Leadership and Management Competence in Nursing Practice Audrey M. Beauvais, DNP, MSN, MBA, RN, 2018-11-28 Written specifically for the experienced nurse enrolled in an RN-to-BSN program, this text guides nurses through an interactive critical thinking process to become effective and confident nurse leaders. All nurses involved with direct patient care already rely on similar strategies to oversee patient safety, make care decisions, and integrate plan of care in collaboration with patients and families. This text expands upon that knowledge and provides a firm base to reach the next steps in academia and practice, enabling the BSN-prepared nurse to tackle serious issues in care delivery with a high level of self-awareness and skill. Leadership and Management Competence in Nursing Practice relies on a keen understanding of what experienced nurses already bring to the classroom. Primo Levi and Ka-Tzetnik Yochai Ataria, 2021-07-14 This book is about Primo Levi and Ka-Tzetnik, both Auschwitz survivors and central figures in the shaping of Holocaust memory, who dedicated their lives to bearing witness and writing

about the concentration camps, seeking, in particular, to give voice to those who did not return. The two writers are generally treated as complete opposites: Levi level-headed and self-aware, Ka-Tzetnik caught up in repeating the traumatic past. In this book I show how fundamentally mistaken this approach is, and how the similarity between them is, in fact, far greater than it may seem. While Levi draws the map, Ka-Tzetnik reveals the territory itself, and, taken together, they offer a better understanding of the human experience of the camps. This book explores their writing and their lives up to their deaths—Ka-Tzetnik of old age and Levi by his own hand—offering new explanations of Levi's suicide, little understood to this day.

Nursing Knowledge and Theory Innovation Pamela G. Reed, PhD, RN, FAAN, Nelma B. C. Shearer, PhD, RN, FAAN, 2011-02-18 This is an excellent addition to the nursing theory literature and one that focuses on the needs of the new DNP role and knowledge development. As the preface states, it encourages the development of 'theory for practice in practice,' and could help to close the divide that exists between theorists/researchers/academics and practice. Score: 97, 5 stars--Doody's The current paradigm of nursing knowledge suggests theory is developed outside of practice, then handed down to the practitioner to practice. This unique text is for students and faculty at the DNP level to engage in developing nursing theory in order to directly guide and improve practice. Key Features: Provides teachers and nursing students with information about the development and use of theory to improve nursing practice Includes glossary of key terms for reference Presents discussion questions and activities to stimulate thinking Identifies reflection points in selected chapters to help students assimilate the content and relate it to their own work
