Lifelong Learning in Action Norman Longworth, 2003-12-16 Since the concept of lifelong learning came to prominence much excellent work has been undertaken but, as Professor Longworth's new book shows, major change in some areas is still needed if the concept of learning from cradle to grave is to become a true reality. Using his unique vantage point from consulting with schools, universities, local, governmental and global authorities, Professor Longworth brings the development of lifelong learning bang up-to-date with a complete survey of the principles of lifelong learning including examples from around the world and crucial information on the impact of lifelong learning on 21st century schools.

Patterns for Lifelong Learning Theodore Martin Hesburgh, Paul A. Miller, Clifton R. Wharton, 1973

Lifelong Learning in Action John Cribbin, Peter Kennedy, 2002-03-01 Lifelong Learning is now central to the Hong Kong education reform agenda. As a recent Education Commission Report put it, 'lifelong learning is the key to Hong Kong's success'. This book focuses on the post-secondary, continuing and professional education (CPE) sector. It includes contributions from Hong Kong practitioners in the field as well as from eminent international scholars who are well acquainted with CPE in Hong Kong. The book is in three parts. The first part traces recent developments in CPE in Hong Kong and offers an up-to-date account of policy, programmes and provision. A profile of lifelong learners, drawing on recent research findings, is also provided. In the second part, practitioners from a diverse range of subject disciplines offer their perspectives on the issues. This part of the book contains a wealth of ideas and examples illustrating the practice of lifelong learning in Hong Kong. The third part examines the forces shaping post-secondary education in Hong Kong and explores emergent issues. Topics discussed include: the convergence of higher and continuing education, work-based learning, cross-

border collaborations with mainland China, Hong Kong vocational education and training policy, and the legal challenges posed by on-line learning. Written primarily for academic managers and teachers in the adult and continuing education sector, this book will also be of interest to (postgraduate) students of lifelong learning, comparative education researchers, CPE policy-makers, employers and human resources managers. It is a timely contribution to the current debate on the future shape of education in Hong Kong. The two Editors' combined experience in tertiary sector teaching and administration totals 57 years. They are now both working in the School of Professional and Continuing Education, The University of Hong Kong (HKU SPACE). John Cribbin is the School Secretary and Registrar; a graduate of University College London and Leicester University, he has previously worked at King's College London and the UK Open University. Peter Kennedy is a Senior Programme Director responsible for programmes in the fields of human resource management and training, as well as in English and theatre studies.

Lifelong Learning in Higher Education Christopher Knapper, A. J. Cropley, 2000 This text examines how colleges and universities might respond to the increasing need for people to take responsibility for their own education and to remain motivated. It devotes attention to teaching methods, organizational structures and the goals of higher education.

Lifelong Learning for an Aging Society, 1991

Taiwan's Senior Learning Movement Brian Findsen, Hui-Chuan Wei, Ai-tzu Li, 2022-04-15 This volume provides an in-depth analysis of historical and recent developments of senior learning in Taiwan, where publications in English have been scant. It takes a broader view on lifelong learning and active ageing from a theoretical/conceptual base written by prominent international authors- this represents the 'outside in' perspective. The 'inside out' on the other hand signifies an in-depth investigation of initiatives written by authors from Taiwan who are closely involved with developments in policy and practice. The volume is situated theoretically in the intersection of complementary concepts such as lifelong learning, active ageing, later life learning, learning communities and social movements. It is located geographically and culturally in East Asia where senior learning/education is expanding in response to large populations of older adults and concerns about their physical and social well-being. It is argued that Taiwan is leading the way in terms of innovation and community engagement in regard to older adult learning/education and can thus serve as a model for neighboring countries. By analyzing historical precedents, cultural dynamics, policy trends, research sub-fields and community engagement this book is of interest to both East Asian and Western scholars, practitioners, policy-makers and students amongst the fields of lifelong learning, social gerontology and educational psychology.

A-Z Of Lifelong Learning Tummons, Jonathan, Powell, Sharon, 2014-06-01 The book covers a list of key topics that are central or even 'troublesome' in lifelong learning with each entry offering a critically informed and up-to-date introduction to the topic.

