Parents and Families of Students With Special Needs Vicki A. McGinley, Melina Alexander, 2017-01-05 Parents and Families of Students With Special Needs: Collaborating Across the Age Span teaches students the skills they need to effectively collaborate with parents and families to ensure a child's success in the classroom. Authors Vicki A. McGinley and Melina Alexander's text takes a lifespan approach with a special emphasis on the critical transition points in a child's life. Information is provided on what can be seen at each stage of an individual with disabilities' development, and addresses concerns and needs that families may have during these unique phases of growth. Chapters written by professors and professionals who are also parents of students with special needs bring a diverse range of voices into the narrative. The authors provide an in-depth discussion of how parents and families are affected by particular disabilities, family system theory, the laws that affect individuals with disabilities, and assessments for individuals with disabilities.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8;

universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Single Parents Families Rae Simons, 2015-02-03 Maybe you've heard the statistics about children growing up in single-parent families. According to a lot of the research, these kids are more likely to struggle in school, have difficulties with the law, and deal with drug and alcohol abuse-along with other problems. But does growing up with a single parent have to mean these things will happen? Are these children going to lead worse lives than those with two parents? This book tells the stories of several single-parent families, their struggles, and the things they have learned from their situations. These families are not concerned with the statistics, but with making their families and themselves the best they can be.

Divided Families Frank F. Furstenberg, Andrew J. Cherlin, 1991 Explores the effects of divorce on children and their parents.

From Parents to Children John Ermisch, Markus Jantti, Timothy M. Smeeding, 2012-05-01 Does economic inequality in one generation lead to inequality of opportunity in the next? In *From Parents to Children*, an esteemed international group of scholars investigates this question using data from ten countries with differing levels of inequality. The book compares whether and how parents' resources transmit advantage to their children at different stages of development and sheds light on the structural differences among countries that may influence intergenerational mobility. How and why is economic mobility higher in some countries than in others? The contributors find that inequality in mobility-relevant skills emerges early in childhood in all of the countries studied. Bruce Bradbury and his coauthors focus on learning readiness among young children and show that as early as age five, large disparities in cognitive and other mobility-relevant skills develop between low- and high-income kids, particularly in the United States and the United Kingdom. Such disparities may be mitigated by investments in early childhood education, as Christelle Dumas and Arnaud Lefranc demonstrate. They find that universal pre-school education in France lessens the negative effect of low parental SES and gives low-income children a greater shot at social mobility. Katherine Magnuson, Jane Waldfogel, and Elizabeth Washbrook find that income-based gaps in cognitive achievement in the United States and the United Kingdom widen as children reach adolescence. Robert Haveman and his coauthors show that the effect of parental income on test scores increases as children age; and in both the United States and Canada, having parents with a higher income better the chances that a child will enroll in college. As economic inequality in the United States continues to rise, the national policy conversation will not only need to address the devastating effects of

rising inequality in this generation but also the potential consequences of the decline in mobility from one generation to the next. Drawing on unparalleled international datasets, *From Parents to Children* provides an important first step.

We Are Family Susan Golombok, 2022-02-10 An insight into new ways of becoming a parent by a world-leading expert. Two Homes, One Childhood Robert E. Emery Ph.D.,2016-08-09 A paradigm-shifting model of parenting children in two homes from an internationally recognized expert. A researcher, therapist, and mediator, Robert Emery, Ph.D., details a new approach to sharing custody with children in two homes. Huge numbers of children are affected by separation, divorce, cohabitation breakups, and childbearing outside of marriage. These children have two homes. But their parents have only one chance to protect their childhood. Building on his 2004 book *The Truth About Children and Divorce* and a strong evidence base, including his own research, Emery explains that a parenting plan that lasts a lifetime is one that grows and changes along with children's—and families'—developing needs. Parents can and should work together to renegotiate schedules to best meet the changing needs of children from infancy through young adult life. Divided into chapters that address the specific needs of children as they grow up, Emery: • Introduces his Hierarchy of Children's Needs in Divorce • Provides specific advice for successful parenting, starting with infancy and reaching into emerging adulthood • Advocates for joint custody but notes that children do not count minutes and neither should parents • Highlights that there is only one "side" for parents to take in divorce: the children's side Himself the father of five children, one from his first marriage, Emery brings a rare combination of personal and professional insight and guidance for every parent raising a child in two homes.

Modern Families Susan Golombok,2015-03-12 This book provides an expert view of research on parenting and child development in new family forms.

New Ways to Engage Parents Patricia Edwards,Catherine Compton-Lilly,2016-05-06 Just as populations change, ideas about how to encourage and work with parents also need to evolve. This practical resource by bestselling author Patricia Edwards provides school leaders and classroom teachers with new and creative ways in which to welcome, encourage and involve parents. Enacting these types of practices requires a special kind of commitment from teachers and school leaders, which often coincides with a particular kind of mindset about families and one's responsibility to engage them. Educators often develop this mindset as they depend their understanding of families, literacy/language, culture/race/class, and themselves. Edwards pulls these understandings together and presents them in a straightforward, concise, and easy-to-use guide that is perfect for professional learning communities and teacher preparation courses. *New Ways to Engage Parents* is essential reading for all educators who care deeply about engaging a wide range of parents in today's schools. The book features: a stark look at the changing community demographics and what that means for teachers and administrators; strategies for communicating with parents; examples of how to bring parents together for meaningful activities; the importance of understanding parental constraints and the need to meet them halfway; and approaches for overcoming school ghosts as well as negative histories and perceptions in the community.

The Leader in Me Stephen R. Covey,2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be

a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Handbook of Diversity in Parent Education Marvin J. Fine, Steven W. Lee, 2000-10-09 Traditionally, books on parent education have focused on techniques from a certain tradition, either behavioral or humanistic, that could be applied to any problem of parenting or child behavior change. These books have used a cook-book approach that is frequently oblivious to environmental conditions that influence behavior or take into account the individual differences of the children or families involved. This book highlights the complexity of our society and times by exploring the problems faced by diverse types of parents, children, and parenting situations. Moreover, the sensitive issues of parenting in unique populations are handled in a caring, straight-forward way with an emphasis on research-based parent education programs along with tips and strategies for everyday use.
