Proactive Professional Learning Oran Tkatchov, Mary Tkatchov, 2020-01-09 In America, the average person will spend 90,000 hours at work, or about a quarter of his or her adult life. Job satisfaction, then, can have an enormous influence on quality of life. Unfortunately, many in the workforce will spend all or a portion of their work life feeling stagnant and lacking passion for their job. The choices organizational leaders make about staff development can influence the organization's success. Being proactive and intentional about how professional learning opportunities are selected and incorporated into the learners' professional lives will optimize the benefits for employers, employees, and the students, customers, or clients they serve. The topic of this book, proactive professional learning, is a way to create a rewarding, highly effective work environment that makes people want to get the most out of their work experience, and in doing so, optimize the effectiveness of the organization that employs them.

Increasing emphasis is being placed on the importance of high-quality leadership to meet these challenges. This book provides a rich range of case studies and theoretical and methodological perspectives on the practical leadership tasks that underpin educational change. Section 1 focuses on the nature of professional learning and the policy context in which educational reform takes place. Section 2 explores the forms of leadership relevant to the differing contexts of professional development. Section 3 explores mentoring, peer coaching, team and group work. These processes are examined through international experience and by reference to work in other professions. Section 4 analyses the experience of evidence based work in medicine and the health service and the potential of applying this to education. The section reviews contested views on this theme.
