Ethics and climate change ,2015-07-27 Climate change is the most significant moral and environmental issue of our time. This project seeks to help deepen explicit ethical reflection around the world on national responses to climate change by developing a publicly available record on national compliance with ethical obligations for climate change similar to the reports that are now available on national compliance with human rights obligations.

The “Hidden” Prehistory of European Research Networking Olivier Martin,2012-06-18 The main purpose of this book, which mostly covers the period 1984-1993, is about the history of European research networking. In particular, it strives to throw some light on some lesser known, sometimes forgotten, aspects of the European research networking history, as the EARN and EASInet initiatives from IBM but also DEC (EARN/OSI), thanks to operational pan-European networks, which were built during the period 1984-1990 thus allowing the start of operational European academic and research networking services in a very effective and swift manner. A secondary purpose of this article is to make a critical assessment of the political and technical achievements of the European NRENs and especially those of DANTE, the company set up by these same NRENs to build and operate a pan-European backbone interconnecting their national networking infrastructures as well as establishing international connections to other NRENs worldwide.

Fulfilling the Promise National Research Council,Division on Earth and Life Studies,Commission on Life Sciences,Committee on High-School Biology Education,1990-02-01 Why are students today not learning biology, appreciating its importance in their lives, or pursuing it as a career? Experts believe dismal learning experiences in biology classes are causing the vast majority of students to miss information that could help them lead healthier lives and make more intelligent decisions as adults. How can we improve the teaching of biology throughout the school curriculum? Fulfilling the Promise offers a vision of what biology education in our schools could be—along with practical, hard-hitting recommendations on how to make that vision a reality. Noting that many of their recommended changes will be controversial, the authors explore in detail the major questions that must be answered to bring biology education to an acceptable standard: how elementary, middle, and high-school biology education arrived at its present state; what impediments stand in the way of improving

biology education; how to properly prepare biology teachers and encourage their continuing good performance; and what type of leadership is needed to improve biology education.

Funding Virtue Marina Ottaway, 2000 The United States and many other international donors have embraced civil-society aid as a key tool of democracy promotion. This collection of essays analyzes civil-society aid in five regions - South Africa, the Philippines, Peru, Egypt and Romania - focusing on crucial issues and dilemmas.

Celestial Bodies in Orbit Eve Littlepage, 2012-12-20 Eve Littlepage made her living as striptease dancer 'Lisa Doolittle' in the suburbs of Boston for ten years, from the mid-1970s through the mid-80s. Her memoir is about how she fell into this marginalized profession, some of the craziness that happened while she was in it, and how she struggled to find a way out and into a more wholesome life. Littlepage uses a unique vehicle for sharing her story: it is told interview-style to a fictional author named Stella Mars. This unusual method evokes a sense that one is eavesdropping on a very private conversation as Eve shares her secrets with Stella. The story weaves memories of her personal life together with reflections on her stripping career, and shows how the contrasting aspects of the two played off of each other as she evolved and grew through her varied experiences. Though metaphysics is not the main focus, Eve's story is laced with references to the I Ching, ghostly visitations, spiritual epiphanies, and other mystical themes. It may offer hope and inspiration to anyone who has ever felt stuck in a job or relationship that seemed impossible to escape. It is a tale of perseverance, resilience, and hope, sprinkled with humor and insight. One reader called it, ... a coming-of-age story with more universal appeal than one might expect in a stripper's memoir. It's about choices and the ripple effect they create. It's Eve's 'secret past' - for your entertainment!

Democracy and Trust Mark E. Warren, 1999-10-28 Explores the implications for democracy of declining trust in government and between individuals.

Aiding Democracy Abroad Thomas Carothers, 2011-09 Aid to promote democracy abroad has emerged as a major growth industry in recent years. Not only the United States but many other Western countries, international institutions, and private foundations today use aid to support democratic transitions in Eastern Europe, the former Soviet Union, Asia, Africa, Latin America, and the Middle East. Though extensive in scope, these activities remain little understood outside the realm of specialists. Debates among policymakers over democracy promotion oscillate between unhelpful poles of extreme skepticism and unrealistic boosterism, while the vast majority of citizens in aid-providing countries have little awareness of the democracy-building efforts their governments sponsor. *Aiding Democracy Abroad* is the first independent, comprehensive assessment of this important new field. Drawing on extensive field research and years of hands-on experience, Thomas Carothers examines democracy-aid programs relating to elections, political parties, governmental reform, rule of law, civil society, independent media, labor unions, decentralization, and other elements of what he describes as the democracy template that policymakers and aid officials apply around the world. Steering a careful path between the inflated claims of

aid advocates and the exaggerated criticisms of their opponents, Carothers takes a hard look at what such programs achieve and how they can be improved.