Curriculum Studies in the Lifelong Learning Sector Jonathan Tummons, 2012-05-18 Curriculum is a key issue for trainee teachers in the lifelong learning sector and a core component of most courses. It lies at the heart of the work of teachers and trainers, it shapes the programmes and courses that are taught, and dictates which students can have access to courses. What goes in to the curriculum is argued over by governments, employers, parents and educationalists. How the curriculum is funded can change on a yearly basis. Access to a particular curriculum can raise or diminish the life chances of the learners involved. This book provides an accessible and up-to-date overview of the key issues surrounding the curriculum. Written for all those working towards QTLS, it provides examples and case studies from working FE colleges, adult education centres and work-based learning contexts as well as offering succinct summaries of key theories and debates relating to the curriculum. This fully revised Second Edition reflects the latest policies and thinking, has a new chapter on the implications of e-learning on curricula, and includes a full glossary of key terms and concepts. Jonathan Tummons has worked in higher education since 1995. After six years as a lecturer in teacher education in the further education sector, in 2009 he took up his current post as senior lecturer in education at Teesside University where he is also research co-ordinator for education and a member of the management board for the Social Futures Institute, Teesside's research centre for the social sciences.

Lifelong Learning and the University David Watson, Richard K. S. Taylor, 1998 This book gives a description of what a UK higher education system that is genuinely part of a national learning society might look like, as well as the impetus this provides for radical reform.

Making Lifelong Learning Work Longworth, Norman (Vice President, World Initiative on Lifelong Learning), 2019-01-04 This text outlines the future roles of schools, business and industry, higher and adult education. Lifelong Learning in the UK Anne O'Grady, 2013-06-03 Written specifically for Education Studies students, this accessible text offers a clear introduction to lifelong learning and the impact it has on all areas of society. Assuming no prior knowledge of the subject, it explores what lifelong learning is, where learning can and does take place and who is accessing it. Offering a clear overview of the different strands to lifelong learning, the book examines the concept of lifelong learning drawing on key policy initiatives and strategies. Each section outlines the types of individuals who are most likely to access lifelong learning within and across these strands including, for example, migrants, refugees and asylum seekers, unemployed adults, carers and guardians, older age-groups and returning learners. Chapters cover: adult and community learning; higher education; further education; work-based learning; prison and probation learning. Including supporting tasks and reflection activities, this textbook will give students a broad understanding of lifelong learning and its role in supporting adults throughout their life both socially and economically. *Lifelong Learning in the UK* is an essential introductory text for students on undergraduate courses in Education Studies.

Lifelong Learning Jim Crowther, Peter Sutherland, 2008-03-25 Lifelong learning has developed enormously as a distinct area of study within education in recent years not least because numerous governments and educational strategists have become very vocal supporters of new ways of learning throughout all stages of life. This guide to the topic brings together

new writing from some of the leading thinkers in the field to offer a broad ranging and detailed snapshot of the position to date. The book provides a critical summary of current developments in understanding adult learning and the social context in which they are located. This provides a background for the framing of issues and the problems that emerge in institutional and non-formal contexts of lifelong learning. Students undertaking courses of study in this area as well as a wide range of undergraduate and postgraduate students in a variety of professional areas will find the material essential reading.

The Concepts and Practices of Lifelong Learning Brenda Morgan-Klein, Michael Osborne, 2007-12-17 This textbook gives a wide-ranging, research-informed introduction to issues in lifelong learning across a variety of educational settings and practices. Its very accessible approach is multi-disciplinary drawing on sociology and psychology in particular. In addition, issues are discussed within an international context. While there has been a proliferation of texts focussing on particular areas of practice such as higher education, there is little in the way of a broad overview. Chapters one to four introduce various conceptions of lifelong learning, the factors that impinge on learning through the life course, and the social and the economic rationale for lifelong learning. Chapters five-ten consider the varied sites of lifelong learning, from the micro to macro (from the home to the region to the virtual). Chapter eleven draws the strands together in the context of turbulence and continuing transition in personal and work roles, and against the background of future technological development. This timely overview will be relevant to education and training professionals, education studies students and the general reader.
