*Diversity, Accessibility, and Quality* Clifford F. Sjogren,1986-01-01 Aspects of American education that have particular importance to student exchange programs are discussed in order to assist non-Americans. In addition to philosophical assumptions underlying American education, attention is directed to organization and control, different kinds of institutions and programs, methods of measuring student performance, and quality control mechanisms. Specific topics include: college administration and external and internal controls of higher education institutions, admissions, accreditation, external standardized examinations, credit by examination, classroom examinations, grading, student retention, and costs and financial aid. The following types of schools are covered: elementary and high schools, two-year colleges, four-year liberal arts colleges, other four-year colleges, universities, and other institutions. Programs at the following levels are considered: high school diploma, associate degree, bachelor's degree, master's degree, doctor of philosophy degree, professional degrees, special degrees related to the medical field, non-degree-seeking students, and adult and continuing education. Included are a secondary school record transcript, a glossary, and a diagram illustrating the structure of United States education. (SW)

**Graduate and First-professional Students** Susan P. Choy,Ron Moskovitz,Andrew G. Malizio,1998 This booklet summarizes findings from the National Postsecondary Student Aid Study, concerning graduate and first-professional students. The booklet's introduction indicates that, of the 2.8 million postsecondary students enrolled in 1995-96, 56 percent were enrolled in master's degree programs, 12 percent in doctoral programs, 12 percent in first-professional programs, and 20 percent in nondegree programs. The next section provides more detail on master's degree students, breaking down enrollments into the following categories: business administration (where 51 percent of students received financial aid); education (where 41 percent received aid); and arts or science (where 58 percent received aid). The section on doctoral

degree students notes that 70 percent were in Ph.D. programs, 12 percent in Ed.D. programs, and 18 percent in other doctoral programs. This section notes that while two-thirds of Ph.D. students received financial aid, relatively few Ed.D. students received financial aid, reflecting the predominantly part-time enrollment and full-time employment of ED. students. The section on first-professional students notes that 74 percent borrowed money to finance their education an average of \$47,700 for law students and \$55,900 for medical students graduating in 1995-96. Data are presented in 10 tables and charts. (DB)

International Student Recruitment and Mobility in Non-Anglophone Countries Hans de Wit,Ekaterina Minaeva,Lizhou Wang,2022-02-24 International Student Recruitment and Mobility in Non-Anglophone Countries offers a detailed analysis of global dimensions and trends in international student mobility and recruitment. It examines current data on student flows, policies and instruments, obstacles and opportunities for recruitment, and the roles of multiple stakeholders from different parts of the world. Considering the current geopolitical developments and tensions, increased competition for global talent, health and sustainability concerns, growing nationalism, and other factors, non-Anglophone countries are likely to increase their recruitment efforts moving forward. This book highlights the initiatives and instruments of these countries to attract international students and build long-term internationalization strategies. With case studies from Africa, Asia, Europe, the Middle East, and Latin America, International Student Recruitment and Mobility in Non-Anglophone Countries is a must-read text for international education policy advisors at the national and institutional levels and in the international higher education industry around the globe.

First-Generation College Students Lee Ward,Michael J. Siegel,Zebulun Davenport,2012-05-25 FIRST-GENERATION COLLEGE STUDENTS ...a concise, manageable, lucid summary of the best scholarship, practices, and future-oriented thinking about how to effectively recruit, educate, develop, retain, and ultimately graduate first-generation students. —from the foreword by JOHN N. GARDNER First-generation students are frequently marginalized on their campuses, treated with benign disregard, and placed at a competitive disadvantage because of their invisibility. While they include 51% of all undergraduates, or approximately 9.3 million students, they are less likely than their peers to earn degrees. Among students enrolled in two-year institutions, they are significantly less likely to persist into a second year. First-Generation College Students offers academic leaders and student affairs professionals a guide for understanding the special challenges and common barriers these students face and provides the necessary strategies for helping them transition through and graduate from their chosen institutions. Based in solid research, the authors describe best practices and include suggestions and techniques that can help leaders design and implement effective curricula, out-of-class learning experiences, and student support services, as well as develop strategic plans that address issues sure to arise in the future. The authors offer an

analysis of first-generation student expectations for college life and academics and examine the powerful role cultural capital plays in shaping their experiences and socialization. Providing a template for other campuses, the book highlights programmatic initiatives at colleges around the county that effectively serve first-generation students and create a powerful learning environment for their success. First-Generation College Students provides a much-needed portrait of the cognitive, developmental, and social factors that affect the college-going experiences and retention rates of this growing population of college students.

