North Arrow Dennis Barone, 2008 Fiction. These seventeen stories ranging in length from a single paragraph to fifty pages explore issues of voice and silence, identity and its erasure in a style that is often poetic, frequently dark and somber, and occasionally humorous. From many different narrative perspectives, the author offers a jeremiad of sorts, urging readers to examine their own virtues and vices before venerating or condemning others. The title story, for example, describes the difficulties faced by a young woman veterinarian in the Netherlands. Not all of her problems originate with the men she meets who are skeptical about a woman's ability to work with large farm animals. In this bildungsroman of thematic oppositions--youth / age, elite / working class / north / south, city / country, male / female--the protagonist, Jacqueline, must come to know herself before she can exude the confidence she needs in her work and her life. The author doesn't let himself off the hook, either. In an autobiographical narrative, Northfield, he discusses the inability to remember and the partial failures that result from this shortcoming. Shorter pieces in the book in various ways illustrate a number of human foibles and follies that spring from the limitations of knowledge and recall. Other books by Dennis Barone include PRECISE

MACHINE, THE WALLS OF CIRCUMSTANCE, and TEMPLE OF THE RAT.

Ada 95 David A. Wheeler, 2012-12-06 Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's ability to interface with other programming languages (such as C, Fortran, and Cobol) and these are covered in one chapter. As a result both students and professional programmers learning Ada for the first time will welcome this new text.

A Big Heart Mike Papale ,2021-09-01 As a teen, Mike Papale had one dream: to play college basketball. He was laser-focused—training like an Olympic hopeful to make his dream reality. Out of nowhere, his world changed. August 24, 2006, while coaching a summer camp basketball game, he slumped over, unresponsive, turning blue within minutes. He was 17, and had gone into cardiac arrest. With no AED on site, he was given a one in a million chance to survive. He was soon diagnosed with Hypertrophic Cardiomyopathy, or HCM, which, left undiagnosed and untreated, can lead to sudden cardiac arrest. At the time, he was crushed—processing the life-altering news he would never be able to play competitive basketball again. He quickly realized he was fortunate to be alive, and redefined his life's purpose. A Big Heart brings the reader on Mike's story of reinvention, hope, and survival. It is guaranteed to inspire readers to battle adversity and attack their dreams!
