Jennifer Cook-DeRosa

How to Homeschool Your Child Ronald W. Holmes Ph.D.,2019-10-15 This book provides real-life experiences and tips from parents who have successfully homeschooled their children from the kindergarten to the high school level under different regulations, instructional options, and methods in the United States. Through extensive research, this book also provides useful and resourceful information about homeschooling for parents seeking an alternative school choice for educating their children.

Homeschool Rising Christy-Faith,2024-03-14 Take a good look at the reasons why homeschooling can help today's kids thrive *Homeschool Rising* is a guide for anyone interested in homeschooling their children, regardless of background. It busts through the myths surrounding homeschooling, reveals the failures of our current school system, and demonstrates how home education and loving, motivated parents can provide a solution for students and families everywhere. There are many assumptions made about homeschooling—that the child will be socially awkward due to lack of social interaction, that parents are not equipped to educate their children, that homeschooling is only for White, Christian, middle-class parents, and more. In *Homeschool Rising*, educator Christy-Faith offers insights from more than 20 years in the field and her experience working with thousands of students to debunk these myths and misconceptions. The truth is, homeschooling sets today's students up for success in a way that traditional schooling no longer can. This authoritative yet casual and accessible guide provides parents the tools, courage, and knowledge to opt out of the school system and take charge of their children's education. Clear up the confusion and misconception surrounding homeschooling See why homeschooling is a great option for kids of any race, religion, and background Gain the knowledge you need to start your kids off on the right foot with homeschooling Make sure your homeschooled kids are getting the support they need academically and socially New and experienced homeschoolers looking for support, as well as educators, psychologists, and others who work with homeschooled children, will love the clear, evidence-backed, and conversational information in *Homeschool Rising*.

Homeschooling in the United States Stacey Bielick,2001

Serving Homeschooled Teens and Their Parents Maureen T. Lerch,Janet Welch,2004-05-30 Today more than a million students are being educated at home; and that figure increases at a rate of 7-14% annually. Homeschooling is a growing trend in our society, and public librarians are being called upon with increasing frequency to serve the needs of

homeschooled students. So, just what are the needs of the homeschooled teen, and how can you and your library meet those needs? A former young adult librarian and a homeschool parent have joined forces to create this insightful guide and answer that question. After reviewing the developmental and social needs of teens, the authors demonstrate how those needs may be met in the public library setting. You'll find a wealth of ideas for adapting every facet of your library service for this growing population—from developing a homeschool collection to expanding services and creating special programs. You'll also find suggestions on how to market what your library has to offer to homeschoolers. You may even discover some new ways to employ the talents and time of these students and their families. Extensive resource lists conclude the volume, they will help you better serve home-educated teens and their parents.

Home Schooling In Full View Bruce S. Cooper, 2006-06-01 This book is a reader that describes, discusses and analyzes homeschooling from an array of different and international perspectives. We portray the energy of this movement, looking at the history of “education writ large” in a larger social, political and religious context. Like most movements in education, this one is both a reaction to the problems and inadequacies of existing schools, and a new direction in schooling that stands on its own. This book grew out of the efforts of Associates for Research on Private Education (ARPE), an international organization of scholars and practitioners affiliated with the American Education Research Association (AERA), which has spurred interest and research on private schools for over 30 years. ARPE publishes quarterly, the Private School MONITOR, as a means for highlighting the newest developments in the field of private education.

Homeschooling in America Joseph Murphy, 2014-02-04 This revealing and balanced portrait of homeschooling today provides a full history of the movement, demographic insights, and extensive research on how homeschooled children fare in the United States. Delving into a movement that impacts more students nationwide than the entire charter school movement, this book explores: • The history of homeschooling in America • How this movement has grown in credibility and enrollment exponentially • The current state of homeschooling, including questions about who gets homeschooled, why, and what is the success—academically and in life—of students who are homeschooled • The impact of homeschooling on the student and on American society In 2010, more than two million students were homeschooled. In the most extensive survey and analysis of research on homeschooling, spanning the birth of the movement in the 1970s to today, *Homeschooling in America* shines a light on one of the most important yet least understood social movements of the last forty years and explores what it means for education today.

