Becoming a Certified Nurse Assistant-A Person-Centered Approach Cheryl Parsons,2020-12-09 This textbook and the accompanying workbook is designed to instruct the student in basic uncomplicated nursing procedures to be performed under the supervision of a licensed nurse. The Certified Nurse Assistant will develop skills, attitudes and concepts which are essential to developing the Certified Nurse Assistant. These skills are taught with a holistic approach to include the impact on physical, psychological, social, ethnic, cultural, and environmental influences on the residents continued overall well-being. Becoming a Certified Nurse Assistant requires a basic knowledge of human anatomy, physiology, body systems and the impact of aging on those systems. It also requires specific skills which promote observation, interventions, individualization, resident choice, safety, and in general the overall well-being of the residents the CNA cares for. The course will utilize current federal and state regulations, principles of adult learning, ideas and resources for supplemental lessons and best practice approaches to Certified Nurse Assistant training with a focus on person-centered techniques.

The Future of Nursing Institute of Medicine,Committee on the Robert Wood Johnson Foundation Initiative on the Future of Nursing, at the Institute of Medicine,2011-02-08 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles-including limits on nurses' scope of practice-should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this

book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.
