Voices of Change C. Raymond Anderson, American Association of Colleges for Teacher Education, 1993-01-01 The Ford Foundation Clinical Schools Project was designed to assist higher education institutions, school systems, and teachers' professional organizations to collaborate in creating for teacher education the equivalent of the medical profession's teaching hospitals. Seven sites implemented experimental clinical training programs in six states: Florida, Kentucky, Maine, New York, Pennsylvania, and Washington. The project descriptions in this report provide names of the participating agencies and schools, numbers of interns served and length of field service, and statements that highlight the general focus of each project's involvement in the clinical practice component of preservice teacher education. Also outlined are selection criteria for selecting school sites, clinical trainers, and interns; provision of a training component for clinical trainers and preservice teachers; and evaluation and documentation activities. The voices of teachers, student teachers and interns, school and college/university faculty, and administrators are heard in: reflections on feedback to interns; the multiple aspects of diversity in school settings; the impact of the project on professional roles, institutional barriers to collaboration, and communication within and among institutions; contributions to the knowledge base for teaching and the school curriculum; and results and recommendations that emerged from the project. Essentials of Educational Psychology Jeanne Ellis Ormrod, 2012 Unlike most educational psychology books, which take one theory at a time, explain its assumptions and principles and then identify implications for educational practice,

Essentials of Educational Psychology focuses more on the commonalities than the differences among theories, because although researchers from different traditions have approached human cognition and behavior from many different angles, they sometimes arrive at more or less the same conclusions. This book integrates ideas from many theoretical perspectives into a set of principles and concrete strategies that psychology as a whole can offer you. See for Yourself exercises will help you discover more about yourself as a thinker and learner and also help you come to a deeper and more personal understanding of educational psychology's core ideas. Supervising Student Teachers Alexander Cuenca, 2013-02-11 The student teaching experience is often considered one of the most influential aspects of teacher preparation. Key in the success of student teaching is the university supervisor. During the student teaching experience, the university supervisor is mainly responsible for helping pre-service teachers relate university coursework with the situated experiences in schools. However, much like the various other spaces and places in teacher education, facilitating teacher learning is an incredibly complex endeavor. This edited volume addresses the complexities of supervising student teachers from three distinct vantage points. First, salient issues regarding the supervision of student teachers such as the preparation of novice supervisors, negotiating power in the student teaching triad, and the low status of clinical teacher education are examined. Second, different pedagogical frameworks for the work of supervision are provided such as care theory, teacher education for democracy, and social justice. Finally, future directions for field-based teacher education are discussed, such as a call to reconsider where supervision takes place, the necessity to develop a pedagogy of supervision, 21st century trends facing clinical teacher education, and the value added by university supervisors to teacher development. Each of these chapters engage the supervision of student teachers through a mix of research, theory, and personal stories from the field. As such, this edited volume is designed for new supervisors, veteran supervisors, and supervision scholars.

Brown Girl Dreaming Jacqueline Woodson,2016-10-11 Jacqueline Woodson's National Book Award and Newbery Honor winner is a powerful memoir that tells the moving story of her childhood in mesmerizing verse. A President Obama O Book Club pick Raised in South Carolina and New York, Woodson always felt halfway home in each place. In vivid poems, she shares what it was like to grow up as an African American in the 1960s and 1970s, living with the remnants of Jim Crow and her growing awareness of the Civil Rights movement. Touching and powerful, each poem is both accessible and emotionally charged, each line a glimpse into a child's soul as she searches for her place in the world. Woodson's eloquent poetry also reflects the joy of finding her voice through writing stories, despite the fact that she struggled with reading as a child. Her love of stories inspired her and stayed with her, creating the first sparks of the gifted writer she was to become. Includes 7 additional poems, including Brown Girl Dreaming. Praise for Jacqueline Woodson: Ms. Woodson writes with a sure

understanding of the thoughts of young people, offering a poetic, eloquent narrative that is not simply a story . . . but a mature exploration of grown-up issues and self-discovery.”—The New York Times Book Review
