Colleges that Change Lives Loren Pope,1996 The distinctive group of forty colleges profiled here is a well-kept secret in a status industry. They outdo the Ivies and research universities in producing winners. And they work their magic on the B and C students as well as on the A students. Loren Pope, director of the College Placement Bureau, provides essential information on schools that he has chosen for their proven ability to develop potential, values, initiative, and risk-taking in a wide range of students. Inside you'll find evaluations of each school's program and personality to help you decide if it's a community that's right for you; interviews with students that offer an insider's perspective on each college; professors' and deans' viewpoints on their school, their students, and their mission; and information on what happens to the graduates and what they think of their college experience. Loren Pope encourages you to be a hard-nosed consumer when visiting a college, advises how to evaluate a school in terms of your own needs and strengths, and shows how the college experience can enrich the rest of your life.

Colleges That Change Lives Loren Pope,2006-07-25 Prospective college students and their parents have been relying on Loren Pope's expertise since 1995, when he published the first edition of this indispensable guide. This new edition profiles 41 colleges—all of which outdo the Ivies and research universities in producing performers, not only among A students but also among those who get Bs and Cs. Contents include: Evaluations of each school's program and personality Candid assessments by students, professors, and deans Information on the progress of graduates This new edition not only revisits schools listed in previous volumes to give readers a comprehensive assessment, it also addresses such issues as homeschooling, learning disabilities, and single-sex education.

Political Protest in the Congo Herbert Weiss,2019-03-12 In this first detailed study of the PSA, a party that has played a

crucial role in Congolese politics, Weiss describes the growth of political parties from 1957 to 1960, and gives a history of the PSA, and of the anti-colonial protest in the Kwango-Kwilu area. Originally published in 1967. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. Quagga and Zebra Mussels Thomas F. Nalepa, Don W. Schloesser, 2013-10-25 The introduction and rapid spread of two Eurasian mussel species, *Dreissena polymorpha* (zebra mussel) and *Dreissena rostriformis bugensis* (quagga mussel), in waters of North America has caused great concern among industrial and recreational water users. These invasive species can create substantial problems for raw water users such as water treatment facilities and power plants, and they can have other negative impacts by altering aquatic environments. In the 20 years since the first edition of this book was published, zebra mussels have continued to spread, and quagga mussels have become the greater threat in the Great Lakes, in deep regions of large lakes, and in the southwestern United States. Quagga mussels have also expanded greatly in eastern and western Europe since the first book edition was published. *Quagga and Zebra Mussels: Biology, Impacts, and Control, Second Edition* provides a broad view of the zebra/quagga mussel issue, offering a historic perspective and up-to-date information on mussel research. Comprising 48 chapters, this second edition includes reviews of mussel morphology, physiology, and behavior. It details mussel distribution and spread in Europe and across North America, and examines policy and regulatory responses, management strategies, and mitigation efforts. In addition, this book provides extensive coverage of the impact of invasive mussel species on freshwater ecosystems, including effects on water clarity, phytoplankton, water quality, food web changes, and consequences to other aquatic fauna. It also reviews and offers new insights on how zebra and quagga mussels respond and adapt to varying environmental conditions. This new edition includes seven video clips that complement chapter text and, through visual documentation, provide a greater understanding of mussel behavior and distribution.

Democracy, Civic Culture and Small Business in Russia's Regions Molly O'Neal, 2015-08-20 This book adopts a novel analytical approach to understanding how Russia's stalled democratisation is related to the incomplete liberalisation of the economy. Based on extensive original comparative study of Russia's regions, the book explores the precise channels of interaction that create the mutuality of property rights, entrepreneurship, rule of law, norms of citizenship and liberal democracy. It demonstrates that the extent of democratisation varies across regions, and that this variation is connected to the extent of liberalisation of the economy. Moreover, it argues that the key factor in producing this linkage is the relative prominence of small business owners and their supporters in articulating their interests vis-à-vis regional and local

administrations, especially through the institutionalisation of networks and business associations. The book develops its key theses by means of detailed analysis of the experiences of four case study regions. Overall, the book provides a major contribution to understanding the path of democratisation in Russia.

