Modules on Developing Life Skills of Four to Five Year Old Children Using Digital Stories and Activities Priscilla Angelique Pegollo, MAEd, 2022-03-18 The concept of the modules is based on the author's observations in the early education system that is failing to deliver the outcomes needed to advance the young learner's social skills and development. This scenario will, later on, affect the education opportunities in the future which will contribute to the country's economic growth. Thus, the successful performance in preschool needs to be supported by life skills and values which should be fostered by our education systems. Teaching life skills with hands-on activities is a bit behind because most of the preschool curriculum are merely focused on academics in preparation for Grade 1. The modules are designed to help teachers, parents, school, and education in general to teach life skills through digital storytelling and facilitate hands-on and digital activities in virtual learning. The format of the modules' activities is anchored on the play-based and learner-centered teaching method to immerse the preschool students in fun, meaningful learning experiences. After the discussion, students will perform the oral activity to practice how they express their thoughts and feelings or insights about the lesson. The hands-on activity and games will be the students' application of the lesson they learned.

Natural Resource Management And Sustainability Prof. (Dr.) Nagalaxmi M Raman, Mrs. A. Bhuvaneswari, Dr. Yaser Qureshi, Dr. R. Rathinam, 2022-08-02 The term natural resource management refers to the process of managing natural resources such land, water, soil, plants, and animals, with a specific emphasis on how management affects the quality of life for both current generations and generations yet to come (stewardship). The administration of natural resources entails controlling the ways in which humans and natural landscapes interact with one another. The planning of land use, the management of water, the preservation of biodiversity, and the future sustainability of industries are all brought together by this. It acknowledges the fact that people and their way of life are dependent on the health and productivity of our landscapes, and that the activities that people take as stewards of the land play an essential part in ensuring that this health and productivity is preserved. The concept of sustainable development is compatible with other aspects of natural resource management as well. Natural resource management places an emphasis not just on a scientific and technical understanding of resources and ecology, but also on the potential of such resources to sustain life. Both environmental management and management of natural resources share many similarities. This book is about figuring out the most effective method to handle problems that arise as a result of increasing demand for natural resources. The people who contributed to this book have a wealth of knowledge and experience in the administration of natural resources. It is suggested in each of the chapters that the only way to accomplish sustainable management of natural resources is to make use of system thinking, which will assist us in thinking critically and learning collectively how to deal with complexities and difficulties. It provides an integrated approach, which finally creates an enabling environment for stakeholders to adopt and benefit from; and adoption

of resilience thinking as a paradigm for systematic natural resource management plan.

Tense and Aspect in Han Period Chinese Barbara Meisterernst,2014-12-12 Many grammatical issues of Archaic and Medieval Chinese still lack a comprehensive analysis. The book provides the first thorough investigation of the syntactic and semantic constraints of the linguistic categories tense and aspect and their relation with the lexical aspect of the verb in Han period Chinese. The author uncovers fascinating details of a language with a highly restricted verbal morphology.

EngiNerds Jarrett Lerner,2019-02-19 The battle between boys and bots is on in this funny, fast-paced novel. Ken is an EngiNerd: one of a super-smart group of friends—all nerds—who have been close since kindergarten. They may be brainiacs, but they're just like everyone else: they fight with one another, watch too much TV, eat Chinese food, and hate walking their dogs. Well, maybe not just like everyone because Ken's best friend Dan has been building robots. He then secretly sent one to each of the EngiNerds, never letting them know he's the mastermind. At first Ken is awed and delighted: what kid hasn't dreamed of having a robot all their own? Someone who can be their friend, clean their room, walk the dog, answer homework questions...how amazing is that? But be careful what you wish for: Dan's robot, Greeeg, may look innocent, but his ravenous consumption of food—comestibles—turns him into a butt-blasting bot. And once the other robots 'come alive' it's up to the motley crew of EngiNerds to not only save the day, but save the planet!