The Wiley Handbook of Home Education Milton Gaither, 2016-12-12 The Wiley Handbook of Home Education is a comprehensive collection of the latest scholarship in all aspects of home education in the United States and abroad. Presents the latest findings on academic achievement of home-schooled children, issues of socialization, and legal argumentation about home-schooling and government regulation A truly global perspective on home education, this handbook includes the disparate work of scholars outside of the U.S. Typically understudied topics are addressed, such as the emotional lives of home educating mothers and the impact of home education on young adults Writing is accessible to students, scholars, educators, and anyone interested in home schooling issues

Officials Asking about Your Homeschooled Kids? Dr David Powers, 2021-08-31 What do you do if someone knocks on your door asking about your homeschooled kids? Why do I need this? In many parts of the United States, and especially the rest of the world, homeschooling is under attack. Prior to the pandemic, homeschoolers were merely a thorn in the side of many school districts. Post-pandemic with so many more parents choosing to deschool their kids and pull them out of the public school system, homeschooling has become a danger to the school systems. School budgets are almost always driven by the number of enrolled students. If the number drops because more children leave the system, so does their budget. It is in the local school district's best interests to force your children back into the public school system. No matter what your state laws are regarding homeschooling, many public school officials will still try to intimidate or harass parents into enrolling their children into public school based on their ignorance of the law, yours, or both. This packet will help you avoid or abate their efforts by standing up for your parental rights and your children. Am I being paranoid? Absolutely not. You're simply being prepared. Your parental rights and your freedom to educate your kids is worth being prepared for. Only an irresponsible parent wouldn't be ready to defend and protect their kids and do what's best for their education. Is this legal advice? Absolutely not. I am not an attorney, and I do not give legal advice. This guide is general in nature, is not intended to apply in all situations, and should not be considered legal advice in any way. Please consult your own attorney to ask for general or specific guidance for your own affairs. Is this information useful outside of homeschooling? Yes. These guidelines are written from the point-of-view of a visitor to your home inquiring about homeschool and your children. However, much of the information contained herein is good information to have and to put into practice for the general safety and welfare of you, your home, and your kids ALL the time. Remember at all times that these people are on your private property. This gives you more rights than you would have elsewhere, but be smart in utilizing these rights. Time and place are very important. Dr.

Dr. Powers has been homeschooling for almost two decades and has written other books related to homeschooling as well

Homeschool Your Child for Free LauraMaery Gold,Joan M. Zielinski,2009 Collects curriculum plans, legal guidelines, online resources, teaching tips, and lesson plans for teaching art, music, language, mathematics, history, social studies, and science to homeschooled students.

Homeschooling Heidi Watkins,2013-06-21 This thought-provoking book explores issues and trends related to the growing practice of homeschooling. Readers will examine whether homeschooling produces positive academic outcomes, whether homeschooling supports or violates progressive values, and whether Christian homeschooling limits or expands children's' options. Essay sources include The Old Schoolhouse Magazine, Kathryn Joyce, Conor Friedersdorf, and Alexandra Jacobs.

Homeschooling in the 21st Century Robert Maranto,Debra A. Bell,2018-10-18 Education began on the most intimate levels: the family and the community. With industrialization, education became professionalized and bureaucratized, typically conducted in schools rather than homes. Over the past half century, however, schooling has increasingly returned home, both in the United States and across the globe. This reflects several trends, including greater affluence and smaller family size leading parents to focus more on child well-being; declining faith in professionals (including educators); and the Internet, whose resources facilitate home education. In the United States, students who are homeschooled for at least part of their childhood outnumber those in charter schools. Yet remarkably little research addresses homeschooling. This book brings together work from 20 researchers, addressing a range of homeschooling topics, including the evolving legal and institutional frameworks behind home education; why some parents make this choice; home education educational environments; special education; and outcomes regarding both academic achievement and political tolerance. In short, this book offers the most up-to-date research to guide policy makers and home educators, a matter of great importance given the agenda of the current presidential administration. The chapters in this book were originally published as articles in the Journal of School Choice.

Homeschooling Myths Amy Earls,2021-09-13 Homeschooling has been in the educational mainstream for a few decades now. Over two million school-age children (K-12) are currently being homeschooled, and the number keeps going up. This is not a new phenomenon, and you can successfully teach your children at home. However, even with the rising number

of homeschooled children in the United States, there are several myths that continue to make people question this viable, educational method. In *Homeschooling Myths: A Personal Perspective*, Amy Earls tells about her own experiences when encountering the various myths that concerned people felt the need to confront her with. While it is possible to find all sorts of helpful websites that talk about homeschooling myths, few share personal experiences related to those myths. Here, Amy talks about how she has handled each myth presented to her and why the myth is, in her opinion, just that-a myth. Within the book, you will also find several quotes that pertain to homeschooling myths, educational quotes, and a brief description of the various methods of homeschooling. You might also encounter a few reasons for homeschooling that might resonate with you, personally. It is Amy's sincere hope that this book will help you in your own homeschooling journey or even help you determine if homeschooling is right for your family. If you have family members or friends that are questioning your decision to homeschool, pass this book along to them. Maybe it will help. If you are not in agreement with your loved one's decision to homeschool, perhaps this book will open your mind to the possibilities and opportunities that this educational method offers.

