New Student Orientation Northern Virginia Community College, 2013

College Orientation for First-Year and Transfer Student Populations Jamie Caplan, 2010-05 Each autumn, millions of new students enter colleges and universities across the country. Orientation is an institution's main opportunity to introduce and integrate new students into the campus community and culture, form class and institutional identity and prepare students to begin classes. Though the majority of new students are first-years, a significant number of participants are transfer students who have previously attended other institutions. During orientation, transfer students are in a unique position; not yet integrated into their college community, they are often considered equal to first-years, though they have previous college experience. Creating and executing successful orientation programming for transfers and first-years simultaneously is difficult but essential to achieve; it can be argued that orientation is the most important contributor to the social and academic integration of new students. The goal of my research was to understand how transfer students and first-years differently experience orientation and to provide a complete outline of how orientation can best support all new students: how can transfer students best be served during orientation?

Navigating the First College Year Leslie Banahan, Richard Mullendore, 2020-06-25 Published in partnership with NODA, the Association for Orientation, Transition, and Retention in Higher Education Parents and family members play a critical role in the success of new college students, but those who never attended college or who have been away from it for a while may lack critical information about the purpose, goals, and structure of higher education today. This brief guide offers parents and families an overview of the college experience, especially in the first year, and suggests strategies for helping their students succeed. A glossary of key terms is included. Grounded in the student success research and practice literature, the guide is ideal for use in orientation programs, recruitment events, and family weekends. \$2.00 each when purchased in multiple copy pack of 100.

The Implications of Persistence Theory on New Student Orientations in Community Colleges David Harold McGilvray, 2004

Community Colleges' Responses to COVID-19 Deborah L. Floyd, Christopher M. Mullin, Gianna Ramdin, 2022-08-08 In 2021, community college practitioners, scholars, researchers, and leaders documented the challenge of what worked, what did not work, and lessons learned during the era of the COVID-19 pandemic. This book summarizes the works of 39 authors who collectively wrote 14 peer reviewed papers in areas of leadership, curriculum, funding, social and racial tension, technology and digital access, self, family and community, and health and safety. Readers are challenged to embrace this era with innovative zeal and to continue to document community colleges' evolutionary changes during this pandemic era. The book will be useful to higher education practitioners, scholars, and leaders, as well as individuals in organizations who are interested in how community colleges responded to challenges of change during the COVID-19 pandemic. The chapters in this book were originally published as a special issue of the Community College Journal of Research and Practice.
