The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education
National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Integrating Higher Education in the Arts, Humanities, Sciences, Engineering, and Medicine, 2018-07-21 In the United States, broad study in an array of different disciplines—arts, humanities, science, mathematics, engineering—as well as an in-depth study within a special area of interest, have been defining characteristics of a higher education. But over time, in-depth study in a major discipline has come to dominate the curricula at many institutions. This evolution of the curriculum has been driven, in part, by increasing specialization in the academic disciplines. There is little doubt that disciplinary specialization has helped produce many of the achievements of the past century. Researchers in all academic disciplines have been able to delve more deeply into their areas of expertise, grappling with ever more specialized and fundamental problems. Yet today, many leaders, scholars, parents, and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos. These silos represent what many see as an artificial separation of academic disciplines. This study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time. The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science, technology, engineering, mathematics, and medicine (STEMM) lead to improved educational and career outcomes for undergraduate and graduate students. It explores evidence regarding the value of integrating more STEMM curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEMM education programs.

Investing in the Health and Well-Being of Young Adults National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Improving the Health, Safety, and Well-Being of Young Adults, 2015-01-27 Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. *Investing in The Health and Well-Being of Young Adults* describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. *Investing in The Health and Well-Being of Young Adults* makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. *Investing in The Health and Well-Being of Young Adults* will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

Assessing Aid, 1998 *Assessing Aid* determines that the effectiveness of aid is not decided by the amount received but rather the institutional and policy environment into which it is accepted. It examines how development assistance can be more effective at reducing global poverty and gives five main recommendations for making aid more effective: targeting financial aid to poor countries with good policies and strong economic management; providing policy-based aid to demonstrated reformers; using simpler instruments to transfer resources to countries with sound management; focusing projects on creating and transmitting knowledge and capacity; and rethinking the internal incentives of aid agencies.

Putting Purpose Into Practice Colin Mayer, Bruno Roche, 2021-03-02 In the face of constant change, the nature of business must evolve rapidly if it is to remain relevant to society at large. How then should business change to meet the requirements of the 21st century, in which unbridled globalization and technological advancements are having profound effects on the wellbeing and prosperity of both the people and the planet? The achievement of purpose is the key to successful transformation - not just having a purpose, but making that purpose real at every level of the organization. This is the first book to provide a precise description of how companies can put purpose into practice. Based on a groundbreaking research project undertaken jointly between the Saïd Business School at the University of Oxford and Mars Catalyst, the think tank of Mars Inc., it provides a highly accessible account of how companies should determine and implement their corporate purposes. It outlines why corporate purpose is so important and how it can both address the major challenges the world faces today and deliver enhanced performance for business. Fourteen detailed case studies illustrate how companies of different sizes, sectors, and geographies have put purpose into practice and their experiences of doing so. These cases give deep insights into the way in which companies can build purposeful businesses, map and shape their ecosystems, identify failures and problems, align management, and create partnerships to deliver their purposes against which they can measure their performance. The achievement of purpose is a very real issue that every responsible leader in business, finance, and business academia must now face. This book will equip executives, managers, investors, and policymakers with the tools that they require to understand how the notion of corporate purpose should become a corporate reality.

The Black Power Movement and American Social Work Joyce M. Bell, 2014-06-17 The Black Power movement has often been portrayed in history and popular culture as the quintessential bad boy of modern black movement-making in America. Yet this impression misses the full extent of Black Power's contributions to U.S. society, especially in regard to black professionals in social work. Relying on extensive archival research and oral history interviews, Joyce M. Bell follows two groups of black social workers in the 1960s and 1970s as they mobilized Black Power ideas, strategies, and tactics to change their national professional associations. Comparing black dissenters within the National Federation of Settlements (NFS), who fought for concessions from within their organization, and those within the National Conference on Social Welfare (NCSW), who ultimately adopted a separatist strategy, she shows how the Black Power influence was central to the creation and rise of black professional associations. She also provides a nuanced approach to studying race-based movements and offers a framework for understanding the role of social movements in shaping the non-state organizations of civil society.

Accreditation and the Global Higher Education Market Gudmund Hernes, Michaela Martin, 2008 Higher education systems throughout the world in developed and developing countries are undergoing diverse types of changes that are often interrelated. One of these changes is the considerable growth in the private provision of higher education over the last decade, in particular within developing countries. The IIEP Policy Forum identified the most recent trends and findings of trade in higher education and by discussing the international driving forces that push national governments to establish quality assurance systems for their higher education institutions and programmes.

Transforming Education Unesco, 2011 Este informe cita ejemplos de utilización de las TIC en diferentes regiones del mundo - África, la región árabe, Asia y América Latina - y proporciona un buen ejemplo de los cambios que las TIC aportan a

los sistemas y políticas de educación. La gran diversidad que ofrecen los países seleccionados - Jordania, Namibia, Rwanda, Singapur y Uruguay - en términos de desarrollo económico y educativo, sugiere que lo que está en juego no se limitan a un determinado grupo de países privilegiados.