Homeschooling Michael Wenkart, 2014-03-20 Estimates suggest there are around 1.5m Americans who have turned to homeschooling for their children (and this is probably a significant underestimate). Whether this is due to a perceived failing in the state education system, religious or political convictions or the need to accommodate some special need of the student or family, it is an issue that causes controversy and, undoubtedly raises very serious questions about the state of future generations of American citizens. Advocates of the system claim it improves the education of the child, shapes it more to their needs and aptitudes and leads to a more rounded individual experience. Critics claim it undermines the public school system, makes children more narrow and prejudiced in their outlook and doesn't offer any significant advantages academically. So who is right? As with all such debates there is a high degree of subjectivity involved when assessing claims and counterclaims. It is difficult to substantiate or disprove a lot of these and not enough objective, scientific research has been conducted to come up with conclusive results either way. Many who have used the system are very happy with the results though they assert it is hard work and requires lots of commitment (and often cost). A few are honest enough to admit there are considerable drawbacks and that the concept is not suitable for everyone - adults or children. A lot of its critics are opposed to it on political grounds claiming it is a reactionary idea that breeds inequality and perpetuates right-wing principles. Others oppose the association with religious beliefs, though there is no strong evidence that this is a major factor in most decisions to homeschool. Homeschooling has had a long, hard road to acceptance. It has been equated with truancy and illegality and has been criticized and pilloried often by people who know little about it. Its practitioners have been branded as 'kooks', religious fanatics, right-wing pedagogues and many other things. Some of these accusations might be founded but the average homeschooler is probably none of these. In fact they are probably just that - average. Many will agree it is a parent's right to give their children the best possible education and it is an issue of choice, freedom and

independent thinking. Whether this is largely beneficial or detrimental will ultimately be down to the perspective of individuals as they consider the pros and cons.

Homeschooling for Success Rebecca Kochenderfer, Elizabeth Kanna, Founders Homeschool.com, Robert T. Kiyosaki, 2009-02-28 This practical, hands-on guide from the No. 1 homeschooling Web site gives readers everything they need to create a customized education plan that works with children's unique intelligence and learning style. Veteran homeschoolers and interested newcomers alike can benefit. (July)

Homeschooling in New View Bruce S. Cooper, Frances R. Spielhagen, Carlo Ricci, 2016-01-01 Home schooling is an important and growing American phenomenon with only our first edition in the field. This new 2nd edition will appeal to the home school world, people interested in American education, and the private school community. Changes in the educational environment in the US over the last ten years have prompted growing numbers of parents to withdraw their children from public education. Currently, four percent of school-age children in the United States are home schooled. An array of educational researchers present various legal, philosophical, and personal perspectives to this new volume. Changes in schooling and home schooling in Great Britain bring an interesting international perspective to this collection of research-based information.

The New Face of Education Jeannie A. Gudith, 2012-03-22 In this book lies the secret to creating the ideal education for your child. Here you will discover that you, the parent, are the one person who can help your child receive the best education possible. With clear and simple guidance, Jeannie Gudith explores the full meaning of homeschool and presents a step-by-step framework for creating the educational practices that will enhance and fulfill your child's individual intelligence. According to the author, we as parents are the only ones who truly know our children, and therefore, we can provide them with the love, guidance, and support they need to accomplish all their goals. Through a series of simple steps and everyday actions, we can gently foster the passions, abilities, and love of learning that all children possess. The new face of education has begun.

Homeschooling and Libraries Vera Gubnitskaia, Carol Smallwood, 2020-04-20 As families are looking for better ways to educate their children, more and more of them are becoming interested and engaged in alternative ways of schooling that are different, separate, or opposite of the traditional classroom. Homeschooling has become ever more creative and varied as families create custom-tailored curricula, assignments, goals, and strategies that are best for each unique child. This presents a multitude of challenges and opportunities for information institutions, including public, academic, school, and special libraries. The need for librarians to help homeschool families become information and media literate is more important than ever. This collection of essays provides a range of approaches and strategies suggested by skilled professionals as well as veteran homeschool parents on how to best serve the diverse needs and learning experiences of

homeschooled youth. It includes information on needs assessments for special needs students, gifted students, and African American students; advice on how to provide support for the families of homeschoolers; case studies; and information on new technologies that could benefit libraries and the homeschooler populations that they serve.
