Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young

Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Family Involvement in Children's Education Janie E. Funkhouser, Miriam R. Gonzales, 1997 Schools that are most successful in engaging parents and other family members in support of their children's learning look beyond traditional definitions of parent involvement--parent teacher organizations or signing report cards--to a broader conception of supporting families in activities outside of school that can encourage their children's learning. This idea book is intended to assist educators, parents, and policy makers as they develop school-family partnerships, identifying and describing successful strategies used by 20 local Title I programs. Following an executive summary, the book notes resources for involving families in education, includes research supporting such partnerships, and describes how Title I encourages partnerships. Next, the book describes successful local approaches to family involvement in education, organized around strategies for overcoming common barriers to family involvement, including: (1) overcoming time and resource constraints; (2) providing information and training to parents and school staff; (3) restructuring schools to support family involvement; (4) bridging school-family differences; and (5) tapping external supports for partnerships. Finally, the book presents conclusions about establishing and

sustaining partnerships, noting that at the same time that successful partnerships share accountability, specific stakeholders must assume individual responsibility, and that those schools that succeed in involving large numbers of parents invest energy in finding solutions for problems, not excuses. Four appendices present profiles of 10 successful partnerships, descriptions in table format of 20 successful local approaches, contact information for profiled partnership programs, and resources for building successful partnerships. Contains 13 references. (HTH)
