How to Be a Diversity and Inclusion Ambassador Celeste R. Warren,2022-08-30 Using a proven three-part framework, this book shows how anyone-from a CEO to frontline employee-can play a pivotal role in creating a diverse and welcoming workplace. Creating a diverse workplace needs to be an ongoing effort, not just the subject of occasional training. As Celeste Warren says, needed change won't take place unless all employees feel that they have a role to play in creating the culture they would like to see in their organization. Regardless of what position you hold, you have the ability to impact change and create a more inclusive environment. Anyone can commit to becoming an unofficial Diversity and Inclusion Ambassador in his or her organization. Warren offers a straightforward three-stage model: Become aware of your strengths, weaknesses, and conscious and unconscious biases. Take an inventory of your surroundings: what is getting in the way of there being an inclusive environment in your organization? Develop a personal action plan. Depending on your position, the actions you take can be as simple as consistently raising DEI-related issues in staff meetings or as far-reaching as leading an Employee Resource Group or developing a new hiring policy. In separate chapters, Warren offers specific advice for chief diversity and inclusion officers, C-suite leaders, first-line managers, human resources practitioners, and individual contributors. This book features examples, exercises, and practical tools that show you how to assess where your organization is at and develop a purpose and strategy that can make diversity a workplace reality.

How People Learn II National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Science Education,Board on Behavioral, Cognitive, and Sensory Sciences,Committee on How People Learn II: The Science and Practice of Learning,2018-09-27 There are many reasons to be curious about the way

people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

Revolutionizing K-12 Blended Learning through the i²Flex Classroom Model Avgerinou, Maria D.,Gialamas, Stefanos P.,2016-06-20 Blended learning has gained significant attention recently by educational leaders, practitioners, and researchers. i²Flex, a variation of blended learning, is based on the premise that certain non-interactive teaching activities, such as lecturing, can take place by students without teachers' direct involvement. Classroom time can then be used for educational activities that fully exploit teacher-student and student-student interactions, allowing for meaningful personalized feedback and scaffolding on demand. Revolutionizing K-12 Blended Learning through the i²Flex Classroom Model presents a well-rounded discussion on the i²Flex model, highlighting methods for K-12 course design, delivery, and evaluation in addition to teacher performance assessment in a blended i²Flex environment. Emphasizing new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers, this

publication is an essential reference source for pre-service and in-service teachers, researchers, administrators, and educational technology developers.
