**Teaching Critical Thinking** bell hooks, 2013-02-01 In *Teaching Critical Thinking*, renowned cultural critic and progressive educator bell hooks addresses some of the most compelling issues facing teachers in and out of the classroom today. In a series of short, accessible, and enlightening essays, hooks explores the confounding and sometimes controversial topics that teachers and students have urged her to address since the publication of the previous best-selling volumes in her Teaching series, *Teaching to Transgress* and *Teaching Community*. The issues are varied and broad, from whether meaningful teaching can take place in a large classroom setting to confronting issues of self-esteem. One professor, for example, asked how black female professors can maintain positive authority in a classroom without being seen through the lens of negative racist, sexist stereotypes. One teacher asked how to handle tears in the classroom, while another wanted to know how to use humor as a tool for learning. Addressing questions of race, gender, and class in this work, hooks discusses the complex balance that allows us to teach, value, and learn from works written by racist and sexist authors. Highlighting the importance of reading, she insists on the primacy of free speech, a democratic education of literacy. Throughout these essays, she celebrates the transformative power of critical thinking. This is provocative, powerful, and joyful intellectual work. It is a must read for anyone who is at all interested in education today.

**Latinx Student Perception of New Student Orientation at a Community College** Jeison Diaz Moya, 2022 This research study used a qualitative methodology to understand the experiences of Latinx students in a community college orientation program. The goal was to see the orientation through the eyes of the students and understand their perceptions of how the college's orientation might be improved in ways that help them feel welcome and validated in the sense articulated by Rendon (1994). In order to understand their experiences, 12 Latinx students attending a community college in the Midwest participated in focus groups. The participants were asked about their experience applying to college, interaction with their advisor, and overall orientation experience. Five themes emerged from the focus group interviews: family validation, welcoming orientation, academic advisor connection, high school encouragement, and understanding of the Latinx culture. The importance of family in the validation process is a crucial finding for improving new student orientation

programs.

**Transcendent Kingdom** Yaa Gyasi, 2020-09-01 NEW YORK TIMES BEST SELLER • A TODAY SHOW #ReadWithJenna BOOK CLUB PICK! • Finalist for the WOMEN'S PRIZE Yaa Gyasi's stunning follow-up to her acclaimed national best seller *Homegoing* is a powerful, raw, intimate, deeply layered novel about a Ghanaian family in Alabama. Gifty is a sixth-year PhD candidate in neuroscience at the Stanford University School of Medicine studying reward-seeking behavior in mice and the neural circuits of depression and addiction. Her brother, Nana, was a gifted high school athlete who died of a heroin overdose after an ankle injury left him hooked on OxyContin. Her suicidal mother is living in her bed. Gifty is determined to discover the scientific basis for the suffering she sees all around her. But even as she turns to the hard sciences to unlock the mystery of her family's loss, she finds herself hungering for her childhood faith and grappling with the evangelical church in which she was raised, whose promise of salvation remains as tantalizing as it is elusive. *Transcendent Kingdom* is a deeply moving portrait of a family of Ghanaian immigrants ravaged by depression and addiction and grief—a novel about faith, science, religion, love. Exquisitely written, emotionally searing, this is an exceptionally powerful follow-up to Gyasi's phenomenal debut.

**Orientation** Allis Wade, 2012-07-02 One hundred years in the future, Government Observers roam the classrooms of average learners, looking for the rare gifted learners still left in the general population. One gifted child, who has been carefully coached by his mother to appear average, is unaware that his abilities have been documented by an Observer for years, until he is tricked into showing his mathematical strengths. He is devastated to receive a letter requiring him to test at The School for Gifted Potentials, but he cleverly sabotages the tests and is prepared to leave, only to discover that his mother has abandoned him at the school she has raised him to fear. During his one week orientation, as he undertakes an enlightening journey of self-discovery, he uncovers a secret about his mother's past that leads him to question everything that he once believed.

in democracy, and the way those experiences planted the seeds for his astonishing future. What does it mean to be American? Who gets to decide? George Takei joins cowriters Justin Eisinger & Steven Scott and artist Harmony Becker for the journey of a lifetime.

The Stressed Years of Their Lives Dr. B. Janet Hibbs, Dr. Anthony Rostain, 2019-04-23 From two leading child and adolescent mental health experts comes a guide for the parents of every college and college-bound student who want to know what's normal mental health and behavior, what's not, and how to intervene before it's too late. "The title says it all...Chock full of practical tools, resources and the wisdom that comes with years of experience, *The Stressed Years of their Lives* is destined to become a well-thumbed handbook to help families cope with this modern age of anxiety." — Brigid Schulte, Pulitzer Prize-winning journalist, author of *Overwhelmed* and director of the Better Life Lab at New America All parenting is in preparation for letting go. However, the paradox of parenting is that the more we learn about late adolescent development and risk, the more frightened we become for our children, and the more we want to stay involved in their lives. This becomes particularly necessary, and also particularly challenging, in mid- to late adolescence, the years just before and after students head off to college. These years coincide with the emergence of many mood disorders and other mental health issues. When family psychologist Dr. B. Janet Hibbs's own son came home from college mired in a dangerous depressive spiral, she turned to Dr. Anthony Rostain. Dr. Rostain has a secret superpower: he understands the arcane rules governing privacy and parental involvement in students' mental health care on college campuses, the same rules that sometimes hold parents back from getting good care for their kids. Now, these two doctors have combined their expertise to corral the crucial emotional skills and lessons that every parent and student can learn for a successful launch from home to college.

Freshman Seminar Robert D. Cohen, 2019-03-04 The competition for students is growing among colleges and universities, leading administrators and student personnel professionals to ask what they can do to recruit and retain their students without lowering academic standards. The Freshman Seminar is one answer: it is a full-semester course designed to train would-be students in the skills they will need to survive in a student's world. Remedial courses alone are not sufficient; there are a host of meta-academic activities to be mastered, among them note taking, test taking, class participation, interacting with instructors, and developing realistic attitudes towards learning. The authors, initiators and experienced teachers in Hunter College's Freshman Seminar Program, describe the rationale for such a course, as well as its value. Their step-by-step approach to establishing and teaching a freshman seminar details the fundamentals of curriculum design and teaching methods and describes specific instructional material for classroom use—lesson plans, games, attitude inventories, and role playing. This is a comprehensive and practical guidebook for the college administrator who wants to reduce student attrition and for the student personnel professional who will implement such a program.

**The Big Thirst** Charles Fishman, 2011 Fishman examines the passing of the golden age of water and reveals the shocking facts about how water scarcity will soon be a major factor.

**College Orientation for First-Year and Transfer Student Populations** Jamie Caplan, 2010-05 Each autumn, millions of new students enter colleges and universities across the country. Orientation is an institution's main opportunity to introduce and integrate new students into the campus community and culture, form class and institutional identity and prepare students to begin classes. Though the majority of new students are first-years, a significant number of participants are transfer students who have previously attended other institutions. During orientation, transfer students are in a unique position; not yet integrated into their college community, they are often considered equal to first-years, though they have previous college experience. Creating and executing successful orientation programming for transfers and first-years simultaneously is difficult but essential to achieve; it can be argued that orientation is the most important contributor to the social and academic integration of new students. The goal of my research was to understand how transfer students and first-years differently experience orientation and to provide a complete outline of how orientation can best support all new students: how can transfer students best be served during orientation?
