategies for responding to challenging behavior, including guidance, punishment, and positive behavior support and functional assessment as mandated by the Individuals with Disabilities Education Act (IDEA).

Stick Your Neck Out John Graham, 2005-05-15 An accessible, comprehensive handbook to achieving change in any environment, featuring time-tested methods and practical tips from real activists. As President of the Giraffe Heroes Project, which since 1982 has been recognizing people who "stick their necks out for the common good," John Graham has seen what

hundreds of average citizens around the world have done to bring about constructive change. He's drawn on their experiences, his own as a veteran environmental activist, and that of a hand-picked group of seasoned activists to produce an accessible, eminently practical, inspiring guide on how to work effectively for change in any environment. *Stick Your Neck Out* covers every aspect of working for change, from choosing an issue to mapping out a strategy, getting a team together, building alliances, working with the media, and more. Each chapter contains a series of practical tips as well as inspiring examples of real people—artists, truck drivers, doctors, waitresses, and others—who have made a difference on issues like poverty, racism, gang violence, environmental pollution, and many more. Everything in this book has been honed and practiced; nothing is untested theory. This is a comprehensive guide to the skills, qualities, and strategies you need to make a difference on any issue. But it's also about becoming fully alive—about the meaning and passion you can add to your own life by getting involved. Active citizenship and personal growth are linked. The information in this book can change your world—and it can change your life.

The Act of Remembering John H. Mace, 2011-07-07 The first volume devoted solely to autobiographical memory retrieval, *The Act of Remembering* serves as a primer of ideas, methodology, and central topics, and lays the groundwork for future research in the field. Contains new, forward-looking theories from leading international scholars. Answers questions such as: Do we retrieve memories according to when and where we need them? How much conscious control do we have over what we remember? Why are some people more likely than others to have intrusive 'flashbacks' following a stressful event? Pays particular attention to voluntary and involuntary recall.

Young People, Crime and Justice Roger Hopkins Burke, 2016-03-24 In the minds of the general public, young people and crime are intrinsically linked; wide-spread belief persists that such activities are a result of the 'permissive 1960s' and the changing face of the traditional nuclear family. Roger Hopkins Burke challenges these preconceptions and offers a detailed and comprehensive introduction to youth crime and the subsequent response from the criminal justice system. This extended and fully updated new edition explores: The development of young people and attempts to educate, discipline, control and construct them, Criminological explanations and empirical evidence of why young people become involved in criminality, The system established by the Youth Justice Board, its theoretical foundations, and the extent of its success, Alternative approaches to youth justice around the globe and the apparent homogenisation throughout the neoliberal world. The second edition also includes new chapters looking at youth justice in the wider context of social policy and comparative youth justice. *Young People, Crime and Justice* is the perfect undergraduate critical introduction to the youth justice system, following a unique left-realist perspective while providing a balanced account of the critical criminology agenda, locating the practical working of the system in the critical socio-economic context. It is essential reading for students taking modules on youth crime, youth justice and contemporary social and criminal justice policy. Text features include key points, chapter

summaries and review questions.

Principles of Management S. Soundaian, 2019-06-04 Management today has become a strategic function in view of frequently occurring economic cycle changes on a global scale resulting in loss of millions of customers and jobs. The recessionary trend also has become a prolonged one which has necessitated the application of more mind to this problems. Although some argue that recession is an opportunity and it should be properly exploited, we cannot agree with this argument and lead our ears to those people.

Challenges of Living Elizabeth D. Hutchison, Holly C. Matto, Marcia P. Harrigan, Leanne W. Charlesworth, Pamela A. Viggiani, 2007-04-20 This timely text draws on interdisciplinary theory and research to examine the multidimensional risk and protective factors for eight challenges of living frequently encountered by social workers. The authors provide a working model for social workers to integrate the most up-to-date evidence about challenges of living they face in their daily practice. Using a multidimensional biopsychosocial-spiritual perspective, the book examines etiology, course, and intervention strategies related to these eight challenges of living.

Develop Management Skills James Carlopio, Graham Andrewartha, David Whetten, Kim Cameron, 2012-03-23 Develop the personal, interpersonal and group skills vital to achieving outstanding success in today's workplace with *Developing Management Skills: A Comprehensive Guide for Leaders*. Carlopio's hallmark five-step learning approach--self-assessment, learning, analysis, practice and application--and its modular structure help you tailor your study to the areas you need to focus on. This practical, hands-on style resources incorporates in-text exercises and role-playing assignments and is further supported by a Companion Website that includes self-assessment exercises and additional online chapters on communication skills. *Developing Management Skills* 5th Edition is suitable for undergraduate or post-graduate courses with a specific focus on managerial skills such as capstone courses, leadership or communication skills. It is also well suited to corporate professional development training courses or simply as a resource for professionals seeking to become better managers. Overall, it is an excellent mix of theory and practical reality. I congratulate the authors for their valuable and ongoing contribution to management education and development in the Asia-Pacific region. Peter J. Dowling, PhD; LFAHRI; FANZAM, Professor of International Management and Strategy, La Trobe University, Melbourne

Life After Grief Darrelyn Gunzburg, 2004 Darrelyn Gunzburg explores how by using astrology we can learn to let go and encounter a changed future.

Genius on Television Ashley Lynn Carlson, 2015-07-11 Whether it's Sherlock Holmes solving crimes or Sheldon and Leonard geeking out over sci-fi, geniuses are central figures on many of television's most popular series. They are often enigmatic, displaying superhuman intellect while struggling with mundane aspects of daily life. This collection of new essays explores why TV geniuses fascinate us and how they shape our perceptions of what it means to be highly intelligent.

Examining series like Criminal Minds, The Big Bang Theory, Bones, Elementary, Fringe, House, The Mentalist, Monk, Sherlock, Leverage and others, scholars from a variety of disciplines discuss how television both reflects and informs our cultural understanding of genius.

What Do Dreams Do? Sue Llewellyn, 2020-10-09 We have puzzled over dreams for centuries. From ancient societies, believing dreams to be messages from the gods, Freud's theory of dreams revealing our unconscious minds to modern day experiments in psychology and neuroscience, dreams continue to fascinate but also be a source of mystery. Are dreams just mental froth or do they have a purpose? This book argues that, originally, we dreamed to survive. Dreaming brains identify non-obvious associations, taking people, places, and events out of their waking-life context to uncover complex and, seemingly, unrelated connections. In our evolutionary past, survival depended on being able to detect these divergent, associative patterns to anticipate what predators and other humans might do, as we moved around to secure food and water and meet potential mates. Making associations drives many, if not all, brain functions. In the present day, dream associations may support memory, emotional stability, creativity, unconscious decision-making and prediction, while also contributing to mental illness. Written in a lively and accessible style, and showing the reader how to identify patterns in their own dreams, this book presents a highly original theory of dreaming and will be a compelling read for anyone interested in psychology, consciousness, and the arts, as well as those involved in dream research.

Genetics of Criminal and Antisocial Behaviour Gregory R. Bock, Jamie A. Goode, 2008-04-30 This book offers a fresh perspective on the controversial topic of criminal and antisocial behavior. It synthesizes findings from behavioral and population genetics, evolutionary biology and criminology and presents the latest findings in twin studies, adoption cohort studies, molecular genetics and animal models for human aggression. Also included is a detailed analysis of the legal implications of genetics and crime research and strategies for rehabilitation.
