The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education

National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Integrating Higher Education in the Arts, Humanities, Sciences, Engineering, and Medicine, 2018-07-21 In the United States, broad study in an array of different disciplines—arts, humanities, science, mathematics, engineering—as well as an in-depth study within a special area of interest, have been defining characteristics of a higher education. But over time, in-depth study in a major discipline has come to dominate the curricula at many institutions. This evolution of the curriculum has been driven, in part, by increasing specialization in the academic disciplines. There is little doubt that disciplinary specialization has helped produce many of the achievements of the past century. Researchers in all academic disciplines have been able to delve more deeply into their areas of expertise, grappling with ever more specialized and fundamental problems. Yet today, many leaders, scholars, parents, and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos. These silos represent what many see as an artificial separation of academic disciplines. This study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time. The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science, technology, engineering, mathematics, and medicine (STEMM) lead to improved educational and career outcomes for undergraduate and graduate students. It explores evidence regarding the value of integrating more STEMM curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEMM education programs.

Wisdom in Ancient Israel John Day, Robert P. Gordon, Hugh Godfrey Maturin Williamson, 1998 In this collection, an international group of specialists considers the nature of wisdom in relation to the thought world of the ancient Near East and its impact on the rest of the Old Testament. In addition to full coverage of the wisdom books and other literature most frequently thought to have been influenced by them, thematic studies also introduce the principal comparative sources among Israel's neighbours and discuss the place of wisdom in Israelite religion, theology, and society.

Salsa, Soul, and Spirit Juana Bordas, 2012-03-25 Tapping the potential of the changing workforce, consumer base, and citizenry requires a leadership approach that resonates with our country's growing diversity. In *Salsa, Soul, and Spirit*, Juana Bordas shows how incorporating Latino, African American, and American Indian approaches to leadership into the mainstream has the potential to strengthen leadership practices and inspire today's ethnically rich workforce. Bordas identifies eight core leadership principles common to all three cultures, principles deeply rooted in each culture's values and

developed under the most trying conditions. Using a lively blend of personal reflections, interviews, and historical background, she shows how these principles developed and illustrates the creative ways they've been put into practice in these communities (and some forward-looking companies). Bordas brings these principles together into a multicultural leadership model that offers a more flexible and inclusive way to lead and a new vision of the role of the leader in the organization. Multicultural leadership resonates with many cultures and encourages diverse people to actively engage. In a globalized economy, success for leaders in the future will rest on their ability to shift to a multicultural approach. *Salsa, Soul, and Spirit* provides conceptual and practical guidelines for beginning that process.

Militant Mediator Dennis C. Dickerson, 2021-12-14 During the turbulent 1960s, civil rights leader Whitney M. Young Jr. devised a new and effective strategy to achieve equality for African Americans. Young blended interracial mediation with direct protest, demonstrating that these methods pursued together were the best tactics for achieving social, economic, and political change. *Militant Mediator* is a powerful reassessment of this key and controversial figure in the civil rights movement. It is the first biography to explore in depth the influence Young's father, a civil rights leader in Kentucky, had on his son. Dickerson traces Young's swift rise to national prominence as a leader who could bridge the concerns of deprived blacks and powerful whites and mobilize the resources of the white America to battle the poverty and discrimination at the core of racial inequality. Alone among his civil rights colleagues—Martin Luther King Jr., Roy Wilkins, James Farmer, John Lewis, and James Forman—Young built support from black and white constituencies. As a National Urban League official in the Midwest and as a dean of the School of Social Work at Atlanta University during the 1940s and 1950s, Young developed a strategy of mediation and put it to work on a national level upon becoming the executive director of the League in 1961. Though he worked with powerful whites, Young also drew support from middle-and working-class blacks from religious, fraternal, civil rights, and educational organizations. As he navigated this middle ground, though, Young came under fire from both black nationalists and white conservatives.

The Future of Nursing Institute of Medicine, Committee on the Robert Wood Johnson Foundation Initiative on the Future of Nursing, at the Institute of Medicine, 2011-02-08 *The Future of Nursing* explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses,

increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles-including limits on nurses' scope of practice-should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Every Student Has a Story Karen Lenfestey,Shubitha Kever,2017-07-10 Second volume in series: This book is a compilation of essays about what it's like being the first person in your family to go to college. TRIO Students at Indiana University -Purdue University in Fort Wayne, Indiana offer compelling narratives of personal experiences stemming from being a first-generation student in college. While no two situations are alike, many students report struggling with social and cultural adjustments; insecurities about information or processes; personal family situations and dynamics; and physical or mental health issues. Some of the struggles students chose to write about in this book include cultural differences, family tragedies, unrealistic expectations of college, family health issues, and insecurities about choosing a major. It is our hope that these personal narratives resonate with other first-generation college students and help affirm that they are not alone-but a part of a much larger community of first-generation students. It is also our hope that these essays increase dialogue on campuses regarding struggles outside of the classroom that many first-generation students face in their journeys toward graduation.

The Battles of Germantown David W. Young,2019-09-13 2020 Philip S. Klein Book Prize Winner, Pennsylvania Historical Association Known as America's most historic neighborhood, the Germantown section of Philadelphia (established in 1683) has distinguished itself by using public history initiatives to forge community. Progressive programs about ethnic history, postwar urban planning, and civil rights have helped make historic preservation and public history meaningful. *The Battles of Germantown* considers what these efforts can tell us about public history's practice and purpose in the United States. Author David Young, a neighborhood resident who worked at Germantown historic sites for decades, uses his practitioner's perspective to give examples of what he calls "effective public history." *The Battles of Germantown* shows how the region

celebrated “Negro Achievement Week” in 1928 and, for example, how social history research proved that the neighborhood’s Johnson House was a station on the Underground Railroad. These encounters have useful implications for addressing questions of race, history, and memory, as well as issues of urban planning and economic revitalization. Germantown’s historic sites use public history and provide leadership to motivate residents in an area challenged by job loss, population change, and institutional inertia. The Battles of Germantown illustrates how understanding and engaging with the past can benefit communities today.

The Sharecropper's Son John V. Amodeo, 2016-07-15 In 1917, there is no escape from the tight grasp of the Mississippi delta, especially for a black young man. As James Hayes grows up tilling the soil with his disabled father and younger brother, all he can think about is how badly he wants out. Lured by stories of the Great Migration north, he dreams of the day when he will be able to leave and make his mark on the world. Finally on one October morning, eighteen-year-old James gets his chance. When he is drafted and sent to France at the height of the Argonne Offensive by Germany, James becomes embroiled in the thick of battle, eventually standing out from other soldiers by winning the French Croix de Guerre. As the conflict ends in 1918, he ventures to Paris where he is invited to sing at a local bistro. Soon, he becomes a sensation, settles in his adopted country, and marries a local woman. But when he is called home to be near his terminally ill father, fate rises up to meet him and changes everything once again. In this tale of hope and perseverance, a black World War I draftee from the Mississippi delta journeys from the trenches of the Western Front to 1920s Paris and back home again.
