Catharine Ward Thompson, Penny Travlou

Open Space and Peace; a Symposium on Effects of Observation Stanford University Open Space and Peace Symposium, 1964

Open Space and Peace Sylvania Electric Products, Inc, 1964 ... Sponsored by Sylvania Electric Products and the Hoover Institution on War, Revolution, and Peace, was held September 4-6, 1963, at Stanford University.--Preface.

Open Space Technology Harrison Owen, 2008-04-28 A revised and updated edition of an acknowledged classic of the Organizational Development literature. Over 30,000 of first and second editions sold.

Selling with Integrity Sharon Drew Morgen, 1997 Filled with in-depth examples of Buying Facilitation in action, *Selling with Integrity* details a practical questioning and listening process which facilitates buyers in understanding their complex buying environments.

Expanding Our Now Harrison Owen, 1997 Open Space Technology (OST) is an effective, economical, fast, and easily repeatable strategy for organizing meetings of between 5 and 1,000 participants. First developed in 1984, it has now been used around the world with all types of organizations including corporations, community groups, government agencies, schools, and churches. OST produces better meetings and helps groups achieve such organizational goals as self-managed work groups, distributed leadership, and utilizing diversity quickly and without training. In *Expanding Our Now*, OST creator Harrison Owen offers numerous examples to illustrate the evolution of OST and explores what it is, how it developed as a process for meeting management, and how and why it works all over the world, for groups of all sizes dealing with a vast range of issues. Owen shows how OST can move organizations to higher levels of performance, without elaborate training or professional facilitators.

Open Space Technology Harrison Owen, 1997 *Open Space Technology: A User's Guide* is just what the name implies: a hands-on, detailed description of facilitating Open Space Technology (OST). Written by the originator of the method - an effective, economical, fast, and easily-repeatable strategy for organizing meetings of between 5 and 1,000 participants - this is the first book to document the rationale, procedures, and requirements of OST. OST enables self-organizing groups of all sizes to deal with hugely complex issues in a very short period of time. This practical, step-by-step user's guide details what needs to be done before, during, and after an Open Space event.

Open Space : People Space : an International Conference on Inclusive Environments Peter Aspinall,2004

Open Space: People Space Catharine Ward Thompson,Penny Travlou,2007-09-07 Highly visual and containing contributions from leading names in landscape, architecture and design, this volume provides a rare insight into people's engagement with the outdoor environment; looking at the ways in which the design of spaces and places meets people's needs and desires in the twenty-first century. Embracing issues of social inclusion, recreation, and environmental quality, the editors explore innovative ways to develop an understanding of how the landscape, urban or rural, can contribute to health and quality of life. Open Space: People Space examines the nature and value of people's access to outdoor environments. Led by Edinburgh's OPENspace research centre, the debate focuses on current research to support good design for open space and brings expertise from a range of disciplines to look at: an analysis of policy and planning issues and challenges understanding the nature and experience of exclusion the development of evidence-based inclusive design innovative research approaches which focus on people's access to open space and the implications of that experience. Invaluable to policy makers, researchers, urban designers, landscape architects, planners, managers and students, it is also essential reading for those working in child development, health care and community development.

Public Places and Spaces Irwin Altman,Erwin H. Zube,2012-12-06 This tenth volume in the series addresses an important topic of research, design, and policy in the environment and behavior field. Public places and spaces include a

sweeping array of settings, including urban streets, plazas and squares, malls, parks, and other locales, and natural settings such as aquatic environments, national parks and forests, and wilderness areas. The importance of public settings is highlighted by difficult questions of access, control, and management; unique needs and problems of different users (including women, the handicapped, and various ethnic groups); and the dramatic reshaping of our public environments that has occurred and will continue to occur in the foreseeable future. The wide-ranging scope of the topic of public places and spaces demands the attention of many disciplines and researchers, designers, managers, and policymakers. As in previous volumes in the series, the authors in the present volume come from a variety of disciplinary backgrounds, research and design orientations, and affiliations. They have backgrounds in or are affiliated with such fields as architecture, geography, landscape architecture, natural resources, psychology, sociology, and urban design. Many more disciplines obviously contribute to our understanding and design of public places and spaces, so that the contributors to this volume reflect only a sample of the possibilities and present state of knowledge about public settings.