Rough Sets and Current Trends in Computing Shusaku Tsumoto, Roman Slowiński, Jan Komorowski, Jerzy W. Grzymala-Busse, 2004-06-16 In recent years rough set theory has attracted the attention of many researchers and practitioners all over the world, who have contributed essentially to its development and applications. We are observing a growing research interest in the foundations of rough sets, including the various logical, mathematical and philosophical aspects of rough sets. Some relationships have already been established between rough sets and other approaches, and also with a wide range of hybrid systems. As a result, rough sets are linked with decision system modeling and analysis of complex systems, fuzzy sets, neural networks, evolutionary computing, data mining and knowledge discovery, pattern recognition, machine learning, and approximate reasoning. In particular, rough sets are used in probabilistic reasoning, granular computing (including information granule calculi based on rough mereology), intelligent control, intelligent agent modeling, identification of autonomous systems, and process specification. Methods based on rough set theory alone or in combination with other approaches have been discovered with a wide range of applications in such areas as: acoustics, bioinformatics, business and finance, chemistry, computer engineering (e.g., data compression, digital image processing, digital signal processing, parallel and distributed computer systems, sensor fusion, fractal engineering), decision analysis and systems, economics, electrical engineering (e.g., control, signal analysis, power systems), environmental studies, informatics, medicine, molecular biology, musicology, neurology, robotics, social science, software engineering, spatial visualization, Web engineering, and Web mining.

A Report on the Green Plan Consultations, 1990 This document is a summary of what Canadians, who participated in the consultations, had to say about environmental issues and concerns, the solutions, roles and responsibilities, and priorities for action. It is based on detailed reports from 41 information sessions and 17 consultation workshops held across Canada. It is based on some 3,000 pages of comments and suggestions, an analysis of 4,500 question response forms, and written submissions from more than 1,000 individuals and organizations. The report is organized into two sections. The first section deals with such cross-cutting themes as science, education, enforcement, decision-making processes, and partnerships. The second section deals with specific environmental issues identified in the consultation document, such as global warming and toxic substances, and the publicly identified issues, including energy and land use.

The Digital City Germaine R. Halegoua, 2020-01-21 Shows how digital media connects people to their lived environments

Every day, millions of people turn to small handheld screens to search for their destinations and to seek recommendations for places to visit. They may share texts or images of themselves and these places en route or after their journey is complete. We don't consciously reflect on these activities and probably don't associate these practices with constructing a sense of place. Critics have argued that digital media alienates users from space and place, but this book argues that the exact opposite is true: that we habitually use digital technologies to re-embed ourselves within urban environments. The Digital City advocates for the need to rethink our everyday interactions with digital infrastructures, navigation technologies, and social media as we move through the world. Drawing on five case studies from global and mid-sized cities to illustrate the concept of "re-placeing," Germaine R. Halegoua shows how different populations employ urban broadband networks, social and locative media platforms, digital navigation, smart cities, and creative placemaking initiatives to turn urban spaces into places with deep meanings and emotional attachments. Through timely narratives of everyday urban life, Halegoua argues that people use digital media to create a unique sense of place within rapidly changing urban environments and that a sense of place is integral to understanding contemporary relationships with digital media.