**Never Too Late** Rebecca Klein-Collins, 2018-12-18 A smart, snappy, and comprehensive guide for the millions of adults who are thinking about going—or going back—to college and want to know how to do it right. As anyone who has done it knows, going back to school is a major undertaking. For younger and older adults alike, starting or returning to school presents different challenges than those encountered by teens fresh out of high school and heading straight to college. Countless Americans take on this task while working, raising kids, caring for parents, volunteering, serving in the military—and in some cases all of the above. Although the non-traditional undergraduate student is in fact the new normal, the glut of college guides out there don't include practical advice for the busy moms, frustrated employees, and ambitious adults who are applying to college or hoping to finish earning a degree. *Never Too Late* will help readers jump-start a new professional path or speed down the one they're already on by guiding them through vital questions: What should I study? How can I afford the time and money required to get a college degree? How do I compare schools? With key chapters on flexibility (It's About Time! and Face-to-Face or Cyberspace?) and rankings of the best colleges for grown-ups diving back into the books, *Never Too Late* is an essential reference for adults seeking a richer life—and a meaningful place in our rapidly changing economy and world.

Non-market Entrepreneurship G. E. **The Transfer Experience** John N. Gardner, Michael J. Rosenberg, Andrew K. Koch, 2023-07-03 Co-published with At last there is a handbook that everyone in higher education can use to help increase transfer student success. This comprehensive resource has been brought together to meet the need for a truly holistic approach to the transfer experience. The book brings together research, theory, practical applications, programmatic illustrations, case studies, encouragement, and inspiration, and is supplemented by an online compendium for continual updates of resources, case studies, and new

developments in the world of transfer. Based on a totally different way of thinking about, understanding, and acting to increase transfer student success, *The Transfer Experience* goes far beyond the traditional, limited view of transfer as a technical process simply about articulating credits, a stage of student development, or a novel enrollment management strategy. Rather, the book introduces a stimulating array of new perspectives, resources, options, models, and recommendations for addressing the many needs of this huge cohort – making the academic, civic, and social justice cases for improving transfer at both transfer-sending and transfer-receiving institutions.

An Administrator's Guide to Online Education Kaye Shelton, George Saltsman, 2005-11-01 *An Administrator's Guide to Online Education* is an essential resource for the higher education administrator. Unlike most books regarding online education, this book is not about teaching; it is about effectively administering an online education program. Grounded in existing distance education theory, and drawing from best practices, current research, and an extensive review of current literature, *An Administrator's Guide to Online Education* systematically identifies and discusses seven key issues that affect the practice of online education today: leadership and strategic planning, policy and operation, faculty, online student services, online student success, technology and the courseware management system, and finally marketing. Throughout the text, the authors provide case studies, examples, policies, and resources from actual institutions, which further enhance the value of this text. *An Administrator's Guide to Online Education*, encompasses the issues and provides information on how to accomplish one specific task: successful online education administration.

Make College Your Superpower Anna Esaki-Smith, 2024 This book provides a new, innovative way for students to navigate the college application landscape. It shows students how selecting a college can be a strategic tool to direct one's future, rather than a frenzied exercise in applying to what others have deemed the best universities for everyone regardless of their career goals--

Dr. Stanley taught several undergraduate and graduate courses for majors and nonmajors, including poultry science, animal breeding and genetics, and animal nutrition, and he is the recipient of numerous college and university awards for excellence in research, teaching, advising, and mentoring. At the end of his career at Prairie View A&M University, he has successfully mentored twenty-four students toward the PhD degree in the United States and Canada and, additionally, thirty-five students toward the pursuit of a DVM degree.