Who Controls the Internet? Jack Goldsmith, Tim Wu, 2006-03-17 Is the Internet erasing national borders? Will the future of the Net be set by Internet engineers, rogue programmers, the United Nations, or powerful countries? Who's really in control of what's happening on the Net? In this provocative new book, Jack Goldsmith and Tim Wu tell the fascinating story of the Internet's challenge to governmental rule in the 1990s, and the ensuing battles with governments around the world. It's a book about the fate of one idea--that the Internet might liberate us forever from government, borders, and even our physical selves. We learn of Google's struggles with the French government and Yahoo's capitulation to the Chinese regime; of how the European Union sets privacy standards on the Net for the entire world; and of eBay's struggles with fraud and how it slowly learned to trust the FBI. In a decade of events the original vision is uprooted, as governments time and time again assert their power to direct the future of the Internet. The destiny of the Internet over the next decades, argue Goldsmith and Wu, will reflect the interests of powerful nations and the conflicts within and between them. While acknowledging the many attractions of the earliest visions of the Internet, the authors describe the new order, and speaking to both its surprising virtues and unavoidable vices. Far from destroying the Internet, the experience of the last decade has led to a quiet rediscovery of some of the oldest functions and justifications for territorial government. While territorial governments have unavoidable problems, it has proven hard to replace what legitimacy governments have, and harder yet to replace the system of rule of law that controls the unchecked evils of anarchy. While the Net will change some of the ways that territorial states govern, it will not diminish the oldest and most fundamental roles of government and challenges of governance. Well written and filled with fascinating examples, including colorful portraits of many key players in Internet history, this is a work that is bound to stir heated debate in the cyberspace community.

Consent of the Networked Rebecca MacKinnon, 2013-04-23 The future of your freedom depends on whether you assert your rights within the digital spaces you inhabit. But, as corporations and countries square off on—and over—the internet, the likely losers are us.

Electronic Culture Timothy Druckrey, 1996 A wide-ranging critical anthology examining the impact of technology on our perceptions of the world & ourselves.

The Postdigital Membrane Robert Pepperell, Michael Punt, 2003 Pepperell (an artist and author of *The post-human condition*) and Punt (a filmmaker who has previously researched 19th century technology) believe the digital age paradigm being applied to the new century has too many intellectual restrictions in its reductionist, on-off logic. Instead, they propose the metaphor of a living postdigital membrane to describe the dynamic and unpredictable flow between art, computing,

philosophy, and science. The power of the membrane metaphor, they write, is its dual and contradictory function: like a transparent wall, it both connects and divides. They employ the metaphor here to explore how our understandings of imagination, technology, and human desire are changing in whatever one chooses to call this new era. Distributed by ISBS. c. Environmental Advertising in China and the USA Xinghua Li, 2016-05-05 Since the late 1980s, green consumerism has been hailed in the West as an efficient solution to environmental problems. However, Chinese consumers have been slow to warm up to eco-friendly products. Consumers prefer SUVs to hybrid cars, health supplements and snake oil medicines to organic foods and eco-fashion is still secluded in high-end designer studios. These choices contradict the findings of many sustainable lifestyle surveys that claim to register a rising desire for green products among the Chinese. This book examines the psycho-cultural differences that disrupt the translation of eco-friendly appeals to China by analyzing environmental advertising. It explores the different notions of green, the structures of desire that underlies the advertisements, and how they are shaped by ideological, cultural, and historical differences. Rather than arguing the superiority of the American or Chinese version of green consumerism, the book interrogates the role of advertising in the global spread of Western ideologies and explores the possibilities for consumers to resist transnational corporate hegemony in the green movement. This book fills an important gap in the critical scholarship on green marketing and should be of interest to students and scholars of environment studies, green advertising and marketing, environmental communication and media studies, China studies and environmental sociology, ethics and cultural studies.

Climate Change Ethics Donald A. Brown, 2013 This book provides an important new perspective on the debate over climate change ethics in light of a thirty-five year history of national and international debates about climate change policies. Donald A. Brown has written the first book of its kind that makes practical recommendations on how to increase consideration of ethical matters into policy, giving readers a new way of thinking about climate ethics.

What is Community Informatics (and why Does it Matter)? Michael Gurstein, 2007 Community Informatics (CI) is the application of information and communications technologies (ICTs) to enable community processes and the achievement of community objectives. CI goes beyond the Digital Divide to making ICT access usable and useful to excluded populations and communities for local economic development, social justice, and political empowerment. CI approaches ICTs from a community perspective and develops strategies and techniques for managing their use by communities both virtual and

physical including the variety of Community Networking applications. CI assumes that both communities have characteristics, requirements, and opportunities that require different strategies for ICT intervention and development from individual access and use. Also, CI addresses ICT use in Developing Countries as well as among the poor, the marginalized, the elderly, or those living in remote locations in Developed Countries. CI is of interest both to ICT practitioners and academic researchers and addresses the connections between the policy and pragmatic issues arising from the tens of thousands of Community Networks, Community Technology Centres, Telecentres, Community Communications Centres, and Telecottages globally along with the rapidly emerging field of electronically based virtual communities.

The Fortunate Islands Susan Kelly-Dewitt, 2008 Poetry. These poems are sure-footed, engaging, broad in subject matter but grounded in the poet's wary detective-mind. I have a strong feeling for the most 'psychological' of the poems, and those with psychological twists in the last stanza. The poems in this collection feel emotionally complete. An irresistible reading experience and revelation. Fortunate Arrival!--Sandra McPherson.

Exploring the Internet Carl Malamud, 2017-05-13 Exploring the Internet is a technical travelogue, chronicling 3 trips around the world during the early days of the Internet.