Macro Social Work Practice Michael Reisch, 2018-03-28 *Macro Social Work Practice: Working for Change in a Multicultural Society* explores the dynamics and practice implications of increasingly diverse communities, organizations, and social service networks and helps students develop the skills to work successfully in these contexts. The book gives students the foundational skills and knowledge required for effective practice in social service and human organizations, healthcare settings, communities, social networks, and social movements. It emphasizes the relationship between structural and institutional inequalities and the experiences of individuals, families, communities, and organizations. Through case examples the book illustrates how principles of social justice, empowerment, and cultural awareness can be applied in different cultural contexts. Through various exercises, students will apply critical thinking to resolve practical and ethical dilemmas and make the type of difficult decisions that practitioners confront every day. The book also addresses how recent political events, cultural developments, and social changes have altered both the context and the content of macro social work practice in the United States. *Macro Social Work Practice* is appropriate for undergraduate and graduate courses in social work, family and community development, public health, nursing, and human services. Michael Reisch is the Daniel Thursz Distinguished Professor of Social Justice at the University of Maryland, Baltimore. He earned his master's degree in social work at Hunter College, and his Ph.D. in modern European history and the history of ideas at the State University of New York, Binghamton. He has held leadership positions in multicultural national, state, and local advocacy, professional, political, and social change organizations. His publications have appeared in journals such as *Social Work*, *Social Service Review*, the *British Journal of Social Work*, and the *Journal of Social Work Education*. His most recent books are *Social Policy and Social Justice: Meeting the Challenge of a Diverse Society* and *Social Work and Social Justice: Concepts, Challenges, and Strategies* (co-authored with Charles Garvin). In 2014, he received the Significant Lifetime Achievement Award from the Council on Social Work Education and, in 2016, he was elected a Fellow of the American Academy of Social Work and Social Welfare.

How to Save a Constitutional Democracy Tom Ginsburg, Aziz Z. Huq, 2018-10-05 Democracies are in danger. Around the world, a rising wave of populist leaders threatens to erode the core structures of democratic self rule. In the United States, the election of Donald Trump marked a decisive turning point for many. What kind of president calls the news media the “enemy of the American people,” or sees a moral equivalence between violent neo-Nazi protesters in paramilitary formation and residents of a college town defending the racial and ethnic diversity of their homes? Yet, whatever our concerns about the current president, we can be assured that the Constitution offers safeguards to protect against lasting damage—or can

we? How to Save a Constitutional Democracy mounts an urgent argument that we can no longer afford to be complacent. Drawing on a rich array of other countries' experiences with democratic backsliding, Tom Ginsburg and Aziz Z. Huq show how constitutional rules can either hinder or hasten the decline of democratic institutions. The checks and balances of the federal government, a robust civil society and media, and individual rights—such as those enshrined in the First Amendment—do not necessarily succeed as bulwarks against democratic decline. Rather, Ginsburg and Huq contend, the sobering reality for the United States is that, to a much greater extent than is commonly realized, the Constitution's design makes democratic erosion more, not less, likely. Its structural rigidity has had the unforeseen consequence of empowering the Supreme Court to fill in some details—often with doctrines that ultimately facilitate rather than inhibit the infringement of rights. Even the bright spots in the Constitution—the First Amendment, for example—may have perverse consequences in the hands of a deft communicator, who can degrade the public sphere by wielding hateful language that would be banned in many other democracies. But we—and the rest of the world—can do better. The authors conclude by laying out practical steps for how laws and constitutional design can play a more positive role in managing the risk of democratic decline.

School, Family, and Community Partnerships Joyce L. Epstein, Mavis G. Sanders, Steven B. Sheldon, Beth S. Simon, Karen Clark Salinas, Natalie Rodriguez Jansorn, Frances L. Van Voorhis, Cecelia S. Martin, Brenda G. Thomas, Marsha D. Greenfeld, Darcy J. Hutchins, Kenyatta J. Williams, 2018-07-19 Strengthen programs of family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, the fourth edition of the bestseller *School, Family, and Community Partnerships: Your Handbook for Action*, presents tools and guidelines to help develop more effective and more equitable programs of family and community engagement. Written by a team of well-known experts, it provides a theory and framework of six types of involvement for action; up-to-date research on school, family, and community collaboration; and new materials for professional development and on-going technical assistance. Readers also will find: Examples of best practices on the six types of involvement from preschools, and elementary, middle, and high schools Checklists, templates, and evaluations to plan goal-linked partnership programs and assess progress CD-ROM with slides and notes for two presentations: A new awareness session to orient colleagues on the major components of a research-based partnership program, and a full One-Day Team Training Workshop to prepare school teams to develop their partnership programs. As a foundational text, this handbook demonstrates a proven approach to implement and sustain inclusive, goal-linked programs of partnership. It shows how a good partnership program is an essential component of good school organization and school improvement for student success. This book will help every district and all schools strengthen and continually improve their programs of family and community engagement.