Leading with Strategic Thinking Aaron K. Olson, B. Keith Simerson, 2015-03-25 Be a more effective leader with strategic thinking *Leading with Strategic Thinking* reveals what effective leaders do differently. Eschewing the one-size-fits-all leadership model, this helpful guide outlines four general leadership types and demonstrates how each type achieves success – whether through personal vision, structured process, collaboration, or by empowering others. The authors identify the actions and skills that distinguish strategic leadership, drawn from interviews and focus groups with over three hundred leaders from around the world. Examples and case studies illustrate these concepts in action, and the provided reference materials steer readers toward more advanced information on this important topic. The disruptive forces of technology and globalization raise new challenges for leaders. This book is a manual that will help executives and aspiring leaders harness these forces and address the two central questions of strategic leadership: How do the best leaders develop their strategy? How do effective leaders drive strategic change? Becoming a strategic leader isn't about mimicking an icon. The most effective leaders seize opportunity in a way that consciously integrates environmental requirements, stakeholder expectations, and personal ability. *Leading with Strategic Thinking* shows what these leaders do, and gives anyone the tools to be a more strategic leader.

The effect of two exercise programs on the rehabilitation of individuals with colorectal cancer in an inpatient setting in Germany Liat Levy, 2005-02-14 Inhaltsangabe: Abstract: Research in the field of exercise therapy for cancer patients primarily focused on individuals with breast cancer who receive exercise interventions under outpatient conditions. This research study investigated individuals with colorectal cancer under inpatient conditions and aimed to broaden the application of exercise intervention treatments beyond that of breast cancer. The research included two study groups; standard exercise group (SEG, n=44) receiving indoor gymnastic exercise (IGE) and modified exercise group (MEG, n=39) receiving IGE plus additional outdoor walking activity. Participation in the specific exercise therapy program was independent of other therapies received in the inpatient rehabilitation program (IRP). The patients completed QOL questionnaires (QLQ-C30 & QLQ-CR38), psychological distress scale (HADS) and underwent treadmill stress-testing (TST) at the beginning (T1) and upon completion (T2) of the IRP. The QOL and the HADS questionnaires were administered after a six month follow up (T3) proceeding the IRP completion. Results indicate significant QOL and HADS improvements in pre to post-testing for both study groups. The TST results indicate superior improvements in the MEG in comparison to the SEG. Some of the T1 to T2 QOL and HADS improvement maintained at T3. We conclude that 3 weeks IRP was adequate to reveal improvements in QOL, psychological measures and functional capacity. Future research should emphasize patient motivation for participation in physical activity after completing IRP. This background chapter encompasses the different fields of knowledge which are relevant to the present study, starting with colorectal cancer (epidemiology, etiology, pathology and the International Classification of Functioning, Disability and Health), continuing with the subjects Quality of life, Movement and Sports in the

Rehabilitation. The chapter ends with a review of previous physical activity and cancer studies. Descriptive epidemiological knowledge of colorectal cancer is essential for understanding the etiology of the disease and is used in the process of developing screening methods. Large bowel carcinoma is one of the most common cancers in the western world (15% of all cancer cases) and despite advanced diagnostic and therapeutic methods, the prognosis is relatively poor (Faivre et al. 2002). The WHO classification supplies the mortality data of colon cancer separately from rectum cancer. [...]

Passion for Work Robert J. Vallerand,Nathalie Houliort,2019-05-31 Passion is a pervasive concept in the work domain. Workers aspire to be passionate in the hope of finding meaning and satisfaction from their professional life, while employers dream of passionate employees who will ensure organizational performance. Does passion for work matter ? Does passion invariably bring about the anticipated positive outcomes or is there a darker side to passion for work that can also lead to negative outcomes for individuals and organizations? The goal of this book is to address these issues. This volume reviews major theories of work passion, focusing specifically on the dominant theory: the Dualistic Model of Passion. This theory distinguishes between two types of passion-harmonious and obsessive- and their associated determinants and consequences. This volume provides a comprehensive understanding of passion for work by addressing the origin of the concept and its theoretical issues: how can passion for work be developed, what are the consequences to be expected at the individual and organizational levels, and how can passion for work shed new light on contemporary issues in the workplace. *Passion for Work: Theory, Research, and Applications* synthesizes a vast body of existing research in the area, provides insights into new and exciting research avenues, and explores how passion for work can be cultivated in work settings in order to fulfill both workers' and employers' hopes for a productive and satisfying work life.
